

CURRICULUM VITAE

ANAND KUMAR

E-mail ID - meanando6@gmail.com

Mobile - +91- 9835698203

Professional Synopsis

An incisive professional with 8+ years of vast experience in network and security areas. Currently working with Capgemini.

Passionate about tackling challenging architectural and scalability problems.

★ Ability to work with customers to determine current network topology, assess needs, then design and provide deployment guidance or deploy a cost-effective, robust solution that has the client in mind.

★ Experience of working with variety of technologies and delivering the expected results in short period.

★ Ability and interest in learning and incorporating new and emerging technologies in the field of networking.

★ A multi-tasking, flexible, friendly, creative, team-oriented and detail-oriented combined with strong interpersonal communication skills, Integrity, time management, analytical thinking, and problem-solving skills.

Specializes in:

★ Responsibilities include preparing **Low-Level Designs (LLDs)** from High-Level Designs (HLDs), executing deployments, managing incidents, and ensuring operational stability.

★ Firewalls: Fortigate

★ Routing Protocols: RIP, OSPF, EIGRP, BGP

★ Switching Protocols: VLAN, STP, RSTP, VTP, Ether Channel

★ Network Documentation: MS Word, MS Excel, Microsoft Visio, Powerpoint,

★ Processes : ITIL Framework, Change Management, Problem Management

Skill Set

Switching

-Backup and restore device configuration.

-Cisco IOS upgrades and recovery (FTP, TFTP)

-Troubleshoot connectivity issue, verify and validate Link errors, CRC Errors.

-Monitor Switch availability or any other error and perform Triage with the respective team to resolve the issue.

-Carry out standard changes related to desktop ports.

-Carry out standard configuration on switch according to the template.

-Carry out VLAN mapping to the interface, port mapping.

-VLAN configuration over switches and make machines communicate in LAN & WAN connectivity.

-LAN technologies - Ethernet, Fast Ethernet, Gigabit Ethernet.

-perform port aggregation & Link configuration: Access/Trunk.

-Configuration and troubleshooting of VLANs, inter-VLAN routing, Interswitch connectivity.

-Configuration and troubleshooting of Trunk ports, VTP (v1&v2).

-Configuration and troubleshooting of STP protocols and STP protection.

-Implemented CDP, LLDP, EtherChannel.

-Configuration HSRP, VRRP.

Routing

- Backup and restore device configuration
- Troubleshoot network connectivity issues using ICMP, ping, and traceroute
- Monitor routers and links for hardware and performance issues.
- Triage for Link issues with appropriate vendors.
- Troubleshooting, overutilization, Reachability, VPN connectivity.
- Apply standard SOP based configuration on the router.(AAA,TACACS,Radius,Banner,VPN Configurations)
- Configuration of NAT/PAT,ACL
- Configuration/Troubleshoot of Static, Dynamic (OSPF & EIGRP), and Default Routing protocols.
- Configure, verify, and troubleshoot IPv4 addressing, Subnetting,Supernetting, ARP, and Route Summarization
- Basics of BGP

Firewall: -

- Restore and backup device settings
- Used Fortinet Manager to Upgrades/installs OS to Fortigate Firewalls in accordance with recommendations to maintain them up to date.
- Using FortiManager, provision firewall policies on Fortinet FortiGate appliances.
- Implementing rules to allow or restrict IPs, and creating policies in response to requests from business users.
- FortiGate CPE 40/60/80/100 series Firewall configuration, management, and FortiAnalyzer series 4000 (logging and reporting server), FortiManager series 3000/4000 (centralized control) firewalls
- Analyze the logs and troubleshoot any connectivity problems.

WLAN

- Monitor WAP, and Triage issue with respective teams.
- Troubleshooting Connectivity issue from an end-user perspective.
- Troubleshooting the WAP isolation issue, Cannot Connect to SSID,Slow Performance, Intermittent Disconnections

Work History

Capgemini Information Technology

28th Apr'21 to 16th July 26

Designation: Network Engineers

Client:Société Generale Global Solution|| 3M India

Roles and Responsibilities

- 1)Join calls with customer to understand their requirement.
- 2)Replacement and refreshment & upgrade of existing network device such as FortiGate firewall,router,switches,ethernet (copper,fiber optics 10/40/100G).
- 3)prepare all pre-deployment documentation for replacement, refreshment, upgrades, and implementation.
- 4)Troubleshoot and resolve issues as they arise after migration.
- 5)Adding rule in FortiGate firewall
- 6)Designing rule & creating Incident Record arises after migration.
- 7)Do changes in network (which includes IOS upgradation, Route the traffic from Primary to secondary if Primary link is flapping, adding vlan, adding a routes)
- 8)Investigate health issues of ports and interfaces for routers and switches, ensuring connectivity with agreed speed, duplex, and bandwidth.
- 9)Attending weekly change approval board meeting for getting approval from change board.

- 10) Manage the delivery include validation, approval, feasibility, target delivery timeliness and implementation of order as per customer requirement.
- and ensure new equipment is registered and added to the inventory management system
- 11) Planning and implementing of customer changes, based around an ITIL framework.
- 12) coordinating with remote hand support engineer for the O&M activities.
- 13) Handle day to day security P3 and P4 incidents.
- 14) Working closely with partner management teams to such as Verizon, AT&T, SingTel, Telstra, OBS, COLT for provisioning new circuits activation and deactivation within SLA.
- and proper destruction and decommission of existing network device such as FortiGate firewall, router, switches
- 15) Timely completion of given activity and to generate daily link utilization report with SLA achievement more than 95%

Eljay Engineering

07th Oct-16 TO 09th Apr-21

Designation: Network Engineer

Client: presidio, WPP, AT&T

Currently being part of Network Operations Team as a Network Engineer for the **presidio** Company (US) Client

Roles and Responsibilities

*Support / Incident Management

- Worked in Alert Management.
- Ticketing Tool: Service now
- Installing, Configuring, and Troubleshooting of Networking Equipment's
- Implementing emergency change requests based on customer requirements
- Mentoring team members for technical training.

Prolink Computers Pvt Ltd

14th Dec-15 TO 31st Aug-16

Designation: Network Engineers

Client: Vijaya Bank HQ Datacenter

Roles and Responsibilities

- Providing 24 x 7 Technical Support.
- L1 and L2 Support Vijaya Bank Data Center (DC) As well as Data Recovery (DR)
- Managing and Configuring Routers and Switches. (HP and Cisco)
- Identify and Resolving network-related problems
- Provided accurate documentation for network topology, policies, procedures, and change protocol
- Support and Resolving Core level Switches and Router as well as LAN Network Related Problem
- Monthly / Weekly Backup of all Networking Devices
- Documentation of the Bandwidth, uptime/ Downtime, and configuration details
- Troubleshooting LAN and WAN network problems and related issues
- Implemented and Migrated Networking Components of HP 59XX, HP 55XX, Cisco 2960 Switch, Cisco 2900.
- Monitoring Multiple Vendor MPLS Links and resolving the related problem
- Configuring and troubleshooting standard and Extended ACL, L2, and L3 Vlan, Routing, uplinks, and Static routing.

D.S Infotech Pvt. Ltd.

17th Feb-14 TO 06th Jul-14

Designation: I.T Engineer

Client: Air India limited

Roles and Responsibilities

- Monitoring, managing, and troubleshooting of complete Air India Network.
- Monitor and Maintain Cisco Router (1900), Switches (2960, 3750), and Firewalls (5510).
- To check the performance-related faults like (packet loss, latency, slow speed, utilization report)
- To check the connectivity status of ADSL, Lease Line, and MPLS connection.
- Coordinating with Telco to report and isolate the issue (Circuit down, intermittent, packet loss, Chronic issues, etc.)
- Configuring & managing the various type of printers like Intermac, Fujitsu, and HP LaserJet Printers.
- Coordinate with the various Vendors for Hardware related issues.
- Update the Servers and all client systems from time to time by update packages and Anti-virus.
- Complete given work Orders on time-related to Airlines Software updates.
- Responsible for configuring and test any new hardware and software.
- Installing the software, operating systems, and server operating systems such as Liaison, SITA Cute System.
- Managed and Administered Windows XP and Windows 7 workstations and laptops.
- Working in 24*7 Shifts according to the Roaster made by line manager.

Academic Profile

- Completed M.Tech (Wireless and Network Security)in May 2013 from Vel-tech Chennai in association with CDAC Pune
- Completed B.Tech (Electronics and Communication) in May 2011 from INSTITUTION OF ENGINEERS (INDIA)GIET, CHENNAI.
- Completed HSC in 2002 From Millar High School, Patna (B.I.E.C).
- Completed SSC in 2000 From St Paul's Academy, Patna (I.C.S.C.E)

Personality

I am calm. I communicate easily same in an environment under pressure. Throughout my professional life, the information exchange, the analysis of needs makes part of my criteria. I take time to reflect before acting.

Personal Details

Father Name : Late Rameshwar Shah
Present Address : Anand Kumar,
No 4,1st main, 3rd cross,
Dhanalakshmi layout Thindlu main road,Vidyaranyapura
Bangalore -560097

Declaration:

The above-disclosed information is true and correct to the best of my knowledge and belief.

Date: - / / 2026

Place: - Bangalore
