

Overview

Dynamic technology executive with a robust focus on leading transformative IT initiatives, specializing in artificial intelligence, cloud solutions, and automation across diverse sectors. Aiming to leverage extensive experience in driving operational excellence and stakeholder engagement.

Aditi Tyagi

AI Program & Delivery Leadership | Portfolio Governance | Cloud & AI Transformation

Education

MCA

Mumbai University

Core Competencies

Strategic IT Planning & Leadership

Digital Transformation & Automation

IT Roadmapping / Enterprise Architecture

AI/ML Adoption / Service Delivery

Program Governance, Portfolio Management

Incident & Problem Management

Cloud, DevOps & Modern Engineering

C-Suite Engagement / SDLC Leadership

Client / Stakeholder Management

Cross-functional Collaboration

Financial & Business Management

Profile Summary

- **Seasoned IT leader** offering years of experience exceeding in the technology field, focusing on the oversight of extensive IT projects, especially in **artificial intelligence, cloud transformation, and automation** across multiple sectors.
- **Emerging technology practitioner** with experience in Generative AI, LLMs, RAG architectures, enterprise chatbot development, and ML workflows (TensorFlow, Pandas, EDA), enabling scalable automation and data-driven decision support
- Expertise in **ITIL-aligned service governance**, including end-to-end **Incident/Problem/Change Management, RCA, risk & controls, QMS compliance, and SLA/SLO-driven** performance management ensuring resilient and predictable service operations.
- Proven **Program & Portfolio Manager** skilled at E2E delivery execution, financial forecasting, benefits realization, RAID governance, roadmap planning, and cross-functional orchestration across engineering, security, compliance, and business leadership.
- **Strong project management, implementation skills** that have resulted in repeated success in guiding sizeable, cross-functional, multi-cultural & multi-geographical teams of over **XX** in the design and launch of leading-edge solutions and best practices.
- **Strong Value Stream and Business Operations leader** with deep capability in backlog prioritization, resource & capacity planning, cost optimization, vendor/partner oversight, and continuous improvement to maximize operational throughput.
- **Agile delivery champion** leveraging JIRA, Confluence, MS Project, and executive dashboarding to drive transparency, cadence discipline, and high-quality stakeholder communication.
- Hands-on with **cloud, application, and integration ecosystems**, including AWS cloud migration, infrastructure coordination, Java/JavaScript, API interfaces, and deployment pipelines, enabling informed technical decision-making.
- Proven capabilities in **engaging with clients & top management** for evolving strategic vision, driving change, infusing new ideas, implementing emerging technologies for the long run, and taking enterprise system performance & productivity to the next level.

IT Skills

- **Programming Languages:** Java, Python, C, SQL, JavaScript, TypeScript
- **Frameworks & Technologies:** Spring, Spring Boot, , Angular, Node.js
- **Observability:** Datadog, Grafana, Splunk, Dynatrace, ELK, Prometheus
- **AI & Automation:** LLMs, anomaly detection, predictive monitoring, RPA (UiPath, Python)
- **Cloud Platforms:** AWS (Glue, Redshift, Lambda, S3,AWS glue,Kenesis), Azure (App Insights, Log Analytics, Monitor), GCP (BigQuery, Pub/Sub, Cloud Monitoring,Vertex API)
- **Architecture & DevOps:** Microservices Architecture, DevOps, CI/CD, Docker, Kubernetes, Terraform, API Design
- **Messaging & Integration:** Kafka, REST
- **CRM & Enterprise Platforms:** Salesforce
- **Data Governance:** Lineage, metadata management, data quality, PII protection, regulatory compliance (SOX, GDPR, CCAR)
- **SRE Practices:** Incident triage automation, error-budget policies, SLA/SLO frameworks, AI-assisted runbooks, Datadog, Grafana, Splunk, Dynatrace
- **Leadership:** Stakeholder management, agile delivery, governance councils, risk & compliance alignment
-

Certifications

ITIL Foundation v3

AWS Solution Architect

Project Management Professional (PMP) Valid up to 2030

Certified Scrum Master

Big Data & Spark — Simplilearn

Alteryx Design Core

AWS Machine Learning Fundamentals

Work Experience

JP Morgan Chase & Co. | Vice President - Program Manager | Oct 2022 - Present

Responsibilities:

- ② **Directed end-to-end delivery of enterprise technology programs**, overseeing cross-functional development and support teams, program planning, budgeting, and executive-level KPI reporting.
- ② **Led agile backlog and multi-squad sprint governance**, ensuring prioritization aligned to business value, regulatory obligations, and platform resilience objectives.
- ② **Strengthened operational excellence** by governing incidents, changes, and risks through ITIL best practices, driving continuous stability and service hygiene improvements.
- ② **Managed multi-million-dollar value-stream financials**, including forecasting, actuals tracking, and budget stewardship to ensure optimal resource and cost alignment.

- ② **Collaborated with Finance, Audit, and Risk partners** to uphold compliance across resource charging, vendor invoicing, and mandatory security and control requirements.
- ② **Implemented robust program governance frameworks**, ensuring transparent delivery cadence, risk visibility, and alignment of engineering execution with strategic business outcomes.
- ② **AI transformation** Implemented AI-driven anomaly detection to proactively identify data quality issues, cutting reconciliation time by 30%.

Key Highlights:

- ② Successfully implemented a comprehensive AI automation initiative that resulted in a 12% increase in team productivity, significantly reducing the need for manual processes and enhancing overall operational efficiency.
- ② **Elevated application availability to 99.9%** by embedding SLO-driven monitoring, proactive alerting, and reliability-focused engineering practices.
- ② Reduced toil by 40% in RPA operations via targeted UiPath and AI automation
- ② **Cut incident resolution time by 25% and reduced alert noise by 30%** through targeted automation, intelligent triage, and data-driven operational insights.
- ② **Achieved a 40% reduction in engineering toil** by automating repetitive workflows and streamlining operational processes, significantly increasing engineering productivity.
- ② Developed and executed a strategic plan that improved stakeholder satisfaction scores by **30 %** demonstrating a commitment to delivering exceptional service and value to clients.

Larsen & Toubro Infotech | Associate Director - Program & Delivery Manager | Dec 2017 – Oct 2022

Responsibilities:

- ② **Directed large-scale AWS cloud migrations** for 27+ enterprise applications, driving planning, dependency orchestration, performance optimization, and post-migration stabilization.
- ② **Orchestrated end-to-end SDLC execution**—development through production support—across globally distributed Agile and ITIL teams of 100+ FTE.
- ② **Championed a DevOps operating model**, unifying engineering and operations to accelerate release velocity and reduce deployment failures.
- ② **Built executive-ready portfolio governance** through dynamic dashboards, RAG status reporting, RAID management, and enterprise change calendars.
- ② **Oversaw portfolio operations**, including SOW management, procurement, vendor invoicing, and rapid resource onboarding.

Key Highlights:

- ② **Cut cloud infrastructure spend by 20%** by implementing intelligent right-sizing strategies and forward-looking capacity forecasts.
- ② **Accelerated KYC/AML onboarding by 30%** through targeted automation that streamlined verification workflows and eliminated manual bottlenecks.
- ② **Delivered the Brexit transition program successfully**, re-architecting reporting and settlement platforms to meet dual EU/UK regulatory mandates without service disruption.
- ② **Boosted deployment success rates by 35%** through CI/CD automation, enhanced change governance, and adoption of containerized release patterns.
- ② **Reduced change failure rates by 25%** by embedding automated code reviews, quality gates, and standardized controls within GitLab pipelines.

Datamatics Global Services | Solution Architect | Mar 2017 – Dec 2017

Responsibilities:

- ② **Drove application design and solution architecture** for large-scale enterprise initiatives, ensuring alignment with strategic business objectives.
- ② **Partnered with cross-functional teams** to capture requirements, conduct feasibility assessments, and translate findings into precise technical specifications.
- ② **Architected end-to-end solutions** spanning UI, business services, integration, and data layers to ensure scalable, secure, and high-performance systems.

Key Highlights:

- ② **Improved system performance by 25%** by redesigning core architecture and eliminating key scalability constraints.
- ② **Won major UNICEF project engagements** by delivering compelling solution proposals, technical demonstrations, and value-driven architecture recommendations.

Capgemini Pvt. Ltd. | Lead Developer & Onsite Coordinator | May 2011 – Mar 2017

Responsibilities:

- ⌚ **Developed enterprise-grade Java applications** while leading onsite–offshore coordination across delivery teams and client stakeholders to ensure seamless execution.
- ⌚ **Governed change, deployment, incident, and escalation processes** across development and production environments to maintain stability and compliance.
- ⌚ **Elevated delivery quality** by conducting structured code reviews, driving knowledge transfer sessions, and leading defect triage to accelerate resolution and improve engineering rigor.

Previous Work Experience

Praxis System Pvt. Ltd. | Software Engineer | Oct 2010 – May 2011

Arion System Pvt. Ltd. | Software Engineer | Feb 2009 – Sep 2010

Webify Services Pvt. Ltd. | Software Engineer | Mar 2008 – Jan 2009
