WORK EXPERIENCE

Business Analyst | Capgemini — HSBC UK Sep 2021 – Present

- Led Business Analysis for ISO20022 MT-to-MX payment migration across the UK region, ensuring regulatory compliance across 10+ Lines of Business.
- Led ISO20022 MT-to-MX migration and CBPR+ readiness across banking programs, aligning business requirements with regulatory and SWIFT standards.
- Supported real-time and cross-border payment transformation initiatives with stakeholder workshops, impact assessments, and data mapping.
- Partnered with business, technology, PMO, and testing teams to deliver BRD/FSD, UAT/SIT support, and smooth production transition.
- Lead business analysis for liquidity and account management transformation programs for the Germany region, supporting requirements definition, solution design, and stakeholder alignment.
- Operated as dual Test Lead + BA: authored BRDs, FSDs, data mappings, and RTMs; facilitated requirement elicitation workshops with BAs, SAs, PMs, and IT teams.
- Managed defect triage, daily governance calls, and cross-functional stakeholder alignment; delivered Hybrid Address implementation and ISO version upgrades.
- Executed automated regression using Tosca and Postman; supported UAT with scenario design, walkthroughs, and production validation.

Business Analyst | CGI — CIBC Oct 2019 – Sep 2021

- Conducted requirement gathering, workflow mapping, BRD/FSD authoring, and acceptance criteria definition across enterprise banking programs.
- Supported real-time and cross-border payment transformation initiatives with stakeholder workshops, impact assessments, and data mapping.
- Partnered with business, technology, PMO, and testing teams to deliver BRD/FSD, UAT/SIT support, and smooth production transition.
- Converted manual scenarios into Postman/Tosca automation scripts; performed accessibility testing across 8+ applications; led SIT, E2E, and defect governance.

Payments SME / Business Analyst | Standard Chartered GBS Aug 2018 – Oct 2019

- Performed Business Analysis for payments modules (ITT, ILT, INT, OTT, ONT, OLT); created process flows, data mappings, and user stories.
- Led SWIFT STP engine validations achieving 100% STP compliance; supported multi-country UAT planning, execution, and reporting.

Senior Test Engineer | Hexaware Technologies — Citi US May 2015 – Aug 2018

- Executed SIT, E2E, and API testing for Citi's CDBE platform; built automated regression suites using Selenium and TOSCA; performed production validation and requirement traceability.
