Technical Project Manager | Delivery Manager | Program Manager | PMP®, PSPO® | Agile Delivery | Cloud & Digital Transformation | BFSI, Insurance, Logistics & Retail

PROFILE SUMMARY

Accomplished Technical Project Manager / Delivery Manager with 17+ years of progressive experience spanning software development, technical leadership, project management, and enterprise software delivery across BFSI, Insurance, Retail, and Logistics domains. PMP® and PSPO® certified with expertise in Agile delivery, PMO governance, stakeholder management, vendor coordination, and global program execution across USA, UK, India, and GCC regions.

Proven track record of delivering enterprise software programs on time and within budget while improving delivery predictability through KPI-driven governance, RAID management, and Agile best practices.

Strong technical understanding of Java, Spring Boot, Microservices, AWS, Kafka, CI/CD, Terraform, and .NET, enabling effective collaboration with architects, engineering teams, and DevOps teams throughout the software delivery lifecycle.

Leveraging AI-powered productivity tools including GitHub Copilot, ChatGPT, and Claude to accelerate requirements analysis, user story creation, documentation, solution design discussions, code reviews, and overall delivery efficiency across Agile software programs.

CAREER SNAPSHOT

- Career progression from Software Developer / Software Engineer → Project Lead → Technical Project Manager → Delivery Manager
- Delivered enterprise software programs across Insurance, BFSI, Retail and Logistics with consistent focus on on-time delivery, quality and governance
- Managed cross-functional teams of 30+ members across Software Development, QA and DevOps, while collaborating closely with Product Owners and Business stakeholders.
- Led Agile, Scrum and Hybrid delivery programs with global stakeholders across USA, UK, India and GCC
- Strong technical background in Java, Spring Boot, Microservices, AWS, Kafka, CI/CD, Terraform, and .NET, enabling effective collaboration with architects, engineering teams, and DevOps teams throughout the software delivery lifecycle.
- Extensive experience in Project Governance, PMO, Risk & Issue Management, Budget Tracking, Release Management and Stakeholder Management

CORE COMPETENCIES

Technical Project Management | Program & Delivery Management | Agile & Scrum | PMO & Governance | Stakeholder Management | Vendor Management (RFP/SOW) | Risk, Issue & Change Management | Budget & Financial Management | Resource Planning | Release Management | Cloud Migration & Modernization | Cross-Functional Team Leadership

TECHNICAL STACK

Languages & Frameworks: Java, Spring Boot, Angular, TypeScript, JavaScript, C#, ASP.NET, ASP.NET MVC, Web API

Architecture & Integration: Microservices, REST APIs, Apache Kafka

Cloud & DevOps: AWS, Docker, Terraform, CI/CD (Jenkins)

Tools: Jira, Confluence, MS Project, ServiceNow

Databases: PostgreSQL, MySQL, SQL Server

Delivery Frameworks / Methodologies: Agile, Scrum, Kanban, Waterfall

Additional Exposure: Static code analysis (SonarQube)

AI & Productivity Tools: GitHub Copilot, ChatGPT, Claude (requirements analysis, documentation generation, user story creation, solution exploration, code assistance, and productivity acceleration)

PROFESSIONAL EXPERIENCE

Project Manager – Delivery | Cambridge Technology Enterprise Ltd (CTE WebApps)

Jul 2022 – Dec 2024

- Led multi-project Agile delivery across insurance and logistics portfolios, ensuring on-time and within-budget execution
- Owned end-to-end project delivery including scope, estimation, planning, execution, and release management across global programs
- Managed cross-functional teams of 30+ members across Software Development, QA and DevOps, driving effective team coordination and predictable sprint delivery

- Managed vendor relations by contributing to RFP evaluations and SOW definitions to ensure accurate project scope alignment
- Defined and implemented KPI dashboards (velocity, defects, burndown), enhancing delivery visibility and leadership decision-making
- Strengthened RAID and change management practices, reducing delivery risks and unplanned escalations
- Collaborated with stakeholders across USA, UK, India, and GCC, ensuring alignment on release goals, compliance, and priorities
- Chaired governance and steering meetings, ensuring transparent reporting, risk tracking, and stakeholder alignment
- Mentored project leads and Scrum Masters, driving Agile adoption and high-performance team culture
- Coordinated releases across multiple applications and environments, ensuring alignment between business, development, QA, and DevOps teams

Technical Project Manager | Tresbu Digital

Sep 2021 – Jul 2022

- Delivered Agile projects using Scrum, improving team velocity and sprint outcomes.
- Collaborated with product owners to refine backlog and reduce scope ambiguity
- Supported CI/CD improvements, reducing deployment issues and delays

Deputy Manager – Project Management | HCL Technologies

Dec 2019 – Aug 2021

- Managed end-to-end delivery of enterprise IT solutions for BFSI clients, overseeing planning, execution, governance, risk management, and stakeholder communication across multiple workstreams
- Led UAT governance and compliance readiness, ensuring full audit traceability and stakeholder alignment
- Developed governance templates for risk management, reporting, and KPI tracking across multiple client engagements
- Drove continuous improvement initiatives, reducing defect leakage and improving delivery quality

SELECTED PRIOR EXPERIENCE

- Associate Technical Lead | Softvision (Nov 2018 – May 2019) – Led delivery teams and developed backend services; contributed to architecture design and code reviews
- Technical Project Manager | ABCO InfoTech (May 2016 – May 2018) – Managed Agile delivery of web applications and supported architecture decisions
- Team Lead | TeamLease (Jul 2015 – Apr 2016) – Led delivery teams and built backend services
- Project Lead | HCL Technologies (Sep 2010 – Jun 2015) – Managed teams and developed enterprise backend systems
- Software Engineer | TASMEA IT Solutions (Jul 2006 – Sep 2008) – Developed backend and database-driven applications as a Software Developer
- Software Engineer | Cal-INFO (Aug 2005 – Jul 2006) – Built backend services and SQL-based applications as a Software Developer

Representative Project – Insurance Platform

Overview: Led the delivery of a microservices-based Insurance Platform integrating multiple business domains — Auth, Customer, Policy, Quote, and Document.

Tech Stack: Spring Boot, Kafka, PostgreSQL, AWS, Angular, Docker, Jenkins

Highlights:

- Led delivery of modular microservices with centralized authentication and API Gateway (Spring Cloud Gateway + Eureka)
- Integrated Kafka for event-driven communication, enabling real-time data synchronization across services
- Implemented audit logging, RBAC, and AWS S3 document storage for secure and scalable delivery
- Established structured sprint execution, governance reporting and release management practices
- Improved deployment efficiency through CI/CD-driven release processes
- Coordinated end-to-end delivery across Authentication, Customer, Policy, Quote, Document, and Notification services following Agile delivery practices

CERTIFICATIONS

- PMP® – Project Management Institute (PMI)
- PSPO™ – Scrum.org

EDUCATION

Bachelor of Computer Applications (BCA) – 2005
