EXPERIENCE

Product Owner / Infogain - Pune, Maharashtra

04/2021 - Current

- Analyzed and prioritized global/regional change requests, ensuring alignment with business objectives and enterprise architecture.
- Elicited, validated, and documented business requirements, user stories, process flows, and acceptance criteria.
- Led impact assessments across payment systems, identifying dependencies, risks, and downstream impacts.
- Defined MVP scope and managed product backlog to deliver high-value, cost-effective solutions.
- Collaborated with business, operations, compliance, architects, and technology teams to design and deliver regulatory and business-driven changes.
- Facilitated requirement workshops, stakeholder reviews, and solution walkthroughs across global teams.
- Supported SIT, UAT, and production validation by reviewing test scenarios, resolving requirement-related queries, and securing stakeholder sign-offs.
- Ensured operational readiness by assessing impacts on investigations, reconciliation, billing, monitoring, controls, and reporting processes.
- Drove operational efficiency improvements through enhanced Straight-Through Processing (STP) and process optimization.
- Managed post-implementation support, issue resolution, and hypercare activities to ensure successful production rollout.
- Acted as a liaison between business and technology teams, ensuring seamless delivery across the change lifecycle.
- Promoted continuous improvement in requirement management, testing, defect resolution, and delivery processes.

- NICE Performance Management (NPM) is an enterprise workforce engagement solution that empowers contact center teams by combining real-time insights, agentic AI, and gamification. It personalizes employee coaching and drives continuous performance improvement at scale. [1, 2, 3, 4, 5]

Roles & Responsibilities

- Managed and prioritized the product backlog to ensure delivery of high-value features aligned with business objectives and customer needs.
- Continuously monitored product performance, identified improvement opportunities, and drove enhancements to optimize user experience and business outcomes.
- Gathered and analyzed customer feedback, market insights, and stakeholder inputs to define product enhancements and prioritize future initiatives.
- Guided and mentored team members on Agile principles, Product Owner responsibilities, and best practices to improve team effectiveness and delivery quality.
- Collaborated closely with development teams to design and deliver customized solutions, applications, and tracking mechanisms that met client requirements and business goals.
- Acted as a bridge between business stakeholders and engineering teams, ensuring clear communication of requirements, priorities, and acceptance criteria.
- Facilitated Agile ceremonies, including backlog refinement, sprint planning, reviews, and stakeholder demonstrations, to support successful product delivery.

Scrum Master and QA / NICE Systems India - Pune, Maharashtra

07/2015 - 07/2019

- Facilitated Scrum framework - sprint planning, backlog grooming, daily scrums, sprint reviews, and sprint retrospectives.
- Conducted daily stand-up meetings, sprint planning sessions, and sprint reviews, ensuring effective communication among team members.
- Developed custom Scrum boards for better task tracking and transparency within the team.
- Collaborated with Product Owners to refine requirements and ensure alignment with business goals.
- Worked closely and listened to team members' feedback to identify issues and resolve conflicts.
