

ABDULKADAR BOHARI

Senior Network Engineer

abdulkadar.bohari53@gmail.com | 7738428753 | Bangalore, India

PROFESSIONAL SUMMARY

Results-driven Senior Network Engineer with 7+ years of progressive experience designing, securing, and optimizing enterprise-grade networks across data centers, banking, and government sectors. Deep expertise in routing protocols (BGP, OSPF), advanced switching (VLAN, VXLAN), next-generation firewall management (FortiGate, Palo Alto), and cloud security (Netskope, Cloudflare). Demonstrated success maintaining 99.9% uptime for mission-critical WANs, leading complex network migrations, and delivering scalable, secure infrastructure aligned with business objectives. Currently extending cloud and security expertise with AWS, Terraform, and SASE technologies.

CORE COMPETENCIES

- | | | |
|-------------------------------------|--|---------------------------------------|
| ◆ BGP / OSPF / Static Routing | ◆ Palo Alto / FortiGate / Panorama | ◆ AWS Cloud Infrastructure |
| ◆ VLAN / VXLAN / STP / EtherChannel | ◆ Netskope SASE / CASB | ◆ Terraform IaC |
| ◆ IPsec / SSL VPN | ◆ Cloudflare (CDN / DDoS / Zero Trust) | ◆ Wireshark / Network Troubleshooting |
| ◆ Cisco / Juniper / Huawei Devices | ◆ Vulnerability Assessment | ◆ JIRA / Incident Management |

PROFESSIONAL EXPERIENCE

Senior Network Engineer

July 2025 – Present

Blackline Systems

- Joined as Senior Network Engineer contributing to enterprise network architecture and security strategy.
- Leveraging advanced expertise in Palo Alto firewalls, Netskope SASE, Cloudflare, and AWS cloud networking.
- Implementing Infrastructure as Code (IaC) using Terraform for network automation and deployment pipelines.
- Designing and enforcing Zero Trust network access policies across cloud and on-premise environments.
- Collaborating with cross-functional teams to align network security posture with business and compliance requirements.

Senior Network Engineer

October 2021 – June 2025

ESDS Software Solutions

- Managed network operations and security for enterprise WANs serving 100+ clients, maintaining 99.9% uptime across a high-availability data center environment.
- Designed and deployed VLAN/VXLAN configurations enabling seamless server connectivity across 50+ nodes, reducing provisioning time by 30%.
- Administered FortiGate and Palo Alto next-generation firewalls; authored and enforced security policies including web filtering, IP filtering, and application control.
- Configured and managed IPsec VPN tunnels and SSL VPN gateways for secure remote and site-to-site connectivity for government and private sector clients.
- Led network assessments and audits to identify vulnerabilities, resulting in measurable improvements to security posture and compliance adherence.
- Troubleshoot complex Layer 2/3 issues including link failures, packet drops, and link flapping using Wireshark and performance diagnostic tools.
- Provided hands-on support for Cisco, Juniper, and Huawei network devices, ensuring optimal performance for data services.
- Coordinated with clients and internal teams to resolve critical incidents within SLA, maintaining high client satisfaction.

Network Support Engineer

May 2019 – October 2021

Nexapp Technology Pvt. Ltd.

- Served as primary network support contact, diagnosing and resolving LAN/WAN issues and minimizing business-impacting downtime.
- Configured and maintained SSL and IPsec VPN solutions for secure enterprise connectivity across multiple client sites.
- Managed Cisco routers and switches, implementing upgrades and proactive maintenance to enhance network reliability.
- Implemented structured network change management processes, reducing unplanned outages by improving documentation and runbooks.

Network Engineer Intern

January 2019 – March 2019

zCon Solutions

- Monitored network infrastructure health and performance, proactively identifying and escalating anomalies.
- Created and managed JIRA tickets for incident tracking; supported real-time network monitoring and basic remediation tasks.

TECHNICAL SKILLS

- **Routing Protocols:** BGP, OSPF, Static Routing
- **Switching & Overlay:** VLAN, VXLAN, STP/RSTP, EtherChannel
- **Firewalls & Security:** Palo Alto NGFW, FortiGate, Panorama, Web/IP Filtering, IPsec VPN, SSL VPN
- **SASE / Cloud Security:** Netskope (CASB, SWG, ZTNA), Cloudflare (CDN, DDoS Mitigation, Zero Trust Access)
- **Cloud Platforms:** AWS (VPC, Transit Gateway, Security Groups, Direct Connect), eNlight Cloud
- **Infrastructure as Code:** Terraform (network provisioning, firewall rule automation, cloud deployments)
- **Network Devices:** Cisco (IOS/IOS-XE), Juniper (Junos), Huawei
- **Troubleshooting Tools:** Wireshark, Layer 2/3 diagnostics, Performance Optimization, Log Analysis
- **Security Practices:** Vulnerability Assessment, Firewall Policy Management, Network Audits
- **Monitoring & ITSM:** Industry-standard NMS tools, JIRA, Incident & Change Management

CERTIFICATIONS

- CCNA – Cisco Certified Network Associate
- CCNP – Cisco Certified Network Professional
- PCNSE – Palo Alto Networks Certified Network Security Engineer

EDUCATION

B.E. (Electronics & Telecommunication)

June 2014 – July 2018

Trinity College of Engineering | CGPA: 60.19%

HSC (Higher Secondary Certificate)

April 2014

Poona College of Art & Science | 60%

SSC (Secondary School Certificate)

March 2012

K.R. Public School | 73.84%
