Adithya Hegde

Senior Business Analyst

Senior Business Analyst with 6+ years of experience in Banking, Financial Services, Retail, and IT, specializing in business analysis, stakeholder management, KPI reporting, dashboard development, and process improvement. Experienced in gathering business requirements, translating them into analytical solutions, and delivering actionable insights using SQL, Power BI, Tableau, Python, Advanced Excel, and Snowflake. Proven ability to collaborate with cross-functional teams, optimize business processes, automate reporting, and support data-driven strategic decision-making.

Experience

Aug 2024

LTIMindtree | Bangalore

Senior Business Analyst

- Working as a Business Analyst for Portland General Electric (PGE), partnering with business and technology stakeholders to deliver enterprise data and analytics solutions supporting strategic business initiatives.
- Gather and analyze business requirements, conduct stakeholder workshops, and translate business needs into BRDs, FRDs, user stories, and functional specifications.
- Collaborate with data engineering teams to design scalable data pipelines using Snowflake, SQL, AWS Glue, and AWS S3 for enterprise reporting and analytics.
- Perform data analysis, data mapping, source-to-target mapping, and impact analysis to support system enhancements and business transformation initiatives.
- Design executive dashboards and KPI reports using Power BI, enabling data-driven decision-making across business units.
- Support Agile ceremonies including backlog grooming, sprint planning, UAT coordination, and production deployments.
- Ensure data quality through reconciliation, validation, and defect analysis while coordinating with cross-functional teams to deliver high-quality business solutions.

04/2021 - 09/2023

Wells Fargo | Bangalore

Senior Data Management Analyst

- Collaborated with Capital Markets and Investment Banking stakeholders to gather, analyze, and document business requirements for securities trading, capital markets, and regulatory reporting initiatives.
- Prepared Business Requirement Documents (BRDs), Functional Requirement Documents (FRDs), process flows, use cases, and user stories supporting investment banking applications.
- Conducted business analysis across the complete trade lifecycle, including trade capture, trade validation, settlement, reconciliations, and post-trade reporting.
- Performed impact analysis and gap analysis for enhancements affecting fixed income, equities, derivatives, and securities processing platforms.
- Worked with traders, investment banking stakeholders, risk, finance, and technology teams to define functional requirements for strategic transformation initiatives.
- Supported UAT planning, test scenario preparation, defect management, and production releases for capital markets applications.
- Developed SQL queries to analyze financial datasets, validate trade data, reconcile securities transactions, and support business reporting.
- Built Power BI dashboards and MIS reports for trade monitoring, portfolio analytics, exposure reporting, and regulatory compliance metrics.
- Performed data lineage analysis, source-to-target mapping, and data validation to ensure high-quality financial data across enterprise systems.
- Participated in Agile ceremonies including sprint planning, backlog refinement, requirement prioritization, sprint reviews, and stakeholder demonstrations.
