Fully Authorized to work in France | Availability – Immediate

SUMMARY

Senior Business Analyst with 4+ years in requirements and Agile delivery, built on 8+ years in financial operations. Skilled in eliciting and documenting business and data rules (pricing, reference data, corporate actions, regulatory reporting EMIR), mapping field-level specifications and data lineage, defining acceptance criteria, and maintaining traceability through UAT to release—reducing manual effort and operational risk.

SKILLS

- **Business Analysis:** Requirements Gathering, Business Requirements Document (BRD), User Stories, Business Logic Analysis, Gap and Root Cause Analysis.
- **Methodology:** Agile Methodology (Scrum) & Backlog Prioritization.
- **Domain Expertise:** Trade Lifecycle, Reference Data Management, Pricing, Corporate actions, regulatory reporting (EMIR), Data Reconciliation and working knowledge of clearing, custody and settlement processes.
- **Technical & Data Tools:** SQL (Data validation & extraction), Excel (advanced), JIRA, SharePoint, Confluence, HP ALM, Bloomberg and Refinitiv (Reuters).
- **Standards:** ISO 20022 and SSI SWIFT data (MT541, MT543).

PROFESSIONAL EXPERIENCE

Senior Business Analyst | PwC | Chennai | May 2022 - January 2024

- Led the end-to-end business analysis for the EMIR Refit implementation for the Exchange-Traded Derivatives (ETD) asset class, performing gap analysis against newly released DTCC technical specifications.
- Translated complex regulatory updates into detailed field-level functional specifications, structured user stories, and measurable Acceptance Criteria to map data lineage for engineering teams.
- Conducted technical walkthroughs of the new reporting logic for Compliance and Business teams to secure formal signoffs, and guided developers throughout Agile sprints to ensure compliance with DTCC specs.
- Partnered with the QA team to review and refine field-level test cases for robust validation, while maintaining dedicated Confluence frameworks to track project progress and document business rules.

Senior Business Analyst | BNP Paribas ISPL | Chennai | July 2019 - May 2022

- Drove BA scope for the pricing platform transformation with the Product Owner, delivering high-integrity data feeds to downstream Fund accounting systems.
- Designed validation rules and control mechanisms to strengthen data governance and reduce operational risk across pricing workflows.
- Participated in UAT/NRT: prepared datasets, executed test cases against ACs, and documented defects with full traceability to user stories.
- Validated system enhancements by executing SQL queries for data extraction and validation to ensure functional integrity of financial data.
- Automated pricing feeds from market data vendors, reducing manual efforts by 25%.

Senior Reference Data Analyst | Barclays Shared Services | Chennai | October 2015 - June 2019

- Owned the functional integrity of reference data and SSI setups, driving straight-through processing (STP) and directly reducing trade fails.
- Reconciled accrued interest for fixed-income instruments in the static data system against downstream accounting/settlement systems; corrected day-count and coupon setup to prevent settlement/NAV impacts.
- Resolved data mismatches and managed static data changes for corporate actions in collaboration with external vendors.
- Served as the primary functional liaison between the Chennai delivery centre and global business hubs and trained junior analysts.

Senior Associate Intraday Pricing | BNP Paribas GSO | Chennai | September 2011 - October 2015

- Ensured intraday prices for securities are fed into downstream Fund accounting platforms to drive daily NAV accounting and prevent discrepancies in financial reporting.
- Managed the pricing of instruments impacted by different corporate action events, ensuring accurate valuation for downstream fund accounting platforms.
- Automated pricing workflows and functioned as a Subject Matter Expert (SME) for team transitions between Hub locations.
- Reduced manual errors by 30% and improved turnaround time for pricing updates through enhanced operational efficiency.
