

ANUTOSH TRIVEDI

Data Science & Analytics

Email: trivedianutosh26@gmail.com
Mobile: +91-9145728977
LinkedIn: <https://www.linkedin.com/in/anutosh-trivedi-81379779/>

Senior AI & Data Science professional with 7+ years of experience delivering advanced analytics, ML/DL models, and Gen AI solutions. Specialized in predictive modeling, decision intelligence, and LLM-based systems that convert large-scale data into actionable insights, driving automation, efficiency, and measurable business outcomes.

PROFILE SUMMARY

- AI Engineer with proven success in delivering data-driven solutions across industries, currently leading strategic analytics initiatives at Mercedes-Benz R&D.
- Expert in advanced analytics, statistical modeling, and machine learning to optimize business performance, improve forecast accuracy, and solve real-world problems.
- Skilled in deriving insights from complex datasets through exploratory analysis, feature engineering, and model interpretation, with hands-on deployment of end-to-end solutions.
- Strong communicator with a talent for translating technical outputs into clear business narratives, enabling actionable decisions across cross-functional and non-technical teams.

SOFT SKILLS

TECHNICAL SKILLS

- Programming Languages & Frameworks:** Python, PySpark, Flask, FastAPI, LangChain, LangGraph
- Python Libraries:** Pandas, Numpy, scikit-learn, seaborn, matplotlib, geopandas, pytorch, tensorflow, keras, NLTK, Spacy, H3, onnx, BeautifulSoup, pypdf, folium
- Cloud Technologies:** AWS-S3, Azure Databricks, ADLS, Azure OpenAI, Azure Monitoring, Azure KeyVault, Azure ML Endpoint
- Data Warehousing & Databases:** Snowflake, MongoDB, SQL
- Project Management & Collaboration Tools:** MS Excel, Jira, Confluence, Git, AirFlow, Azure DevOps, Jenkins
- AI/ML Models & Algorithms:** Linear and Logistic Regression, Random Forest, Decision Tree, PCA, NLP, Clustering Algorithms (DBSCAN, K-means, K-medoids), Ensemble Techniques (Bagging and Boosting), LightGBM, XGBoost, GenAI, Milvus, GPT-4, LLM, SHAP, LIME, OpenAI, Optuna.

WORK EXPERIENCE

Oct'23-Present: Senior Engineer at Mercedes Benz Research and Development India (MBRDI), Bengaluru
Key Result Areas:

- Designed and deployed a **RAG-powered Generative AI pipeline** for generating insights and suggestions for internal business teams, enabling intelligent recommendations and automated insight generation from millions of Spark-enriched data records.
- Directed a cross-functional initiative with marketing and sales teams to launch a strategic campaign focused on EU cities, utilizing proprietary clustering algorithms and building KPIs to identify and quantify the risk potential of hotspots.
- Presented the insights and results to stakeholders and business leaders to foster pro-active actions on improving road safety standards and monetize the product.
- Designed SAFeR model** to quantify the complexity of hotspots based on the accident data and vehicle data and aligned product capabilities with stakeholder needs - including civic bodies - ensuring continuous model improvement and real-world business impact.

Highlights:

DaaS (Data as a Service)

- Developed a scalable data enrichment product **used in 25+ countries, leveraging Spark, machine learning, and clustering algorithms** to enable the data collection team to significantly improve test drive coverage and efficiency.
- Enabled new analytics capabilities by creating KPIs **to quantify road infrastructure complexity near junctions and roundabouts** to mitigate the risk at cross traffic and pedestrian crossing.

Road Safety Hotspot Campaigns

- Identified and Classified high risk potential hotspots from integrated data sources **using classical ML models and algorithms like DBSCAN and XGBoostClassifier** to scale the product to other countries across the EMEA region.
- Built and deployed robust **ML-powered pipeline in Spark using MLFlow**, enabling monthly updates on the high risk hotspots and tracking key metrics for continuous monitoring.
- Designed and implemented a **multi-lingual GenAI-powered RAG pipeline using GPT-4, OpenAI, LLM, LangChain, and vector DBs** to auto-generate human-readable observations and intelligent suggestions for the high-risk potential hotspots from Spark-enriched data, enabling non-technical stakeholders and customers to access actionable insights instantly and **reduce manual reporting effort by 70%**.

Apr'22-Sep'23: Data Scientist at Anko (Kmart Australia), Bengaluru

Highlights:

Customer Lapse Analysis | CLTV Model Implementation

- Created and implemented a Customer Lifetime Value (CLTV) model using probabilistic models, predictive analytics, and customer segmentation; this initiative led to a **13% recovery rate of churned customers** within the first month, **generating an additional AUD 200K in profit** and guiding retention strategies.

Product Quality Governance Tools | Cost Reduction

- Developed and deployed Product Quality Governance Tools using streamlit and Flask APIs to automate factory inspection processes; this innovation reduced man-hour costs, facilitated data-driven product quality audits, and minimized manual involvement and inspection errors.

Shrink Analysis | Supplier Performance Automation

- Automated a Shrink Analysis mechanism which enabled data-driven supplier return thresholds; **this boosted claim amounts by 40%**, improved product quality and streamlined the supply chain by removing manual negotiations between buyers and suppliers.

PREVIOUS EXPERIENCE

Mar'21-Apr'22: Data Scientist at Gramener Technology Solutions, Bengaluru

Aug'20-Feb'21: Associate Big Data Engineer at Celebal Technologies, Jaipur

Aug'17-May'19: Associate Engineer at Sears Holdings India, Pune

EDUCATION

- PG Diploma in Data Science Engineering from Great Lakes Institute of Management in 2020
- B.Tech./B.E. in Electronics & Comm. Engineering from University College of Engineering Rajasthan Technical University in 2016

PERSONAL DETAILS

Date of Birth: 26th March 1993

Languages Known: Hindi, English

Permanent Address: - Udaipur, Rajasthan

Current Address: - Bengaluru, Karnataka
