

Akash Kumar

SOFTWARE DEVELOPMENT ENGINEER

PROFILE SUMMARY

Backend engineer and systems architect with 10+ years building high-scale, event-driven services across eCommerce, AdTech, EdTech and Manufacturing. Experienced in shipping AI infrastructure and analytics pipelines — contributing to a hosted MCP server platform with an agentic AI router and control plane, and tiered query architectures (Postgres, ClickHouse, Trino) serving millions of events per day. Strong in Node.js, Go, PostgreSQL, Redis, Kubernetes and AWS; proven track record of turning ambiguous problems into measurable outcomes such as scaling platforms to 100M+ monthly page views and enabling analytics for 450+ brands.

WORK EXPERIENCE

Software Development Engineer

Gokwik Commerce Solutions

Mar 2024 - Jul 2026

- Cut orders-listing latency by designing a **tiered query architecture** routing reads across Postgres (last 4h), ClickHouse (4h—30d) and Trino (>30d) to keep dashboards responsive at multi-million-row scale.
- Drove Google's OAuth sensitive-scope production approval and implemented the per-merchant Google Analytics pipeline: ECS jobs pull GA → Kafka → Athena via Airflow — now serving **450+ brands daily**.
- Built platform foundations including RBAC middleware (allowPermission), token-scoped multi-merchant context switch with audit logging, and field-level PII encryption with key rotation for compliance.
- Designed Payment Aggregator onboarding (PayU, Easebuzz) with KYC, document verification and state-machine lifecycle — live with **1500+ merchants**.
- Contributed to the hosted MCP (Model Context Protocol) server platform and central agentic AI router; implemented control-plane features for tuning system messages, confidence thresholds, and execution-trace visualization.
- Built backend for *Kwik Intent*, a real-time shopper-intent classifier developed in a 24h internal AI hackathon; owned mock profile API and intent-engine integration with a cross-functional team.

Senior Software Engineer

R Systems

Jul 2022 - Feb 2024

- Owned Elink module work for the Panasonic-licensed PanaCIM MES suite, building external data-exchange channels (PanaXML, File-XML, CSV, DB, REST) for SMT shop-floor systems.
- Translated business requirements into SDS and UTC documents; implemented, unit-tested and drove features through regression and production rollouts.
- Investigated and resolved production incidents on customer deployments and partnered with QA on staged regression cycles.

Senior DevOps Engineer

US Tech Solutions

Apr 2021 - Jul 2022

- Managed multi-cloud infrastructure (AWS, Azure, DigitalOcean) and CI/CD across 40+ enterprise client environments, standardizing deployment playbooks and operational practices.
- Operated AWS ECS, Amplify, Jenkins and Nginx; mentored teammates on deployment hygiene, incident response and on-call rotations.

Software Developer

SilverEdge Technologies Pvt. Ltd.

Sep 2019 - Apr 2021

- Led migration of BetterButter from a Django monolith to Node.js microservices (User,

10 Years of experience

KEY SKILLS

- ✓ Node.js
- ✓ GoLang
- ✓ JavaScript
- ✓ TypeScript
- ✓ PostgreSQL
- ✓ MongoDB
- ✓ Redis
- ✓ Kafka
- ✓ AWS
- ✓ Kubernetes
- ✓ Docker
- ✓ React.js
- ✓ Event Driven Architecture
- ✓ Microservices
- ✓ Model Context Protocol (MCP)

ACHIEVEMENTS

Selected Achievements

Contributed to GoKwik's MCP platform with central agentic AI routing and control-plane tuning; built Kwik Intent intent-classifier in a 24h hackathon; designed tiered query architecture reducing dashboard latency; scaled CarToq to 100M+ monthly PVs and built push system serving 100K users/min.

EXTRA-CURRICULAR ACTIVITIES

Technical Presentations & Hackathons

Participated in internal AI hackathons (Kwikathon) and presented engineering solutions; built rapid prototypes such as the Kwik Intent shopper-intent classifier during a 24-hour event.

- Recipe, Community, Search, Video Generator) using Restify, Sequelize and Elasticsearch to support >20M visitors with improved performance.
- Delivered Shopify customizations and PDP UX for Birkenstock India and implemented performance and SEO improvements for client sites.
- Established GitLab CI/CD pipelines for automated deploys across services.

Back End Developer

Modestreet Internet Pvt. Ltd.

Feb 2019 - Sep 2019

- Designed and developed e-commerce admin panel in Laravel and microservices using a custom framework; responsible for database design, CI/CD and server management for a fashion marketplace with AR features.

Software Developer

Mindworks Global Media Pvt. Ltd. (CarToq.com)

Jul 2017 - Feb 2019

- Single-handedly scaled CarToq to **100M+ monthly page views** and 15M+ unique visitors; owned full stack, infrastructure and ad-monetisation.
- Implemented AMP across the site delivering measurable load-time and revenue lift.
- Built an in-house push notification system delivering to **100K users per minute** and integrated 30+ advertisers with header bidding, sustaining high QPS and Redis throughput (~750K reads/sec).

Software Engineer

Doyen Labs

Apr 2016 - Jul 2017

- Delivered client websites and web applications across multiple stacks; owned scoping, development and client communication for custom projects.

PROJECTS

BetterButter

578 Days

- Led backend team and technology planning for BetterButter, a cooking platform with ~100k recipes and videos.
- Migrated the product from Django REST monolith to Node.js microservices to address QPS and scalability issues; responsible for schema redesign, DevOps and server management.

BIRKENSTOCK

578 Days

- Delivered Shopify-based OMS and storefront work for Birkenstock India; implemented PDP swatch UI in vanilla JavaScript and custom search using Shopify Liquid templates.

BIGMUSCLES NUTRITION

578 Days

- Built and optimized a Shopify-based e-commerce platform with dynamic Liquid templates and performance improvements; integrated OMS services and speed optimizations.

Modestreet Fashion

212 Days

- Designed and developed e-commerce admin panel in Laravel and microservices using a custom framework; responsible for database design, CI/CD and server management for a fashion marketplace with AR features.

Featured Customers

123 Days

- Worked as Data Analyst for FeaturedCustomers.com, building capabilities for customer testimonials, case studies and related content workflows.
