

Name: Arun Kumar M B
Email: mbarunkumar852@gmail.com
Contact: +91 9341066093

Address: # 614A/2, 20TH CROSS, 1st block R.T. Nagar, Bangalore: 560032.

Objective:

Seeking position to utilize my skills and ability in IT Infrastructure/ Data Center & Telecom Industry that offers security and professional growth while being resourceful, innovative, flexible & superior work ethics will add maximum value to the organization. Work for an organization that provides me with challenging opportunities and brings out the best in me.

Educational Qualification:

- EPGDM in Information Systems for Management from [Alliance University Bangalore.]
- Bachelor of Technology in Electronics & Telecommunication Engineering from [JRN Rajasthan Vidyapeeth University]
- Engineering Diploma in Electronics & Communication Engineering from [Board of Technical Examination Government of Karnataka.]

Languages Known:

- **Kannada** – Read & Write, **English** - Read & Write, **Hindi** Read & Write, **Tamil** - Speak & **Telugu** - Speak.

Professional Certification:

- ITIL V3 Certified.
- VMware Certified Professional - Data Center Virtualization 2022' VCP-DCV 7.0.
- Cisco DCUCI Cisco Certified Specialist in Data Center Unified Computing Support.
- CCNA [Cisco Certified Network Associate].

Skills:

- Excellent oral, written communication, interpersonal, logical & analytical skills.
- Working experience under ITIL process with good experience in Managing Data Center Network for operation, Administration.
- Experience in End-to-End IT Infrastructure management for Implementation, Operation, Maintenance & Capacity management,
- Experience in 24/7 Datacenter operations & handling Core Network, Aggregation, Access & Management OOB layers.
- Good knowledge in CISCO Network & Security, VMware virtualization [NSX, VCF, VCP] & EMC Storage Products.
- Good Experience in Dell Data center Products like Powerflex Rack & Appliance systems, VBLOCK, VxBlocks, VX Rails & VX Rack IR through Remote & onsite.
- Working Experience with Data center Nexus Switches, ISR Router, and ASR Routers, NCS 540,560 Routers, Cisco ASA Fire wall, F5 Load balancer, Cisco Fabrics & Cisco UCS etc.
- Working Experience with Dell, HP, IBM & Cisco Rack & Blade Servers configuration & maintenance.
- Experienced in Routing protocols like OSPF, ISIS & BGP ldp, Switching like STP RSTP & MSTP etc.
- Advanced Data center technologies like Leaf/TOR, Spine, Border leaf, DC - DR replication etc.
- Experience in ERPS, VRRP, GLBP, HSRP, VPC, Port channeling, bundling, port bonding NIC Teaming & Ether channeling etc.
- Experience Cisco automation tools like ACI, Cisco CNAAP & NOC APS for config automation.
- Good in analyzing root cause, identifying known errors or new errors & for code BUGS, coordinating actions to fix it permanently.
- Problem Trends and Planning and Driving Improvement Plan along with recommendations for improvements, Updating KEDB & Updating KB Articles.
- Ability to deliver presentations and convey design and Product Trainings to multiple audiences along with preparing documentation like LLD, HLD & Configurations files etc.
- Experienced in creating IR/FAR, managing pending trouble Tickets and update / clear / close the same.
- Experienced in ticketing tool like HPSM, Service now, CA Service Desk, Sales force, and OTRS & CA Spectrum Monitoring NMS system & also exposed to CA health for performance monitoring & capacity mgmt.
- Experienced in Incident, Problem & Change management experience for Network Operations.
- Identifying problems, analyze and recommend Operation Improvement plans with the possible SOP gathered from various technical teams, Management teams for BU & top Managements.
- Surveillance of Alarms from switching IT Infrastructure initial fault clearance activities, creation of Trouble Tickets and its assignment / escalation to the Circle team/ FM Rectification/ Vendor TAC.

- Tracking & closely monitoring the workflow of SCR's and Service Order to make sure the Customer Service delivery done within the committed SLA.
- Preparing weekly, monthly & quarterly reports & attending business meetings & progress reviews with top management.
- Excellent Co-ordination skills to handle ISPs, Government officials, project (Business, Supplier, Process Development and Change Management) & resolve any conflicts that arise within the team, vendor, business team, Service Delivery team.
- Ability to handle & manage field engineers, vendors & manpower management for project implementing, operations & make sure the Service Level Agreement are met.
- Experience in Material Procurement, Materials Management, Vendor billing, Quality Management, and Contract Management.
- Experienced in clarity OSS, like cross-connect, provisioning, trouble ticket generation/solving, Service Order & Work Order management.

Work Experience & Position held in the current Tenure:

1. Senior Network Engineer Data Center Infrastructure operation from March 2024 to till date at Norwin Technologies India LTD.

- Implementation, Integration & Support for Datacenters Products like Powerflex Rack & Appliance systems, VBLOCK, VxBlocks, VX Rails & VX Rack IR through Remote & onsite.
- Handled & owned responsibility of Network Operation & Maintenance for client Capital Group customer datacenter Environment as a Senior Residence Engineer/ SPOC for more than 3 Years.
- Implementing & supporting Datacenter Networking using Cisco products like IOS Routers, Switches, Nexus Family of Switches, and Cisco Unified Computing Systems & Cisco Virtual Switch Solution Nexus 1000v.
- Performance Re-Build of VBlocks System as per the required changes & RCM Upgrade at customer Data centers.
- Performing tests on the new products & providing necessary feedback before integration with existing system.
- Reviewing and Validating Customer Requirements, providing suggestions on amendments required before implementing the configuration on VBLOCK/VxBlock & VX Rack IR Systems.
- Reviewing the existing SOPs & suggesting changes based on the new product enhancement.
- Mentoring new team members & training them in understanding the process & procedure for new VBLOCK/VxBlock & VX Rack IR Systems.
- Providing Network support for VCE VBLOCK Data Center Network, UCS Compute Technical issues,
- Supporting 24/7 Network Support operation across globe like US Customer, middle east, EMEA Europe & Asia customers for Incidents, Alerts, Faults & new services provisioning service requests.
- Preparing & publishing daily, weekly, monthly & quarterly progress report & presentation & maintaining the SLA of each build also responsible for smooth shift handover, responding to global queries & managing trainings.
- Coordinating with Major Vendor like CISCO, VMware & EMC for part replacement & TAC Support also engaging Escalation Engineer, Engineering Team & Customer Advocate coordination.
- Supporting for D&I field team for new Implementation related issues for onsite Engineers.
- Creating a SOP & KB article for issue fixed along with procedures getting it approved by management & making it available for all support engineer & Achieving 90% of CSAT & providing on call support in weekends.

16. Data Center Network Lead, Data center Operation, Capacity Management & Implementation [March 2023 to March 2024 at Reliance JIO Infocom LTD.

- End to Managing Telecom Datacenter Operations, Expansion & Capacity Management for Network.
- Preparing Utilization report regularly & LLD & HLD changes, Understanding the reason for high utilization, Proposing & executing Port Bundling & Bandwidth augmentation, Adding New line cards & increasing ports availability.
- Proposing & executing new Aggregation, Access & Core Router integration, Link Shifting & cleaning up of unused Interfaces
- Resolving Tickets for DC & getting them closed within SLA, DC component's up for 24/7, Handling ISIS, BGP & ERPS issues
- Coordinating all stake holders CMPs, Backhaul, Fiber Planning Team for Fiber Readiness. & NH Teams.
- Coordinating Transport Team [SDH & DWDM] for Transport Readiness & Resolving Compliance Issues & Security breaches.
- Creating Change Request, Planed Events' & Executing CR's/PE's by coordinating with CMPs, JC Backhaul & CAB Approvals.
- Getting BGP & ISIS configuration, Creating MOPs/ SOPs, getting approval for the MOP from NPE NHQ for Guidelines
- Validate Nodal Design Documents & Revise NDD as per the change or replacement in Infra.
- Preparing configuration file available for field Engineers & Vendor for smooth Installation & commissioning with zero errors.
- Working towards keeping all Core Link utilization under norms of 50 percent & augment regularly as one requirement.
- Supporting NOKIA & CISCO Teams for smooth project executions for 5G Network implementation across Karnataka
- Keeping updated with regular components upgraded to the latest Version based on Release matrix.

17. IT Infrastructure, Data center Products Operation & Support from Sep 2014 to March 2023 at Dell Technologies.

- Implementation, Integration & Support for Datacenters Products like VCE VBLOCK, VxBlocks, VX Rails & VX Rack IR through Remote & onsite.
- Handled & owned responsibility of Network Operation & Maintenance for client Capital Group customer datacenter Environment as a Senior Residence Engineer/ SPOC for more than 3 Years.
- Implementing & supporting Datacenter Networking using Cisco products like IOS Routers, Switches, Nexus Family of Switches, and Cisco Unified Computing Systems & Cisco Virtual Switch Solution Nexus 1000v.
- Performance Re-Build of VBlocks System as per the required changes & RCM Upgrade at customer Data centers.
- Performing tests on the new products & providing necessary feedback before integration with existing system.
- Reviewing and Validating Customer Requirements, providing suggestions on amendments required before implementing the configuration on VBLOCK/VxBlock & VX Rack IR Systems.

18. Senior Network Engineer for Data Center Infrastructure Operations, Build & Expansion [UIDAI –AADHAR Govt of India from May 2012 to Sep 2014 at HCL Info system LTD.

- Responsible for providing 24/7 Infrastructure support under Network Operations & implementation for ensuring data center availability and reliability meet the requirements of data operations.
- Assist in maintenance and monitoring of all Data Center systems to include incidents/events, problems & change management
- Developed checks and balances for daily operations through a calendar/task matrix, allowing management to verify consistency and accountability quickly and easily for quality assurance.
- Performs analysis and diagnosis of highly complex networking problems in the Data Center Environment & capturing in Visio diagram for the network architecture and changes.
- Always actively involved in new projects discussion/establishing connectivity to new client's sites
- Designed and Installed enterprise WAN network, which is Redundant with automatic fail over capabilities to support growing data network. changes, monitoring, problem escalation/notification/resolution and all other aspects of Data Center support
- Data Center Health check Reporting information's about possible alarms for all equipment from Data Center, detailed information's and Rack density (% of cabinet and racks usage)
- Updating of all network design documentation for each project worked, ensuring accuracy, Provides updates of each implementation and cause/risk for success or failure.

19. Planning & Implementation of Metro Ethernet Network across Karnataka from March 2010 to April 2012 at Reliance Communications Ltd.

- Designing MEN networks for network rollout & customers' requirements & documenting the same. Providing feasibility for Broadband Business Solutions, Patch management such as IOS upgradation etc. as and when required.
- Responsible for IP/MEN network rollout & customers' requirements By Planning & Implementation of IP/MEN Telecommunications Network.
- Responsible for smooth deployment across the network for retail and corporate customers,
- Involved in IP Planning & Fiber planning of Access & Core MEN networks for Reliance Communications at Circle Level [Karnataka] & ensures the network availability as per the QMS.
- Prepare/Review Network Planning and Nodal Design Documents. Connectivity planning for high value customers based on inputs/projection of capacity requirements given by business team.
- Responsible for Installation, Integration, Configuration & Commissioning of IP Device's into live Network across Karnataka.
- Offering & getting it cleared for Acceptance Tests, hardware & software upgradations & end-to-end testing of links.

Declaration:

I hereby confirm that the information given above is true and accurate to the best of my knowledge.

Place: Bangalore.
