## Enterprise Voice Architect | Operations Management | VOIP Infrastructure Operations

VOIP Network Solution Architecture | Delivery Operations | Process Operations & Implementation | Cloud Technology Services | User & Vendor Management | Stakeholder Management | Maintenance and Support | Team Building and Management | Automation

### Techno-Commercial Professional | 19+ Years of Expertise in Technical Solutions & Strategy

Results-oriented professional with over 20+ years of experience in VoIP, IP Telephony & Cloud applications in UC and CC and aligning technical solution strategies with business objectives to enhance value propositions. Proven ability to develop innovative, high-level designs (HLDs) for advanced services and offerings, with expertise in Data and Voice Networks. Adept at IT governance, organizational modelling, and outsourcing, with a history of crafting technical solutions precisely tailored to customer needs through in-depth requirement analysis, complex issue resolution, and scalable solution proposals.

Skilled in developing HLD solutions and cost estimations for diverse projects—ranging from straightforward initiatives to complex, long-term engagements—regularly exceeding client expectations and addressing key business challenges. Known for a powerful combination of technical insight and business acumen, consistently driving impactful strategies with cost-effective, high-performance IT infrastructure and applications. Comprehensive expertise across IT domains, including Network Infrastructure Management, underpins a track record of value creation and successful project outcomes.

### CAREER HIGHLIGHTS

- ➔ Excelled in understanding intricate client landscapes and planning strategic solutions to enhance service quality.
- ➔ Expert level proficiency in implementing and supporting MS Teams, Avaya Contact Center (CC), Genesys Pure Engage & Genesys Pure Cloud solutions.
- ➔ Achieved operational excellence and fostered a results-driven culture through effective leadership in operations and people management, consistently delivering measurable outcomes.
- ➔ Demonstrated strong leadership, interpersonal, and team-building capabilities, contributing to high-performing teams. Leveraged a diverse techno-commercial background to streamline resource management, optimize processes, and drive operational efficiency.

### CORE COMPETENCIES

- ➔ **VoIP Architecture Design** (SIP, ISDN, IP PBX, Audio Codes SBCs)
- ➔ **Network Infrastructure** (LAN/WAN, SDN, Firewalls, QoS, MPLS, BGP, Load Balancer)
- ➔ **Unified Communications** (Cisco Call Manager, Avaya, Microsoft Teams, Genesys, Zoom)
- ➔ **Software/Tools** (Cisco Call Manager, Avaya Communication Manager, MS Teams, Grafana, Raspberry Pi, Solar Wind)
- ➔ **Project Management** (Stakeholder Engagement, Budgeting, Scheduling)
- ➔ **IT Governance & Compliance** (ITIL, ISO, Data Security)
- ➔ **Technical Solution Strategy** (HLD/LLD, Requirement Analysis, Optimization, Cost Optimization)

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                  |                            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>BlackBox, Bangalore</b>                                                                                                                                                                       | <b>July 2025 - Present</b> |
| <b>Principal Consultant</b>                                                                                                                                                                      |                            |
| ➔ Led end-to-end technical engagements for VoIP, UCaaS, and Contact Center solutions across Avaya, Genesys, Zoom, and Microsoft Teams platforms for enterprise clients.                          |                            |
| ➔ Engaged with customers to discover business and technical requirements, assess existing telephony environments, and translate needs into scalable voice, video, and omnichannel architectures. |                            |
| ➔ Architected secure, high-availability VoIP solutions including SIP trunking, PBX, SBCs, IVR, call routing, QoS, redundancy, and disaster recovery aligned to business goals.                   |                            |
| ➔ Designed and delivered cloud, hybrid, and on-prem UC/CC solutions, including Avaya Aura, Genesys Cloud/CX, Zoom Phone, and Teams Phone, ensuring performance and compliance.                   |                            |
| ➔ Produced HLD/LLD, call flows, network diagrams, BOMs, and cost estimates, ensuring alignment with customer budgets, regulatory standards, and enterprise architecture guidelines.              |                            |
| ➔ Led RFP/RFI/RFQ responses, technical workshops, solution presentations, product demos, and proof-of-concept (PoC) validations to demonstrate solution value and feasibility.                   |                            |
| ➔ Collaborated closely with sales, delivery, product, and partner teams to develop competitive proposals, pricing strategies, and value propositions that improved win rates.                    |                            |
| ➔ Integrated VoIP and UC solutions with enterprise applications and CRMs such as Salesforce, ServiceNow, Dynamics, and custom APIs to enable seamless business workflows.                        |                            |
| ➔ Advised customers on network readiness, bandwidth planning, security, regulatory compliance, and legacy PBX migration strategies to modern cloud or hybrid platforms.                          |                            |

- ➔ Drove deal success and revenue growth through strong technical storytelling, continuous enablement, identification of upsell/cross-sell opportunities, and adoption of next-generation features such as AI, analytics, recording, and workforce engagement.

Hewlett-Packard, Bangalore

April 2021 – June 2025

Sr Global VoIP Solution Architect

- ➔ Spearheaded the design, development, and deployment of global VoIP Network Solutions for multinational clients, ensuring seamless alignment with business objectives, budget constraints, and technical prerequisites.
- ➔ Fostered collaboration with cross-functional teams to elicit requirements, devise architecture, and execute VoIP Network Solutions harmonized with organizational goals.
- ➔ Engineered scalable and resilient VoIP networks leveraging cutting-edge technologies like SIP, VoIP, PBX, and cloud-based platforms.
- ➔ Led the migration of legacy on-premises telephony systems to Microsoft Teams Cloud Voice, leveraging AudioCodes Session Border Controllers (SBCs) for secure and seamless integration.
- ➔ Planned and designed global connectivity between Contact Centers, remote users, and Genesys AWS regions using SD-WAN, MPLS, and VPN. Deployed regional SBCs, integrated with Genesys SBCs, and partnered with cybersecurity experts to ensure compliance with in-country telecom regulations to enhance voice network performance (latency, jitter).
- ➔ Managed VoIP inventory, optimized operational costs, and oversaw vendor relationships to ensure service efficiency and cost-effectiveness.
- ➔ Collaborated with carriers (BT, Verizon, TATA, China Mobile) for BYOC/SIP trunk deployments using Genesys Global Media Fabric and WebRTC for agent softphones. Managed inbound voice routing with TFNs, ITFNs, and DID.
- ➔ Produced comprehensive documentation encompassing technical specifications, architectural diagrams, and operational procedures to streamline system understanding and maintenance.
- ➔ Conducted regular performance evaluations and optimizations to uphold superior voice quality and reliability standards.
- ➔ Led periodic performance assessments and audits of voice systems, pinpointing enhancement opportunities and proactively implementing measures to fortify reliability, scalability, and security.
- ➔ Collaborated closely with vendors and third-party providers to secure essential hardware and software components essential for seamless system operation.
- ➔ Delivered ongoing support and swift troubleshooting for voice systems, ensuring timely issue resolution to minimize operational downtime.
- ➔ Skilfully communicated complex architecture strategies to senior leadership and third-party business leaders using visual representations. Facilitated key stakeholder decision-making processes, resulting in well-informed and timely choices.

iOPEX Technologies, Bangalore

December 2020 – April 2021

Voice Specialist

- ➔ Directed the configuration, deployment, and upkeep of voice communication systems, including PBX, VoIP, and SIP technologies, ensuring seamless operations and peak performance.
- ➔ Conducted comprehensive evaluations of existing voice infrastructure, pinpointing areas for enhancement and executing improvements to bolster efficiency and reliability.
- ➔ Led requirements gathering sessions with clients to discern business objectives, technical constraints, and user needs, subsequently translating requirements into actionable design specifications.
- ➔ Played a pivotal role in troubleshooting and rectifying voice system issues, offering timely support to mitigate disruptions and maintain uninterrupted communication services.
- ➔ Collaborated closely with sales and marketing teams to craft technical proposals, presentations, and demonstrations for prospective clients, effectively showcasing the value proposition of voice solutions.
- ➔ Provided comprehensive training and guidance to end-users on voice communication systems, fostering user adoption and optimizing system utilization.
- ➔ Stayed abreast of emerging technologies and industry trends in voice communication, integrating relevant advancements to optimize system performance and capabilities.

PREVIOUS EXPERIENCE

|                                                                            |                     |
|----------------------------------------------------------------------------|---------------------|
| AT&T – Bangalore   Specialist                                              | Aug 2008 - Dec 2020 |
| IBM India Private Limited - Bangalore   System Operation Senior Specialist | Mar 2007 - Jul 2008 |
| Vitage Technologies Private Limited – Bangalore   Executive Support        | Jun 2006 - Mar 2007 |

KEY PROJECTS

- ➔ **Global VoIP Migration Project**  
Architected and executed a full-scale VoIP migration (Skype->MS Teams & Genesys Pure Engage->Genesys Pure Cloud) for HPe, resulting in a 75% reduction in telecom expenses and 100% improvement in call quality and system uptime.
- ➔ **IT NOC Deployment**  
Designed and deployed end-to-end IT NOC monitoring solutions integrating Grafana, SolarWinds, and Raspberry Pi-based edge devices, enabling real-time infrastructure visibility and improving incident response efficiency by 99%.
- ➔ **Disaster Recovery Implementation**  
Designed and deployed a VoIP disaster recovery plan, ensuring zero downtime and continuity of service during unforeseen events.
