Senior Full Stack Developer (.NET + ReactJS) with 9+ Years of Experience

PROFESSIONAL SUMMARY

Senior .NET Developer with **9.11 years of hands-on experience** designing and developing scalable, high-performance web applications. Strong expertise in **C#, .NET Core, ASP.NET MVC, RESTful APIs, and SQL Server**, including query optimization and database performance tuning. Experienced in building responsive front-end solutions using **ReactJS** and integrating them with secure backend services. Proficient in **clean architecture, dependency injection, unit testing**, and Agile-based development practices.

TECHNICAL SKILLS

- **Backend:** C#, .NET Core, ASP.NET MVC, ASP.NET Web API, Razor Pages, ADO.NET, LINQ, Entity Framework, Microservices
- **Frontend:** ReactJS, JavaScript (ES6+), HTML5, CSS3, Bootstrap, jQuery
- **Database:** Microsoft SQL Server
- **Cloud:** Microsoft Azure
- **Reporting & BI:** SSIS, SSRS, Power BI
- **DevOps & Tools:** Git, GitHub, GitLab, TFS, Jenkins (CI/CD), Postman, Swagger, Docker
- **Code Quality & Security:** SonarQube, Checkmarx, BlackDuck
- **Methodologies:** Agile (Scrum), JIRA, Confluence

PROFESSIONAL EXPERIENCE

Globant India Pvt Ltd – Senior Software Developer (20th March 2026 – 14th July 2026)

Project: Academy Portal

- Developed AI-powered **Training Impact, Training Skill Extractor**, and **Glober Document Update** modules using .NET/C# and the **Mistral-Nemo AI API**.
- Designed and optimized LLM prompts to improve reasoning quality, reduce hallucinations, and produce structured JSON responses with matched skills, confidence scores, and detailed explanations.

Tech Mahindra Pvt Ltd – Senior Software Engineer (18th Sep 2024 – 20th Jan 2026)

Project: Aspireway Learning Continuum & Aspire4Education

- Designed and developed **scalable enterprise application modules** using **.NET Core, Razor Pages, and SQL Server**
- Worked on an **ASP.NET Core** application with a **microservice-based architecture**, where business capabilities such as **Student, Grading, Strategic**, and **System** were implemented as separate API services.
- Modernized legacy user interfaces by developing and enhancing **ReactJS-based UI components**, improving usability and responsiveness

- Built **reusable and maintainable React components** using effective state management, props handling, and client-side validations
- Integrated **React front-end applications with RESTful APIs**, ensuring efficient data exchange and optimized performance
- Improved UI performance by **reducing unnecessary re-renders**, optimizing API calls, and enhancing load times
- Managed deployment of **Aspire4Education REST APIs to Azure App Service**, including application publishing, environment configuration, and deployment validation.
- Designed and deployed **SSRS reports** to support business reporting and data-driven decision-making.

Worldpay – Senior Software Engineer (2nd Dec 2021 – 17th Sep 2024)

Project: Merchant Administrative System and Treasury Manager

- Developed and maintained **secure, high-volume payment processing modules** using **C#, ASP.NET Core, and RESTful Web APIs**
- Designed **resilient backend services** and implemented a **retry mechanism in Windows Services**, significantly improving transaction reliability
- Applied **Dependency Injection, Clean Architecture, and SOLID principles** to enhance system maintainability and scalability
- Optimized **SQL queries and backend workflows**, reducing response time and improving overall system performance
- Improved code quality by resolving **code smells** and enforcing standards using **SonarQube**
- Ensured **application security compliance** through static code analysis using **Checkmarx and BlackDuck**
- Collaborated with frontend and integration teams to define **API contracts, data models, and service interfaces**
- Provided **production support** by troubleshooting critical issues and delivering timely fixes for high-priority payment flows

Tata Consultancy Services – System Engineer (6th Feb 2019 – 29th Nov 2021)

Project: Wealth Management Intranet Portal

- Migrated legacy applications to **ASP.NET MVC** architecture
- Developed UI components using JavaScript, Bootstrap, and jQuery
- Created and optimized SQL stored procedures
- Participated in requirement analysis and testing

Figmd India Pvt Ltd – Software Engineer (14th Nov 2018 – 4th Feb 2019)

Project: Poc to create json file from Excel file

- Built APIs to convert Excel data into JSON for React applications
- Worked closely with frontend teams for UI integration

ITShastra India Pvt Ltd – Junior Software Engineer (5th May 2016 – 2nd Nov 2018)

Project: CoreLogic & Vendor Management System

- Developed ASP.NET web modules using **C#, ADO.NET, and SQL Server**
- Created SSIS packages to import and process large CSV and text data files
- Designed and deployed SSRS and Power BI reports for business analytics
- Built UI components using HTML, CSS, and jQuery
- Integrated reporting dashboards into web applications for data visualization
- Wrote and optimized stored procedures for large-scale data processing

EDUCATION

Bachelor of Engineering (Computer Science), VTU, 2015

CERTIFICATION

SAFe® Agilist Certified
