PROFILE

A **SOFTWARE ENGINEER / CO-PILOT DEVELOPER** with more than 5 years of experience in SharePoint, PowerApps, Power Automate, Power BI, Power Automate Desktop, Azure DevOps designing and implementing solutions, customization, testing and Component libraries, responsive layouts Custom connectors and reusable components Power Automate (Cloud & Desktop Flows) Automating workflows between services Approval processes, scheduled and instant flows

Experience with customization of SharePoint site templates, new templates using master pages and CSS and developing Canvas PowerApps, Workflows using power automate, and developed automated services using Power Automate RPA.

Working knowledge of configuration and custom development SharePoint components including webparts-forms, SharePoint API Integrations and custom connectors and Third-party integration.

TECHNICAL PROFILE

- Web Technologies: HTML, CSS, Basic JAVASCRIPT
- Database Technologies: SQL Server SSMS, SharePoint, Dataverse
- RPA Power Automate Desktop.
- Microsoft Technology: Microsoft SharePoint Online, SharePoint - On Prem.
- Microsoft copilot, Ai Builders, Custom Connectors, Power Pages
- PowerApps, Power BI, Power Automate, Power Virtual Agents. (Copilot Studio)

WORK EXPERIENCE

- I am currently working as a Copilot Specialist at PARAM Info Dubai from June 2025.
- I Worked as a Copilot Developer at Trigent Software Inc Bengaluru from May 2024 – May 2025
- I Worked as a Software Engineer at Novigo Solution Pvt. Ltd. Bengaluru from April 2022 to April 2024
- I worked as a Software Developer at Percoyo. Pvt Ltd Bengaluru. Jan 2021 – Jan 2022

RESPONSIBILITIES

- Copilot Developer, Designed, Developed, and supported Power Platform applications Power Virtual Agents
- Provided comprehensive design, development, and maintenance for SharePoint online/On-prem applications including web portals and web-based solutions.
- Third party integrations with power automate and the custom connectors, AI Builder, Data verse, Model Driven Apps,
- Gather user activity data for Microsoft SharePoint sites and sub- sites for analysis and evaluation and use SQL server as Database for Power apps.
- Involved in designing and implementing virtual SharePoint environments for development and testing.
- Developed POC's with various requirements with Canvas apps and workflows.
- Performed SharePoint administrative design and maintain servers SharePoint database.
- Responsible for design methodology and project documentaries.
- Developing Copilot Bots, Power Pages.
- Using power agents developed chatbots, and automated replies.
- Made DAX queries, visual reports, KPI scorecards, and dashboards in Power BI desktop RS version.
- Developing Power Automate Desktop processes, Excel automation, Web Automation, Ui Automation, Environment variables and many Automations.
- Scheduled Cloud flows and automated flows are integrated with power automate desktop.
- Azure Devops Creating Pipeline and releasees for Power platform packages from one environment to another.
- Error handling and business and system exceptions.

Solution Architecture

- Design and implement end-to-end Power Platform solutions with a focus on **security, scalability, performance, and maintainability.**
- Integrate Power Apps and Power Automate with enterprise systems such as **Azure services, SQL Server, SharePoint, SAP, and third-party connectors.**

SKILLS

- Web Technologies: HTML, CSS, Basic JavaScript
- Database Technologies: SharePoint Online/ON-Prem, SQL Server, Dataverse
- Microsoft Power Platform: Power Apps, Power Automate Power BI, Power Virtual Agents, Copilot Studio, Power Pages
- Power Automate Desktop, Excel Automation, Ui automation, Web Automation, Browser Automation

EDUCATION

ISLAMIAH IT (VTU)
Electronics & Communication
Engineering
Aug 2015 – Sep 2021
CGPA - 6.8 &
Bangalore, Karnataka

LANGUAGES

ENGLISH ----- 100%

Program

AWARDS

Novigo Champion award

Technical Leadership

- Lead and guide Power Platform Copilot at development teams.
- Performed code reviews, enforce best practices, and establish **coding standards and architectural guidelines**.

Governance & Compliance

- Implemented Copilot at **Center of Excellence (CoE)** strategies.
- Worked on **data security, compliance, environment governance, and access control policies**.

Data Modelling & Integration

- Architect complex **Dataverse data models**, including relationships, security roles, and business rules.
- Design integrations with external data sources using standard and custom connectors.

Stakeholder Collaboration

- Work closely with business stakeholders to gather requirements and translate them into **clear technical specifications and solution designs**.
- Act as a bridge between business teams and technical delivery.

Application Lifecycle Management (ALM)

- Establish and manage **CI/CD pipelines using Azure DevOps** for Power Platform solutions.
- Support environment strategy, solution packaging, versioning, deployment, and release management

PROJECTS

Projects Worked in Param Info

June 2025 - Feb 2026

1. Government Relations Kiosk Automation (Power Apps & Power Automate).
Built a Power Apps Canvas App for SAP ID-based login, video call initiation, and call-not-received scenarios.
Implemented automated logging of events (Login, Video Call Started, Send Note) with timestamp accuracy.
Integrated Power Automate for email notifications and audit logging to SharePoint.
2. MOBARO Results Data Processing Automation
Created SDD for email-driven automation to process MOBARO results.
Designed Power Automate flow to: Filter emails by subject ([EXTERNAL] Results data) Ignore already-processed emails (Loaded: logic).
3. Risk Assessment Framework (2026) – Power Apps Solution. And Copilot Bot Risk Bot.
4. Arabic Contract Automation Solution for Arabic Contract Processing Automation.
5. IT Loan Devices Tracking System
Designed SDD for IT asset / loan device tracking.
Implemented Power Apps solution with Department-based filtering.
6. Email-Driven Data Extraction & Excel Automation
Delivered for extracting data from email links, PDFs, and attachments. Designed multiple automation patterns: SharePoint file links.
7. Machine Availability & RPA Alerting Framework
Authored for machine availability monitoring for Power Automate Desktop bots.
8. Access Governance & Environment Management (ATD Production)
Documented for Production environment access requests
9. Copilot. Bots Risk Bot, Hr Bot, Employee Bot.
10. Created Power pages for different requirements, I connect, DataMAG,Hover Lift..

Projects Worked on Epiroc Client

Internal RPA applications for Epiroc Client

June 2024 - Jan 2025

- Epiroc App- Details of RPA & other tools Jira Statistics
 - Copilot Bots Digital Bot, Data Surveillance Bot
 - RPA demo APP- marketing App.
 - Teams Planner integration with Power automate desktop.
 - RPA yearly and Automation in production survey.
 - Business Voice Actions KPI.
 - Jira extract for PBI.
-

Power Automate Desktop Flows Epiroc Client

May 2024 – Jan 2025

- Download client URLs Power Automate desktop Using Ui & WEB automation.
- Downloading Open orders using web automation.
- API Integration data analytics Portal.
- Copilot Bots
- SAP data interfaces.
- Ui web recording for form data.
- Excel automation for invoice details.
- OCR for data classification.

Projects Worked on Novigo solutions.

May 2022 – April - 2024

Transfer Request App

April 22- Sep 22

- Multiple approvals for varying amounts, and each permission is contingent on the amount when item requests are made. The ability to integrate with Excel to load data into forms. File extraction and archiving for PDFs.

COI (Conflicts of Interest) App

Sep 22- Jan 23

- Developing official documentation and providing information on conflicts of interest, policy renewals, and approvals, several forms with a responsive app that requires consent for every request.

SharePoint Environment Testing

May 23

- Verifying the workflows and sites, examining the pages and web applications, and checking the database. Keeping track of the lists, verifying the APIs, and managing several servers and setups. Verifying the online application and workflows.

Timesheet App

Oct 23 - Dec 23

- completing a monthly time sheet, obtaining approvals, and, if chosen, populating dynamic calendar selection dates for holidays and weekends

Power Automate

Sep 23 – Feb 24

- Power automates RPA bot connection with WhatsApp.
- Obtaining patient, practitioner, and multiple option backend data from Epic FHIR, API's along with WhatsApp front end and power automate, will automate appointment scheduling. Choosing places and leaving voice messages.
-

Power Pages

Sep 23 – Feb 24

Power Pages and Power Automate RPA, including bot integration with **WhatsApp**.

I have worked on solutions that retrieve patient, practitioner, and multi-option backend data from, integrating it with SAP end and Power Automate to SQL Server

Power Automate Desktop Flows

Sep 23 – Feb 24

- Automatic Web Form Filling, automate to find text in the PDF files content into Excel List through Power Automate Desktop, Reminder to Stretch with Logging

Power BI (Dashboard & Reports)

Nov 23

- Sales Dashboard, Expense Reports, Employee Onboarding, Marketing Dashboard, Hospital

Power Virtual Agents (Copilot Studio)

Nov 23

- Sales Bot, Expense Bot, Employee Onboarding Bot.

POC's

- Help Desk, Site Inspection, Budget Tracker, Inventory Management app Sales Order App.

SQL Server

- In our Power Apps application, we've integrated SQL Server as our primary data source. This allows us to store and retrieve data efficiently using the SQL Server database management system if we want to insert or delete the data that we have also done in SQL.

Project In Percoyo

March -2021 - March 2022

- SharePoint Online/On -Perm developing web apps and sites and customizing MASTER pages.
- Maintaining Servers and cleaning the dB and archives.
- Power Virtual Agents Bots.
- Creating Lists and connecting the API integration with third party apps.
- Exceptional handling of RPA desktop.
- Parent flows and major Web extractions.
- For Percoyo 6 months on SharePoint and 6 months on biocurators clients.
