

AKILASH P NAIR

Msc.IT graduate with a proven track record in **Back-end and Front-end Development**, targeting opportunities in **Software Development/Full-stack Development** preferably in Chennai, Bangalore, Remote or Hybrid.

09176761230 | akilashpnair02@gmail.com | Tamil Nadu, India | @akilash-p-nair-374698203

CAREER SUMMARY

- **Senior Full-Stack Engineer / Lead Developer** with **8+ years of experience** designing, building, and scaling high-performance web applications, data platforms, and Ai powered analytics systems.
- Strong expertise across **frontend, backend, data engineering and cloud-architecture**.
- Proven track record in **end-to-end ownership** of complex systems ranging from **frontend UI/UX to backend microservices & MVC API designs, ETL/ELT data pipelines, and cloud infrastructure**.
- Extensive experience working with **marketing and e-commerce platforms** such as **Shopify, Google Ads, Meta Ads, Amazon Ads, Klaviyo**, and building **analytics dashboards, reporting pipelines, and deep-link integrations**.
- **Managed a team of 5 UI developers**, while working as a **Sr. Software Developer/Full Stack Developer** at IResponsive solution.
- Collaborated in the **recruitment process by conducting interviews of new candidates**, exhibited leadership and interpersonal skills to assess their suitability for the role.
- Expertise in **implementing real-time monitoring and alerting mechanisms** and ensuring continuous compliance and data integrity.
- Excellence in ensuring a smooth transition during the data migration process, **maintaining the stability of production and QA environments**.
- Hands-on experience in preserving data integrity and system functionality throughout the migration, and **ensuring a reliable and efficient system post-migration**.
- Capable of offering suggestions for ongoing improvement & skilled in designing plans for stability, scalability, performance optimization & feature management.
- Extensive knowledge and exposure in Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications.

CORE COMPETENCIES

- Full Stack Development
- User Experience Design
- Scripting and Algorithm
- Data Engineering
- Database Management
- Responsive Design
- Performance Optimization
- Agile Methodology
- Data Migration
- Generative AI

TECHNICAL SKILLS

NodeJS | Python | ReactJS | AWS | GCP | Airflow | Kubernetes | Docker | Google ADK | ETL | Analytics

Programming Languages

JavaScript (ES6+), TypeScript, Python, PHP

Frontend Technologies

- React.js, Next.js
- HTML5, CSS3, SCSS
- State Management: Redux, Context API, React Query, Recoil
- Responsive Design, UI/UX Optimization

Backend & API Development

- Node.js (Express, NestJS)
- Python (FastAPI)
- RESTful APIs, GraphQL
- OAuth & Authentication Flows
- Serverless Architecture
- Core-Php(Homestead, Laravel)

Databases & Data Stores

- PostgreSQL, MySQL, MongoDB, DynamoDB, Amazon Redshift, BigQuery
- Data Modelling, SQL Optimization

Data Engineering & Analytics

- **Apache Airflow**, **Apache Spark**, ETL / ELT Pipelines

Cloud & Infrastructure

- **AWS**: Lambda, EC2, ECS, ECR, S3, DynamoDB, Redshift, Event-Bridge, SQS, SNS, Step-Function, Kinesis-Streams, Route 53, IAM, Secret Manager.
- **GCP**: GKE, BigQuery, Cloud Composer
- Docker, Kubernetes
- Serverless Framework

DevOps & CI/CD

- Docker, Kubernetes (GKE)
- CI/CD: GitHub Actions, Jenkins

Monitoring & Observability

Datadog, Grafana, AWS CloudWatch

Tools & Platforms

Git, GitHub, Jira, Swagger / OpenAPI, Zendesk, Redis Cache

Architectural & Engineering Practices

- Microservices & Event-Driven Architecture
- Domain-Driven Design (DDD)
- Scalable System Design
- Performance Optimization & Security Best Practices

EDUCATION AND CERTIFICATION

Master of Science in Information Technology (M.Sc.IT) | GKM College of Engineering and Technology,
Anna University

2017

WORK EXPERIENCE

Senior / Lead Full-Stack Engineer

Company: Invictus Data | Trilio AI Project

HSR Layout, Bengaluru | Aug 2025 – *Present | Hybrid

- Led the design and development of a **scalable analytics and data platform** integrating e-commerce and digital marketing sources.
- Built **frontend dashboards and admin portals** using **React.js, TypeScript**, focusing on performance, modularity, and UX.
- Developed **backend microservices and APIs** using **Node.js and Python (FastAPI)** with clean, domain-driven architecture.
- Designed and owned **ETL/ELT data pipelines** supporting **incremental and historical data ingestion**.
- Worked extensively with **PostgreSQL, Amazon Redshift, and BigQuery** for analytics-ready data modelling.
- Integrated **Shopify, Google Ads, Meta Ads, Amazon Ads, and Klaviyo** using secure **OAuth workflows**.
- Implemented **unified deep-linking** from analytics reports to third-party platform admin pages.
- Deployed systems on **AWS and GCP**, using **Docker, Kubernetes, CI/CD**, and observability tools.
- Acted as a **technical lead**, handling architecture decisions, code reviews, and mentoring.

Senior / Lead Full-Stack Engineer

Company: Invictus Data | Client Samsung | Dynamic Audience Generator (DAG) Project

SKCL Excellence, Chennai | Jan 2025 – July 2025 | Hybrid

- Worked on the **Dynamic Audience Generator (DAG)** platform to build and manage **data-driven marketing audience segments** at scale.
- Led a major **architecture revamp**, migrating DAG workloads from legacy compute to **cloud-native infrastructure on GCP**.
- Designed and implemented **containerized services on GKE**, improving scalability, fault tolerance, and deployment reliability.
- Refactored **backend services and data pipelines** to enable horizontal scaling, better resource utilization, and lower latency.
- Evaluated and recommended **alternatives to the Pilosa query framework**, analysing trade-offs in performance, scalability, cost, and operational complexity.
- Improved **audience query performance and flexibility** by redesigning data access patterns and aggregation strategies.
- Led a complete **DAG UI/UX revamp**, enhancing usability for audience creation, filtering, and validation.
- Executed a **React version upgrade**, improving frontend performance, maintainability, and developer experience.
- Refactored frontend code into **modular, reusable components** with cleaner state management.
- Collaborated with **data engineers, product teams, and Samsung stakeholders** to align technical solutions with business and marketing goals.

Senior / Lead Full-Stack Engineer (Client SSENSE)

Company: IResponsive Solutions | Client SSENSE | IMS, WMS, CS Application Development

Coimbatore | May 2022 – Nov 2023 | Remote

- Migrated data from **legacy AWS environments to domain-specific AWS accounts**, ensuring minimal disruption, strong data integrity, and reliable deployments.
- Designed and implemented an **automated auditing system** using **Datadog and Swagger**, enabling real-time monitoring, alerting, and compliance.

- Eliminated manual auditing workflows, significantly improving **operational efficiency and data accuracy**.
- Developed and maintained **Inventory Management (IMS), Warehouse Management (WMS), and Customer Support (CS)** applications.
- Built **scalable, high-performance systems** using **Node.js, React.js, TypeScript, PostgreSQL, DynamoDB, AWS, and Serverless Framework**.
- Performed continuous **system optimization and performance tuning** to ensure reliability and responsiveness.
- Coordinated with **cross-functional teams** to deliver seamless feature integrations across multiple systems.
- Reduced **stock discrepancies by 85%**, significantly improving inventory accuracy.
- Contributed to a **55% revenue increase** through enhanced inventory and warehouse management workflows.
- Improved system usability, achieving a **98% reduction in user errors** and **90% faster data access and processing**.

Senior Software Developer (SDE II)

Company: PaloAltoSoft Solutions | Clearspeak Project

Gurugram | May 2021 – Apr 2022 | Remote

- Engineered a **SaaS-based Twilio Programmable Voice application** using **Node.js, AWS Lambda, and Twilio APIs**.
- Built and optimized **IVR-based interview and questionnaire workflows** for the Clearspeak Interview Server Wrapper.
- Developed scalable backend services to support **automated voice-driven interviews** with high reliability.
- Integrated **AWS CloudWatch, Secrets Manager, and S3** to enhance system observability, security, and scalability.
- Implemented a full-stack solution using **Node.js, React.js, MongoDB, Twilio, and AWS Lambda**.
- Ensured **seamless integration with existing enterprise infrastructure** while adhering to strict **data privacy and compliance standards**.
- Optimized IVR performance to improve **response accuracy, latency, and system stability**.
- Eliminated manual interview scheduling, achieving a **95% increase in interview completion rates**.
- Reduced **maintenance costs by 70%** through efficient architecture and reuse of existing infrastructure.
- Collaborated closely with **cross-functional teams and client stakeholders** to deliver a production-ready, high-impact solution.

Full-Stack Developer

Company: Foodhub

DLF Cyber City, Chennai | May 2017 – Mar 2021 | Hybrid

- Revamped and maintained the **CRM ecosystem**, developing multiple applications to support customer engagement and internal operations.
- Designed and implemented **recurring SMS and Email campaign systems**, significantly improving customer communication and retention.
- Built **Twilio Programmable IVR applications** to streamline customer interactions and support software teams and reduced customer response times by **90%** through optimized IVR-based automation.
- Engineered **automation systems for Android app UI configurations**, eliminating manual setup efforts.
- Designed and implemented **Native App Sales and Billing automation**, ensuring accurate and seamless transactions.
- Worked across a diverse tech stack including **PHP, JavaScript, Node.js, React.js, MySQL, MongoDB, HTML5, CSS, Twilio, Plivo, AWS, Jenkins, and Git**.
- Collaborated closely with **product, support, and engineering teams** to deliver reliable, production-grade solutions.
