ORGANIZATIONAL EXPERIENCE

Virtusa Consulting Service Private Limited | Pune

October2021-Present

1. Client – CITI Bank | Product Owner | (October 2025 to Till Now)

Key Roles:

- ✓ Responsible for CITI Global **Regulatory Event Tracking** product ownership and strategy including defining product vision, roadmap and strategic objectives.
- ✓ Actively participated in PI planning activities and all scrum ceremonies.
- ✓ Facilitating requirement workshops, peer discussion and gathering detailed requirements from multiple stakeholders.
- ✓ Translating regulatory requirements into clear user stories and acceptance criteria.

- ✓ Generative AI Use Case Identification for RET Product.
- ✓ Responsible for backlog refinements and prioritization.
- ✓ Act as primary bridge between business stakeholders, development and delivery team.
- ✓ Collaborate closely with engineering team to remove critical blockers, and ensure timely delivery of features.
- ✓ Supporting UAT to ensure successful feature delivery.
- ✓ Coordinate with other POs, Scrum Masters, and the Release Train Engineer (**RTE**) across the Agile Release Train (**ART**) to manage cross team dependencies mitigate the risks.
- ✓ Document and maintain product artifacts like **Steer-co**, **RAID** log etc.
- ✓ Tracking production issues, identify root cause and coordinating with support team for issue resolution.
- ✓ Tracking KPIs and accomplishments and delivery milestones.
- ✓ Strong exposure to both Change-the-Bank (**CTB**) and Run-the-Bank (**RTB**) operating models, with a sound appreciation of production stability, operational controls, and risk management
- ✓ Excellent stakeholder management, facilitation, and communication skills, with the ability to engage confidently with senior business stakeholders, technology leads, and external partners.

2. Client – HSBC | Agile Business Analyst | (October 2021 to October 2025)

Key Roles:

- ✓ Facilitated requirements workshops and prepared functional requirements documents, working closely with Product, Business and Technology stakeholders.
- ✓ Gathered requirements and created user stories, use cases, process flows and mock-ups.
- ✓ Performed functional testing and facilitated UAT with business users; conducted walkthroughs and supported SIT/UAT execution.
- ✓ Performed gap analysis and developed roadmaps for application enhancements and transformation initiatives.
- ✓ Supported Target Operating Model (TOM) transformation for payment processing, defining future-state process responsibilities, business/technology hand-offs, operational controls and system interactions across payment initiation, processing, clearing and settlement.
- ✓ Conducted detailed AS-IS process analysis across cross-border payments, ACH, Wire, SWIFT and ISO 20022 payment flows, documenting current-state processes, business rules, system interactions, hand-offs and operational pain points.
- ✓ Performed AS-IS vs. TO-BE gap analysis to identify process, system, data and operational gaps and translated findings into business requirements, user stories and transformation initiatives.
- ✓ Designed and documented TO-BE process flows for payment migration and automation initiatives, identifying process simplification opportunities, changes in system responsibilities and opportunities to improve straight-through processing.
- ✓ Performed Business Capability Mapping for payment transformation initiatives, linking payment capabilities across initiation, validation, processing, clearing, settlement, reconciliation and exception management to supporting processes and technology components.
- ✓ Led requirements workshops for critical banking transformation projects including US Transtar Migration, Cross-Border Payments, ACH, Wire, SWIFT, CT Account Automation, Repack Reporting, ISO 20022/SWIFT Migration, DTCC and clearing-house initiatives.

Key Deliverables:

- ✓ Supported legacy-to-target platform transformation by analysing AS-IS processes, identifying functional and operational gaps, defining TO-BE workflows and translating target-state requirements into business/user stories while addressing customer, regulatory and compliance requirements.
- ✓ Implemented US payment solutions covering ACH and Wire, along with ISO 20022-aligned corporate-action messaging across HK, UK, US and Singapore.

- ✓ Led functional analysis for cross-border payment and cash-account automation, mapping AS-IS payment flows and defining TO-BE workflows across SWIFT messaging, HUB-Hadoop integration and Odyssey, including business rules, system interactions, exception handling and operational hand-offs.
- ✓ Implemented cross-border payment flows involving MT103 and MT202 and supported cash-account automation through HUB-Hadoop/Odyssey integration.

CMS IT Service Private Limited | Mumbai
