

AMRIKA BHATTACHARJEE

bhattacharjee.amrika2@gmail.com | +91 9436926994

With 8+ years of experience in Business Analysis and client solutioning, seeking a Senior Business Analyst role where I can apply my analytical thinking, stakeholder engagement, and problem-solving abilities to deliver impactful outcomes for the organization.

SSYNOPSIS

- 8+ years of experience in Business Analysis and transformation initiatives within the Banking and Financial Services domain.
- Gather and document business and system requirements using BRDs, FRDs, user stories, use cases, and process flows.
- Collaborate with business users, stakeholders, and technology teams to define solutions, conduct gap analysis, impact assessment, and support business transformation initiatives.
- Proficient in leveraging Microsoft Copilot for MoM preparation, email drafting, BRD/FRD documentation, requirements analysis, and productivity enhancement.
- Experienced in Agile (Scrum) and Waterfall methodologies, actively participating in sprint planning, backlog refinement, daily stand-ups, sprint reviews, retrospectives, and UAT activities.
- Domain knowledge of Trade Lifecycle processes including Order Initiation & Execution, Risk Management, Clearing & Settlement and Reconciliation.
- Knowledge of derivative instruments such as options, futures, and swaps, including their valuation concepts and application in risk management.
- Create business documentation, screen mock-ups, training materials, and stakeholder presentations while ensuring traceability and compliance with business requirements.
- Understanding of Market Risk concepts, including Interest Rate Risk, Foreign Exchange (FX) Risk, Commodity Price Risk.
- Good understanding of MTM valuation, margin call processes, and their role in monitoring trading exposures and collateral requirements.
- Familiar with VaR methodologies (Historical Simulation, Delta-Normal, and Monte Carlo), and Basel I, II & III regulatory frameworks for risk measurement and capital adequacy.
- Knowledge of Capital Market concepts, including Primary Market, Secondary Market, and Money Market operations.

SKILLS & COMPETENCIES

- **Project & Pursuit Governance:** JIRA, MS Visio
- **MS Office & Data Management:** MS Excel, MS Word, Outlook
- **Database Querying & Analysis:** SQL

PROJECTS UNDERTAKEN

PROJECT # 1

Trade Risk & Compliance Platform

Client: Adelaide Bank

Team Size: 10

Role: Senior Business Analyst

Responsibilities

- Worked with business stakeholders to understand their trading and risk requirements and prepared BRDs and FRDs capturing Business Objectives, Scope, Functional Requirements and Assumptions.
- Gathered raw requirements through interviews, workshops and review of existing documents to build a strong foundation for solution design.
- Fed stakeholder notes and raw requirement inputs into Microsoft Copilot to generate structured BRDs, FRDs, User Stories, Epics, Tasks, Test Cases, MoM and Business Emails, improving documentation speed and accuracy.
- Created process flow diagrams to show the difference between current state and future state to help the team make better decisions.
- Followed Agile and Scrum methods including Sprint Planning, Backlog Grooming, Daily Standups and Retrospectives and ran user story workshops with Story Point discussions to estimate effort.
- Applied knowledge of Derivative Instruments such as Futures, Forwards, Options, Interest Rate Swaps, Credit Default Swaps, Currency Swaps, FX Swaps and Debt-Equity Swaps to support trading and business requirements.
- Good understanding of Option Greeks such as Delta, Gamma and Theta and how they are used to measure price sensitivity in derivatives.
- Worked on Credit Valuation Adjustment (CVA) to measure and manage counterparty credit risk exposure across trading portfolios
- Prepared Risk Management reports using Historical VAR, Delta Normal VAR and Monte Carlo Simulation VAR to help the business understand their market risk exposure
- Worked on Interest Rate Hedging and Currency Hedging to help reduce market risk across trading portfolios
- Tracked Counterparty Risk by working on Credit Exposure, Expected Exposure and Potential Future Exposure to keep default risk under control.
- Used Beta, Alpha and Standard Deviation to carry out risk analysis and support the team in making better portfolio decisions.
- Ensured all regulatory compliance requirements including Basel III rules such as Liquidity Coverage Ratio (LCR) reporting were captured and built into the solution.
- Involved in all stages of testing including test planning, writing and reviewing test cases for UAT and Regression Testing, executing tests and tracking defects in JIRA.
- Raised defects in JIRA with clear descriptions, set priority levels, assigned them to the right team members and tracked them until closure.
- Analyzed production issues, prepared Change Request documents and ensured fixes were tracked and deployed successfully.
- Conducted client demos of system enhancements and prepared user training manuals to support smooth adoption across business users.
- Attended weekly meetings with the development team to discuss and close open technical issues on time.

PROJECT # 2

ReconPro

Client: Merkur Privatbank

Team Size: 12

Role: Senior Business Analyst

Responsibilities

- Collaborated with clients and stakeholders to elicit, analyze, and document business and functional requirements, translating them into detailed SRS, FRS, and other key project deliverables.
- Compared current and future state reconciliation processes through Gap Analysis and documented findings to support solution design.
- Broke down business needs into clear functional requirements, discussed priorities with business owners and ensured everything was agreed before each sprint.
- Worked on reconciling general ledger and sub ledger month end balances using ReconPro and contributed to the out of proof functionality which helped the business sign off on ledger accounts.
- Checked stock positions daily to ensure numbers matched across all systems and raised any mismatches for quick resolution.
- Investigated recurring reconciliation breaks, identified root causes and helped reduce the number of breaks over time.
- Defined match rule logic in the system to accurately match month end balances across sub ledgers and reduce reconciliation breaks.
- Worked with developers to schedule and automate data feeds through Business Objects to ensure data was available on time for month end reconciliation
- Organised sessions with the reporting team to build matched and unmatched reports for business users to track reconciliation outcomes.
- Broke down requirements into Epics, User Stories and Tasks and estimated effort through Story Point discussions with the team.
- Ran Sprint Planning and Daily Scrum sessions to keep the team on track and resolved blockers quickly to avoid delays.
- Worked with the testing team to write and run test cases to ensure reconciliation results were accurate and complete.
- Logged bugs and risks in JIRA, set priority levels, escalated to stakeholders and tracked until closure.
- Sent regular progress updates to senior management highlighting what was completed, what was pending and any decisions needed.

PROJECT # 3

Equity Trading System

Client: Barrenjoey Capital

Team Size: 12

Role: Senior Business Analyst

Responsibilities

- Engaged with business stakeholders to understand their trading and settlement needs and prepared BRDs and FRDs covering functional specifications, business rules, system interactions and acceptance criteria
- Good understanding of the Securities Trade Lifecycle from Order Initiation and Execution through to Affirmation, Confirmation, Clearing and Settlement across Equity and Bond instruments in Capital Markets
- Played an active role in Clearing and Settlement requirements covering pay-in and pay-out of funds and securities and net obligation calculations between counterparties
- Worked closely with SMEs to capture margin calculation rules for Equities, Futures and Options and wrote them up as functional requirements for the development team.
- Documented MTM valuation requirements to ensure the system correctly revalued open positions on a daily basis
- Captured Margin Call requirements including initial margin, variation margin and collateral management to ensure threshold breaches triggered accurate and timely margin calls in the system

- Picked up production issues, raised Change Requests and followed each fix through to successful deployment
- Tracked defects in JIRA with full details, assigned priority and severity and chased closure with the relevant teams
- Drove UAT by sitting with business users to walk through test scenarios, validate outcomes and get sign off before go-live
- Ran Regression Testing checks to confirm that new changes did not break any existing system behaviour
- Walked clients through new features via demos and put together training manuals to help users get up to speed quickly
- Held Daily Stand-ups to catch blockers early and keep the team moving towards sprint goals
- Used burndown charts to track sprint delivery and kept stakeholders informed on progress and any emerging risks

EDUCATIONAL QUALIFICATIONS

- Master's in Business Administration – MS University, 2012
- Master's in Healthcare Administration – Amrita Vishwa Vidyapeetham, 2010
- B. Sc (Hons)-Med BioTechnology – Amity University, 2008

TRAININGS & CERTIFICATIONS

- Certified Scrum Master
- Project Management – by PMI

I hereby certify that all the information provided above is true to the best of my knowledge.
