PROFESSIONAL EXPERIENCE

Citco Fund Services | Business Analyst | Jun 2021 – Present

- Gather and analyze business requirements for Capital Markets initiatives covering Corporate Actions and Settlement within Hedge Fund (Fund of Fund) operations.
- Translate business requirements into BRDs, FRDs, functional specifications, user stories and acceptance criteria, maintaining traceability from business needs through implementation.
- Perform AS-IS/TO-BE analysis, gap analysis and process mapping across the trade lifecycle to identify automation and process improvement opportunities.
- Define business rules and validation logic for key economic and transaction parameters including trade date, settlement date, market value, payment details and transaction processing.
- Work with Front Office, Legal, Custodian, Fund Administration and Technology stakeholders to analyze trade lifecycle impacts and agree on functional solutions.
- Own BA activities across requirement elicitation, impact analysis, solution discussions, development support, UAT, business sign-off and implementation.
- Work in an Agile/Scrum environment, participating in Sprint Planning, Backlog Refinement, Daily Stand-ups, Sprint Reviews and Retrospectives; manage requirements and backlog items through JIRA.
- Support maker-checker workflows, exception handling and rejection controls, and validate audit-trail functionality including timestamps, user activity and field-level change tracking.
- Manage user stories and backlog priorities based on business priorities, dependencies and delivery timelines; track risks, issues and dependencies and support governance reporting.
- Support UAT through business scenarios, test coverage review, defect tracking, business-user coordination and validation of delivered solutions against approved requirements.
- Coordinate with Front Office, Legal, Custodian and Fund Administration teams to investigate custody breaks, settlement exceptions and system discrepancies.
- Develop SOPs, business process documentation and process flow diagrams to support operational consistency and knowledge transfer.

eClerx Services Ltd. | Analyst | May 2019 – Apr 2021

- Managed margin calls within agreed timelines and researched, reconciled and resolved margin-call disputes with counterparties.
- Confirmed and processed collateral movements to support smooth post-trade operations.
- Communicate with clients, brokers and custodians on trade confirmations and operational queries via phone, email and conferences.
- Performed root-cause analysis of operational errors and proposed or implemented controls in coordination with supervisors and managers.

SG Analytics | Associate Analyst | Aug 2017 – Jun 2018

- Developed an equity research financial model from scratch, ensuring accuracy and alignment with client requirements.
- Transferred a financial model from another database system to improve data accessibility and efficiency.
- Created and analyzed financial models across Equities, Commodities, Economics, Fixed Income and Currency asset classes.
- Led a 5–6-member team project and coordinated deliverables to meet agreed deadlines.

Infosys BPO Ltd. | Senior Accountant | Jun 2014 – Jan 2016

- Worked in accounting operations; further role details are not provided in the source of CV.
