

AKSHAY GUPTA

TECHNICAL LEAD | .NET | AZURE | REACT | FULL STACK

Gurgaon/Gurugram, India | +91-7520252426 | forakshaygupta01@gmail.com

PROFESSIONAL SUMMARY

Technical Lead / Senior .NET Engineer with 10+ years of experience delivering enterprise applications and cloud solutions using C#, .NET Core/.NET 8, ASP.NET Core, REST APIs, React and Microsoft Azure. Hands-on experience across full-stack engineering, Azure Functions and Durable Functions, Azure DevOps, CI/CD, SQL, application security, production troubleshooting and modernization. Currently working with a global Microsoft client environment, contributing to enterprise products including AutoRI and WSD Hub, with experience spanning feature delivery, integrations, cloud automation, security/compliance remediation and operational support.

CORE TECHNOLOGIES

Languages: C#, JavaScript

.NET / APIs: .NET 8, .NET Core, ASP.NET Core, Web API, REST APIs

Frontend: React, JavaScript

Azure: Azure Functions, Durable Functions, Azure DevOps, Key Vault, Blob Storage, Azure Resource Manager, Application Insights

Data: SQL, Cosmos DB, Azure Table Storage

DevOps / Automation: CI/CD, Git, PowerShell, ARM Templates, AzCopy, NuGet, Visual Studio

Security / Identity: Managed Identity, DefaultAzureCredential, MSAL, HSTS, application authentication, security remediation

Reporting / Monitoring: Power BI, DAX, Azure DevOps telemetry, Application Insights

PROFESSIONAL EXPERIENCE

Technical Lead | Wipro Limited | Jan 2022 – Present

- Work on enterprise solutions for a global Microsoft client across .NET, React and Azure, providing technical ownership for feature development, troubleshooting and engineering improvements.
- Develop and maintain C#/.NET services, REST APIs and React-based user interfaces for enterprise applications including AutoRI and WSD Hub.
- Build and support Azure Functions and Durable Functions workflows used in automation and private-packaging/job-processing scenarios.
- Contribute to Azure DevOps, CI/CD, ARM-based infrastructure automation and PowerShell-driven VM/job workflows.
- Worked on AutoRI private-packaging flows involving ASAP/DTP integrations, Azure Durable Functions, packaging VMs, Blob Storage and operational logging.
- Investigated and resolved Azure identity/authentication issues involving Managed Identity, DefaultAzureCredential, Key Vault access and application authentication.
- Contributed to .NET 6 to .NET 8 modernization and React/dependency upgrades while addressing compatibility and security impacts.
- Implemented and supported security/compliance improvements including HSTS, identity/access controls and remediation of high-severity security findings.
- Worked on S360/MISE compliance remediation, security vulnerability reduction and application hardening across enterprise workloads.
- Implemented telemetry improvements for job retry/status scenarios using Application Insights and supported Power BI reporting using Azure DevOps, enterprise data and telemetry sources.
- Collaborated with client stakeholders and distributed engineering teams to investigate production issues, deliver fixes, assess technical risks and improve reliability.

Senior Software Engineer | Tata Consultancy Services | Aug 2018 – Jan 2022

- Developed and supported enterprise software solutions using C#/.NET, APIs, SQL and Microsoft technologies for global clients.
- Worked through the complete development lifecycle including requirement analysis, implementation, defect resolution, testing support and production troubleshooting.
- Collaborated with distributed teams and stakeholders to deliver application enhancements and resolve complex technical issues.

Software Developer | Travstarz Holidays & Destinations Pvt Ltd | Jun 2016 – Aug 2018

Akshay Gupta | Technical Lead – .NET / Azure / Full Stack

- Developed and maintained business applications using C#/.NET and JavaScript-based technologies.
- Delivered application enhancements, defect fixes and integration changes while supporting day-to-day production needs.

SELECTED PROJECT & ENGINEERING HIGHLIGHTS

- AutoRI / Private Packaging: Worked on packaging workflows using Azure Durable Functions, PowerShell, packaging VMs, Blob Storage and AzCopy-based log handling.
- WSD Hub: Contributed to React-based enterprise UI development, security remediation, dependency modernization and application reliability improvements.
- Azure Identity: Troubleshoot authentication and authorization failures involving Managed Identity, DefaultAzureCredential, Key Vault and Azure application configuration.
- Security & Compliance: Addressed S360/MISE requirements, HSTS implementation and high-severity dependency/security findings while managing regression impact.
- Cloud Modernization: Contributed to .NET 8 migration, Azure-based application improvements and modernization of supporting dependencies and deployment workflows.
- Observability & Reporting: Added telemetry coverage for retry/status scenarios and built/maintained Power BI reporting using Azure DevOps, application telemetry and enterprise data.

EDUCATION

Master of Computer Applications (MCA), Computers | MIET | 2016

Bachelor of Computer Applications (BCA), Computers | Dewan Institute of Management & Studies | 2014

CERTIFICATIONS

- Generative AI Certifications – Level 1, Level 2 and Level 3

TARGET ROLES

Technical Lead | Senior .NET Engineer | Senior .NET/Azure Developer | .NET Full Stack Engineer | Lead Software Engineer
