SUMMARY

Finance professional with 3+ years of experience across investment operations, middle office, and derivatives trade support at global banks and fund administrators. Strong expertise in OTC derivatives, prime brokerage, NAV support, T+1 settlements, and end-to-end trade lifecycle management. Proven ability to analyze and resolve complex trade, cash, and position breaks, reduce operational risk, and drive automation-led efficiency improvements. Actively upskilling in Python, SQL, and Power BI to transition into data-driven investment operations and risk analytics roles.

CORE SKILLS

- & Middle Office & Fund Ops: Trade booking & validation, affirmation, lifecycle events, NAV support, pricing checks, cash & position reconciliation, break investigation, corporate actions, exception management, settlement processing, SLA adherence, operational risk controls
- & Products: TRS, IRS, CDS, Equity Swaps, Bonds, Repos, Equities
- & Tools: Triana, MarkitWire, IceLink, MS Excel (Pivot, VLOOKUP), Python (basic automation), SQL (basic), Power BI (basic)

PROFESSIONAL EXPERIENCE

Senior Associate – Fund Administration NAV Fund Administration, Jaipur | Dec 2024 – Present

- & Managed portfolio services for hedge fund clients, including trade mapping, cash flow identification, pricing validation, and daily cash & position reconciliations.
- & Verified OTC and fixed-income valuations (coupons, accruals, interest, independent price sources) and supported NAV production through position checks, exception handling, and break investigation.
- & Resolved trade, cash, and position breaks to ensure accurate T+1 reporting across weekly, bi-monthly, and monthly cycles.
- & Implemented automation of manual fund processing activities, achieving 30–50% reduction in processing time, and ensured accurate cash processing and reconciliation between internal books and bank statements.
- & Managed end-to-end Fund Administration activities for Hedge Fund clients including trade processing, cash & position reconciliation, pricing validation, and NAV support.
- & Performed trade enrichment, trade mapping, and pre-processing validation for OTC and Fixed Income securities prior to NAV production.
- & Executed daily trade processing, cash flow identification, pricing verification, and exception management across multiple portfolios.
- & Performed cash, position and trade reconciliations, investigated breaks, completed root cause analysis, and ensured timely resolution within SLA.
- & Supported trade lifecycle management from trade capture through reconciliation, settlement support, and reporting.
- & Performed pre-upload validation of trade and pricing data before fund accounting processing.
- & Processed bulk trade uploads and validated portfolio data to ensure accurate downstream processing.
- & Supported NAV validation, pricing checks, accrual verification, and exception handling for hedge fund portfolios.
- & Automated manual fund administration processes using Python, reducing processing time by 30–50%.
