PROFESSIONAL SUMMARY

Senior Network Engineer with 5+ years of experience across Cisco enterprise routing, switching, security, application delivery, and hybrid cloud networking. Operates as an L2 escalation engineer owning P1/P2 incident management and root cause analysis across OSPF, BGP, MPLS, Aruba, F5 BIG-IP LTM, Palo Alto, and Cisco ACI, with AZ-700 certification and active hybrid cloud networking exposure.

PROFESSIONAL EXPERIENCE

Senior Network Engineer | Accenture | Gurgaon

November 2024 – Present

- Maintained 95%+ SLA resolution targets by owning 2–3 P1/P2 escalations per week across routing and Layer 2 domains in a Cisco enterprise network of 800+ devices spanning 4 data centres.
- Execute 2–3 change requests per week spanning Cisco OSPF/BGP routing, Fortinet, Multicast, VLAN provisioning, F5/NetScaler load balancing, Azure network updates, and Cisco ACI fabric operations.
- Restored routing stability across enterprise core by diagnosing and resolving Cisco OSPF neighbour adjacency failures caused by hello/dead timer mismatches, MTU inconsistencies, area type conflicts, and LSA propagation issues, meeting P1/P2 SLA targets.
- Resolved BGP peering instability on enterprise edge routers by analysing neighbour state transitions, attribute manipulation, path selection issues, and next-hop reachability, restoring prefix advertisement within SLA.
- Prevented Layer 2 instability by troubleshooting STP topology changes and resolving VLAN inconsistencies across Cisco access and distribution switches, identifying root bridge issues and resolving loops to maintain network stability.
- Maintained high availability for 100+ production applications by managing VIPs, pools, nodes, persistence profiles, and SSL certificate renewals across F5 BIG-IP LTM and Citrix NetScaler load balancers.
- Manage Azure hybrid cloud network infrastructure including VNets, subnets, VNet peering, NSGs, UDRs, and Azure Front Door to support hybrid connectivity between on-premises and cloud environments.
- Collaborate with the cloud platform team to validate and implement Azure network changes, reviewing peering setups, NSG rules, and subnet configurations before production push.
- Perform Cisco ACI fabric operations including VLAN provisioning, EPG and Bridge Domain management, static port bindings, and L3Out subnet additions as part of routine data centre change management.
- Manage IPAM and DNS on Infoblox, handling IP allocation and resolving DNS conflicts to support server provisioning across the enterprise.
- Reduced repeat escalations by authoring detailed Root Cause Analysis (RCA) reports for all P1/P2 incidents, documenting findings and resolution steps to support knowledge management.

Network Security Engineer L2 | Genpact | Gurgaon

July 2022 – November 2024

- Delivered zero-downtime migration of 500+ IPsec tunnels from policy-based to route-based architecture, improving routing flexibility and reducing tunnel management complexity across the enterprise WAN.
- Designed and deployed IPsec Site-to-Site VPNs across multi-vendor environments using IKEv1, IKEv2, and PKI-based authentication for secure branch and partner connectivity.
- Built Cisco DMVPN Phase 2/3 networks using mGRE and NHRP to enable dynamic spoke-to-spoke communication across distributed branch sites.
- Configured OSPF over Cisco DMVPN tunnel interfaces for dynamic routing between hub and spoke sites, managing neighbour relationships, area design, and route propagation across the overlay.
- Built and maintained Palo Alto firewall policies and IPsec VPN configurations, including security profiles for URL filtering, data filtering, and file blocking.
- Executed Cisco IOS/IOS-XE firmware upgrades on edge routers during maintenance windows with zero unplanned downtime.

Network Engineer | Accenture (Payroll: 2COMS) | Remote

August 2021 – July 2022

- Managed Cisco access layer switching for a US retail branch network, configuring VLANs and access ports for POS and kiosk deployments at new store openings.
- Maintained PCI-DSS compliance across the retail network by configuring Port Security on Cisco access switches protecting credit card terminals.
- Monitored STP topology changes on Cisco access and distribution switches, identifying root bridge issues and resolving loops to maintain Layer 2 stability across branch sites.
- Configured HSRP/VRRP on branch routers for high availability gateway redundancy, ensuring service continuity during maintenance and link failures.
- Handled pre-go-live network readiness checks for new store deployments, resolving VLAN mismatches and duplex errors before launch.

Network Operations Engineer | JindalX | Remote

December 2020 – July 2021

- Provided 24/7 NOC monitoring and L1 fault isolation across a 100-device enterprise environment covering routers, switches, and WAN links.

- Performed L1 fault isolation for network outages, checking interface states, cabling, and IP reachability before escalating to L2 teams.
- Coordinated with ISPs and managed RMA cases for faulty hardware, following up on replacements to meet SLA timelines.
- Resolved end-user LAN, Wi-Fi, IP conflict, and VPN issues, maintaining complete incident management records in ServiceNow throughout the ticket lifecycle.

TECHNICAL SKILLS

Routing & Switching: Cisco BGP, OSPF, EIGRP, MPLS, TCP/IP, VLANs, STP/RSTP, EtherChannel, SVIs, HSRP/VRRP

Security & VPN: Palo Alto (Panorama), IPsec Site-to-Site, IKEv1/IKEv2, Cisco DMVPN Phase 2/3, Route-Based & Policy-Based VPNs

Data Centre: Cisco ACI (EPG, Bridge Domain, L3Out, Static Port Binding, Leaf Registration)

Load Balancing: F5 BIG-IP LTM (VIPs, Pools, Monitors, SNAT, SSL Offload), Citrix NetScaler ADC

Cloud: Microsoft Azure (VNETs, Subnets, NSGs, UDRs, VNet Peering, Azure Front Door, Hybrid Connectivity)

Platforms: Cisco ISR 4K, Cisco Catalyst 6500/3850/9300, Cisco Nexus (operational)

Tools: Wireshark, SolarWinds, LibreNMS, Infoblox, QRadar, ServiceNow, Confluence

EDUCATION

B.E. – Mechanical Engineering | Chandigarh University

August 2016 – August 2020

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) | Cisco ID: CSC014782709 | Valid through June 2029
- Microsoft Certified: Azure Network Engineer Associate (AZ-700) | Credential ID: A36679A7E493BAC8 | Valid through June 2027
