

**A Suribhotla**

**Senior Data Expert – Data Analyst & Data Modeler**

**Location:** Hyderabad, India

**Email:** abhisheksuribhotla@gmail.com

**Phone:** +91 8790553327

---

## **PROFILE**

Senior Data Expert with **8+ years of experience** in **Data Analysis, Data Modeling, and large-scale data transformation** within **financial and enterprise data environments**. Strong expertise in **Conceptual, Logical, and Physical Data Modeling, SQL-based data analysis, reconciliation logic, and end-to-end data flows**.

Proven ability to **elicit and translate complex business requirements into governed data models**, metadata artifacts, and scalable analytics solutions. Extensive experience working in **Agile delivery teams**, acting as a **bridge between business stakeholders and IT**, and ensuring clarity, traceability, and alignment across the SDLC. Hands-on experience with **GCP BigQuery**, cloud data platforms, and modern data governance practices.

---

## **CORE SKILLS**

### **Data Analysis & Modeling**

- **Conceptual, Logical & Physical Data Modeling**
- Data Mapping & Source-to-Target Mapping
- Reconciliation Logic & Financial Data Flows
- Metadata Management & Data Lineage
- Data Quality, Validation & Impact Analysis

### **Technical Skills**

- SQL (Advanced)
- GCP BigQuery
- Python (Data Analysis & Validation)
- Cloud Data Warehousing
- ETL / ELT Design

## **Tools & Platforms**

- **Erwin (Data Modeling – working knowledge)**
- Visual Paradigm (conceptual familiarity)
- **GCP BigQuery**
- MS Excel, PowerPoint, Word
- Tableau (Reporting & Validation)
- **Jira, Confluence**

## **Delivery & Methodologies**

- Agile / Scrum
- SDLC
- Stakeholder Management
- Requirements Elicitation & Documentation

---

## **PROFESSIONAL EXPERIENCE**

### **Senior Software Engineer / Senior Data Analyst**

Virtusa Consulting Services – Hyderabad

Client: HSBC (Financial Services)

Jan 2022 – Present

**Project:** Finance on the Cloud (FOTC) – Global finance data transformation initiative.

#### **Key Responsibilities:**

- Supported large-scale financial data transformation programs across enterprise finance systems.
- Worked within Agile, cross-functional teams to design and deliver governed, high-quality data solutions.
- Led business, functional, and non-functional requirement elicitation with finance stakeholders.
- Translated business requirements into conceptual, logical, and physical data models aligned with governance standards.
- Designed reconciliation-ready data structures to support financial reporting and controls.

- Performed metadata analysis, including entity definitions, attribute naming, data types, lengths, and lineage.
  - Produced and owned data **modeling artifacts, mapping documents, and analysis** deliverables for development teams.
  - Acted as a bridge between Business, Finance, and IT, ensuring requirement clarity throughout the SDLC.
  - Supported end-to-end data journey mapping, from source systems through transformation to consumption layers.
  - Used SQL and BigQuery extensively for data analysis, validation, and reconciliation checks.
  - Ensured traceability and consistency of data and metadata across environments.
- 

### **Senior Data Analyst / BI Analyst**

Keolis Hyderabad Mass Rapid Transit System Ltd – Hyderabad

Client: L&T Metro Rail Limited

Dec 2017 – Jan 2022

#### **Key Responsibilities:**

- Gathered and analyzed business and technical requirements for enterprise reporting and analytics.
- **Designed logical and physical data models to support operational and management reporting.**
- Created source-to-target mappings, transformation rules, and business logic documentation.
- Performed data gap analysis and impact assessments across multiple source systems.
- Built and maintained analytics-ready data marts for reporting and reconciliation.
- Conducted time-series and trend analysis on transactional datasets.
- Developed KPI definitions and ensured alignment between business metrics and underlying data models.
- Worked closely with stakeholders to ensure data accuracy, consistency, and usability.

---

## **Data Analyst**

Concentrix – Visakhapatnam

Client: Uber International

Apr 2017 – Nov 2017

### **Key Responsibilities:**

- Analyzed high-volume transactional datasets including trips, demand, and fare data.
- Created analytical data models to support business reporting and forecasting.
- Used SQL for data analysis, validation, and reconciliation.
- Developed KPI frameworks and reporting structures aligned with business objectives.
- Translated functional requirements into scalable analytical datasets.

---

## **EDUCATION**

Bachelor of Technology (Electronics & Communication Engineering)

Raghu Engineering College , Visakhapatnam

Sep 2012 – May 2016
