Ganganagar, RJ

Summary

Experienced Full Stack Developer with a strong background in Python development using **Flask** and **Django**, and extensive expertise in modern JavaScript technologies such as **Node.js**, **NestJS**, **Next.js**, **React**, **React Native**, **Express.js**, and **MongoDB** for building dynamic, scalable web and mobile applications. Highly proficient in **React** for developing responsive and intuitive front-end interfaces. Skilled in data analysis and visualization with **Pandas** and **Matplotlib**, and experienced in **automation** using **Selenium**. Adept at **web scraping**, developing desktop applications with **PyQt5**, and building both **RESTful** and **GraphQL** APIs. Strong foundation in database management using **SQL** and **PostgreSQL**.

Experienced with cloud platforms including **AWS**, **Microsoft Azure**, and **Google Cloud Platform (GCP)**. Hands-on knowledge of **Docker**, **Kubernetes**, and **Nginx** for containerization, orchestration, and server configuration. Proficient in version control with **Git**, and skilled in front-end technologies including **JavaScript**, **jQuery**, **CSS3**, and **HTML5**. A collaborative team player and problem-solver, passionate about delivering high-performance, maintainable, and production-ready solutions.

Experience

Full Stack Developer

AIMLEAP • Bangalore, karnataka

02/2023 - Present

- Developed and maintained scalable web applications, resulting in a **30% improvement in performance**.
- **Developed and maintained scalable, high-performance web applications** using **Node.js** for backend services and **Next.js** for frontend interfaces, ensuring seamless integration and a smooth user experience across the full stack.
- **Designed and implemented RESTful and GraphQL APIs** using **NestJS**, enabling efficient and secure communication between client-side applications and backend services.
- **Utilized server-side rendering (SSR) and static site generation (SSG)** with **Next.js** to improve page load times, SEO, and overall application performance.
- **Deployed and managed applications** on cloud platforms like **AWS** or **DigitalOcean**, setting up **CI/CD pipelines** and ensuring reliable, automated delivery of updates and new features.

Lead Python Developer

Go-perceptive • Gurugram

04/2022 - 02/2023

- Designed and developed a scalable, **enterprise-level web scraping system** tailored for **Indian e-commerce platforms**, enabling automated extraction of pricing, availability, and product metadata across thousands of listings.
- Engineered robust scraping pipelines using **Python**, **BeautifulSoup**, **lxml**, and **Selenium**, handling anti-bot mechanisms, dynamic content, and CAPTCHAs.
- Implemented proxy rotation, user-agent spoofing, and throttling strategies to ensure long-term scraper reliability and IP protection.
- Integrated scraped data with **MongoDB** and **PostgreSQL**, supporting real-time analytics and competitive pricing dashboards.
- Automated scheduled scraping jobs using **cron** and **Celery**, processing millions of records daily with minimal downtime.

Lead Python Developer

Sataware Technologies • Chennai

04/2019 - 04/2022

- Developed and maintained scalable web applications using **Django** on the backend and **React** on the frontend, enabling seamless integration of RESTful APIs with dynamic user interfaces.

- Designed and implemented reusable, responsive UI components using **React**, optimizing performance and accessibility across modern browsers and devices.
- Built robust backends with **Django REST Framework**, handling complex business logic, secure user authentication, and third-party service integrations.
- Led full-stack development for internal tools and client projects, leveraging **Django**, **React**, and **PostgreSQL**, significantly reducing development turnaround time.
- Integrated **MongoDB** and **SQL/PostgreSQL** databases across microservices and monolithic systems, ensuring optimal data consistency and scalability.

Freelance Developer

Freelancer.com

04/2017 - 04/2019

- **Web Development:** Built responsive and dynamic websites using Django, React, and other modern frameworks.
- **Web Scraping:** Developed efficient web scraping scripts and solutions using Python libraries like BeautifulSoup, Scrapy, and Selenium.
- **Desktop Application Development:** Created robust desktop applications tailored to client needs.
- **Data Science and Data Analysis:** Applied data science techniques and tools for insightful data analysis and visualization.
- **Automation:** Implemented automation solutions to streamline workflows and increase efficiency.
- Achieved a 90%+ client retention rate through consistent delivery of high-quality work and excellent customer service.

Skills

Python, Node.js, ReactJS, Flask/Django, Data Analysis and Visualization, Pandas and Matplotlib, Browser Automation, Selenium, Software Development, PyQt5, Version Control, Git, Data Acquisition, Web Scrapping/Data Mining, SQL and Database, Scripting, API Development, Apache Server, Containerization: Docker, Cloud, AWS, Express.js, Node.js, JavaScript, JQuery, CSS3, HTML 5, English, CI/CD, Postfix mail server, MongoDB, React Native

Education

Bachelor's in Computer Applications

Jodhpur National University

01/2016

Awards

Team Player Q1 - 2024 - Aimleap, Achievement Award for the Flo Project - Aimleap

Projects

- Developed a complete web application for data scraping at [JustMetrically](#).
- Coded an Android application using **React Native** for custom sorting of scraped products for an Amazon seller in Argentina. Also developed a web-based **Flask** application.
- Coded and maintained a multi-million dollar revenue application for Sataware ([ClassyCompanies](#)).
- Created an image annotator web application at [labeller.apiscrapy.com](#).
- Collaborated with an IIT Delhi-funded startup, Medic, to create a **PyQt5 desktop application** for the controlled dispensing of hazardous chemicals.
- Developed a Python desktop application for monitoring remote employees at **31 West Services**, Bangalore.
- Integrated **Bold Sign API** into a commercial **Django** application to enable electronic signature functionality, ensuring a smooth document signing process for users.
- Developed a full-stack data scraping web app that reduced manual data entry time by **50%**, enabling efficient analysis of **millions of records**.
- Streamlined **Facebook marketing** by developing a **Selenium automation** project to automate messaging in groups and chats.
- Received the **Flo Project Achievement Award** for successfully scraping reviews data from multiple e-commerce platforms, overcoming challenges like captchas and anti-scraping techniques.

- Led the completion of the **Automated TV App Project**, improving team efficiency and formatting over **2 million data points** into JSON files.
- Developed the **AI Labeller Web App**, receiving positive feedback on design and functionality, and implemented robust algorithms for efficient data labeling.
- Conducted extensive **product data scraping** from platforms like **Shein.com** and others, overcoming **IP blocking** and extracting business information from databases with **millions of entries**.
- Scraped data for **horse betting analysis**, providing insights for informed decisions.
- Developed a fully automated **E-commerce data scraper** and managed **cron jobs** at **JustMetrically**.
- Coded a **PyQt5 desktop application** for **LinkedIn scraping** and data upload to **Google Sheets**.
- Scraped various **food delivery apps** using **Appium** for mobile scraping.
- Utilized backend APIs and deployed **Selenium Grid infrastructure** for efficient scraping of **Swiggy, Flipkart**, and other **inventory e-commerce data**.
- [Sealking](#) – Developed a **React** and **Django** application for machine learning-based model applications.
- [DegeneratesOdds](#) – Developed a **React** and **Django** application for **betting analysis**.
- [dev-user.foreoptics.com](#) – Developed a **Next.js** frontend and **NestJS** backend application for **supply chain** and **DAM score calculations**.
