- **ServiceNow Administration:** User & Group Administration, Roles, ACLs, Forms, UI Policies, Data Policies, SLAs, Notifications
- **ServiceNow Development:** JavaScript, Business Rules, Client Scripts, Script Includes, GlideRecord, GlideAjax, UI Actions, Flow Designer
- **Integrations:** REST APIs, SOAP APIs, Import Sets, Transform Maps, Integration Hub.
- **AI & Conversational Solutions:** Now Assist, Virtual Agent, NLU, AI-Powered Automation, Conversational Workflows
- **Reporting & Analytics:** Reports, Dashboards, Performance Analytics, KPI Tracking, Trend Analysis.
- **Platform Operations** Update Sets, Scheduled Jobs, Data Validation, Application Configuration, Troubleshooting.

EXPERIENCE:

Service Now Administrator (Freelance) **2025 - Present**

Project 1: ServiceNow ITSM Reporting & Performance Analytics – Freelance Projects

Project Description: Implemented Reporting and Dashboard capabilities in ServiceNow to standardize KPI tracking, SLA monitoring, and request fulfilment visibility across regional teams. Enabled operational teams and management to monitor ticket trends, aging, and workload distribution through interactive dashboards.

Roles & Responsibilities:

- Designed interactive dashboards and custom ITSM reports for Incident, Service Requests, and Request Fulfilment performance.
- Built trend and SLA compliance reports using Report Designer and dashboard widgets.

- Created report sources and database views for cross-table reporting across Incident, Task, SLA, and User tables using dot-walking.
- Automated scheduled KPI report sharing and implemented role-based access to dashboards.
- Analysed ticket data to identify bottlenecks and improvement areas in request workflows.
- Performed data validation and root cause analysis to ensure reporting accuracy.
- Provided user training and created knowledge articles for effective dashboard and report usage.
- Supported UAT and post-go-live by resolving reporting enhancements and defects.

HDFC Bank, Bangalore — ServiceNow Developer

April 2022-October 2023

- Developed and customized ServiceNow solutions using Business Rules, Client Scripts, Script Includes, GlideAjax, and server-side/client-side scripting to automate business processes.
- Designed and enhanced Flow Designer workflows, Service Catalog Items, Catalog Client Scripts, and request fulfilment processes to streamline user requests.
- Built and maintained custom applications, forms, modules, and platform configurations based on business requirements.
- Implemented REST/SOAP integrations, Import Sets, Transform Maps, and data migration solutions to enable seamless communication with external systems.
- Performed testing, debugging, troubleshooting, UAT support, and deployment through Update Sets, while working closely with administrators, stakeholders, and IT teams.

Impact & Achievements:

- Improved workflow automation efficiency by reducing manual effort through optimized scripting and Flow Designer workflows.
- Enhanced system integration reliability using structured REST/SOAP APIs with error handling mechanisms.
- Improved request fulfilment speed by streamlining catalog workflows and automation logic

ICICI BANK, Bangalore – ServiceNow Developer

January 2019-March2022

- Managed ServiceNow platform administration including user creation, role assignment, group management, and ACL-based access control to ensure secure user access.
- Configured and maintained tables, forms, UI Policies, Data Policies, dictionary entries, and field validations for ITSM modules (Incident, Problem, Change, and Service Requests).
- Administered Service Catalog, Record Producers, notifications, SLAs, reports, and dashboards to improve service delivery and operational visibility.
- Supported instance maintenance, upgrades, troubleshooting, deployments using Update Sets, and production issue resolution to maintain platform stability.
- Collaborated with stakeholders to gather requirements, implement system enhancements, and ensure alignment with ITIL best practices and banking compliance standards.

Impact & Achievements:

- Improved SLA tracking accuracy by optimizing dashboards and automating KPI report generation.
- Reduced manual reporting effort by implementing automated scheduled reporting mechanisms.
- Enhanced incident visibility with KPI dashboards and trend reports.
