WORK HISTORY

Macquarie Group Limited - Assistant Manager

Gurgaon, India • 03/2025 - 12/2025

- Worked extensively with the Order Management System (OMS), supporting trade capture, order lifecycle management, and post-trade processing.
- Partnered closely with the Front Office (Traders and Sales) to resolve trade queries, validate trade bookings, and ensure timely execution of business processes.
- Produced and validated daily Product Control P&L for Fixed Income and Credit products, ensuring timely and accurate financial reporting.
- Collaborated with Front Office, Operations, Technology, and Risk teams to investigate trade breaks, system issues, and process improvements.
- Gathered and documented business requirements for enhancements to order management and trade processing workflows, ensuring alignment with business objectives.
- Supported UAT, validated system enhancements, and coordinated with stakeholders to ensure successful production deployment.
- Supported Prime Brokerage Back-Office processes, including trade processing, reconciliation, exception investigation and resolution.
- Worked on Prime Brokerage and Capital Markets processes, supporting end-to-end trade lifecycle and post-trade activities.

Capgemini Technology Service India Limited - Consultant

Mumbai, India • 04/2022 - 03/2025

- Worked as a Business Analyst in Capital Markets domain with exposure to Fixed Income, Equities, Listed & OTC Derivatives within a global banking environment.
- Collaborated with Front Office, Middle Office, Risk, Operations, and IT stakeholders to gather and document business requirements for reference data, trade lifecycle, and financial reporting processes, ensuring alignment across teams.
- Led automation initiatives to streamline static data setup, validation, and reconciliation processes, reducing manual intervention and improving SLA adherence.
- Mapped AS-IS and TO-BE business processes to identify control gaps and inefficiencies, recommending automation opportunities across securities setup and master data workflows.
- Conducted requirement-gathering workshops and prepared BRD, FRD, functional specifications, and detailed user stories with clear acceptance criteria in an Agile environment.

Deutsche Bank Group - Analyst

Mumbai, India • 08/2019 - 03/2022

- Supported the Investment Banking business by performing Product Control activities for Credit trading desks covering HY Bonds, IG Bonds, and CDS.
- Partnered with Front Office Traders to validate daily P&L, investigate valuation movements, and resolve trade-related queries.
- Performed daily T+1 P&L production, validation, attribution, and reconciliation, ensuring accurate financial reporting.
- Collaborated with Front Office, Risk, Finance, Operations, and Technology teams to resolve trade booking, valuation, and reconciliation issues.
- Worked with Order Management Systems (OMS) to support trade capture, trade lifecycle, and accurate trade representation in downstream systems.
- Performed valuation controls, cash break investigations, and balance sheet reconciliations to maintain a robust control framework.
- Supported Product Control system enhancements, UAT, and process automation by collaborating with business and technology stakeholders.
- Conducted root cause analysis of P&L exceptions and implemented process improvements to enhance controls and operational efficiency.

Cognizant Technology Solution India PVT LTD - Process Specialist

Pune, India • 02/2018 - 08/2019

- Reviewing, Performing & Reconciling P&L of Credit Products mainly - HY Bonds, CDS & IG with detailed analytical investigations and commentaries.
- Perform daily Profit and Loss on T + 1 basis and investigate and explain flash to actual variances.
