Adithya Hegde

Senior Business Analyst

Senior Business Analyst with 6+ years of experience in Banking, Financial Services, Retail, and IT, specializing in business analysis, stakeholder management, KPI reporting, dashboard development, and process improvement. Experienced in gathering business requirements, translating them into analytical solutions, and delivering actionable insights using SQL, Power BI, Tableau, Python, Advanced Excel, and Snowflake. Proven ability to collaborate with cross-functional teams, optimize business processes, automate reporting, and support data-driven strategic decision-making.

Experience

Aug 2024

LTIMindtree | Bangalore

Senior Business Analyst

- Collaborated with business stakeholders to gather, analyze, and translate business requirements into scalable BI solutions and executive dashboards.
- Designed and developed 12+ Power BI dashboards and KPI scorecards, enabling data driven decision-making and improving reporting efficiency by 25%.
- Analyzed large datasets using SQL, Snowflake, AWS Glue, and AWS S3 to identify business trends, operational bottlenecks, and performance improvement opportunities.
- Automated recurring business reports using Power Query and Advanced Excel, saving over 12 hours per week and improving reporting accuracy.
- Established data quality and validation frameworks, reducing reporting discrepancies by 18% and ensuring reliable business insights.
- Partnered with cross-functional teams to deliver analytical solutions, support UAT, and drive continuous process improvement initiatives.

04/2021 - 09/2023

Wells Fargo | Bangalore

Senior Data Management Analyst

- Collaborated with 20+ business stakeholders to gather, analyze, and document business requirements for 15+ process improvement initiatives, improving operational efficiency by 18%.
- Prepared 30+ Business Requirement Documents (BRDs), Functional Requirement Documents (FRDs), process flows, and user stories, ensuring 95% first-pass requirement approval.
- Conducted business process analysis and root cause analysis, identifying improvement opportunities that reduced process turnaround time by 22%.
- Partnered with technology, QA, and business teams to support 25+ User Acceptance Testing (UAT) cycles, achieving a 98% defect resolution rate before production deployment.
- Developed 20+ SQL queries and 10+ Power BI dashboards to monitor KPIs, SLA compliance, and operational performance, reducing manual reporting effort by 35%.
- Performed data validation and reconciliation on datasets containing 1M+ records, improving reporting accuracy by 99% and reducing data quality issues by 20%.
- Facilitated stakeholder workshops and requirement review sessions with cross-functional teams, reducing requirement clarification cycles by 30%.
- Supported Agile delivery by participating in sprint planning, backlog refinement, sprint reviews, and requirement prioritization across 12+ sprint cycles, contributing to 95% on-time project delivery.
