

Summary

To leverage my 7+ years of experience in the networking domain as a Network Engineer, contributing to the design, implementation, and optimization of robust network infrastructures. I aim to utilize my technical expertise in enhancing network performance, security, ensuring seamless operations, and driving organizational success through innovative solutions and proactive support.

Professional Experience

Resident Engineer (April 2025 – Present)

HPE Juniper Networks, Gurugram, Haryana 122002

- Analyzing network configurations.
- Troubleshooting the network and supporting operations.
- Developing network and equipment operating procedures.
- Assisting with network inventory tracking and management to support the network.
- Testing of Juniper Networks product features & functionality.
- Evaluating technical specifications for interoperability.
- Documents root cause analysis to help minimize future issues and maximize network uptime.
- Oversee, monitor, and track open trouble tickets, return material authorizations (RMAs), and open bug reports.
- Providing regular updates on current issues.
- Providing informal technical and product workshops.
- Assisting in the ongoing definition of Key Performance Indicators (KPIs) for the network and services.
- Support to ensure that customer network continuously scale & evolve based on their organisation requirements & operational needs.

Technical Support Engineer-2 (July 2023 – March 2025)

Juniper Networks, Karnataka IN

- Hands-on experience and a combination of the following; designing, deploying, configuring, supporting, troubleshooting, debugging and administering the network protocols and technologies.
- Managed Juniper's campus and data-center products (EX, QFX and IP-fabric) and associated technologies.
- Acted as the primary point of contact for customer-reported issues & advocating for timely resolutions.
- Ensure timely restoration of Services maintain MTTR for good customer experience & high Service availability to maintain Service Level Agreement (SLA).
- Developed a deep understanding of infrastructure, technologies, configurations and service histories, provide relevant technical inputs to facilitate and expedite escalated problem resolution.
- Identify and isolate product issues or reported problems at both hardware and software levels, replicate customer environments in JTAC lab for engineering engagement, own & document communications among customers, engineering teams and stakeholder, and provided final resolutions.
- Hand-on experience on networking troubleshooting tools such as IXIA, tcpdump, and Wireshark.
- Develop and maintain in-depth knowledge of IP products, including features, functionality, and technical specifications.
- Utilize technical expertise to troubleshoot and debug IP product issues, collaborating with internal teams (Pre-sales, engineering) to improve potential quality issues with products & to ensure seamless customer experience

Technical Support Engineer (November 2021 – June 2023)

Juniper Networks, Karnataka IN

- Resolve customer concerns raised during installation, operation, maintenance, product application, or compatibility matters.
- Be a customer advocate for timely resolution of the problems reported, understand the environment/network and impact on business.
- Take ownership for problem resolution, problem reproduction and escalation.
- Single Point of Contact (SPOC) for Level 1 escalations and elevated cases & escalating issues to next level engineers or management when necessary.
- Troubleshoot problems with hardware equipment and software applications and recommend corrective action.
- Created and updated technical documentation, such as knowledge base articles, to share expertise with internal teams and customers.
- Provided mentorship to newly hired engineers, offering guidance and support.
- Designed onboarding programs for Technical Assistance Center (TAC), focusing on switching curriculum for new hires worldwide.

Network Engineer (October 2018 – October 2021)

WIPRO (IGI International Airport) Delhi

- Managed network & security in Enterprises and data-center network with associated technologies.
- Security Policy Development: Create and customize security policies to address specific application vulnerabilities and compliance requirements.
- Hands-on experience on Fortigate firewall & Working knowledge of Palo-Alto firewall & Panorama.
- Collaborate with the incident response team to investigate and mitigate security threats.
- Incident Response: Monitor security events, analyze logs, and respond to security incidents in a timely manner.
- Managed diverse vendors devices including Cisco, Avaya, and Arista, Juniper & Extreme Switches.
- Proficient in Routing, Switching, Redundancy, and Discovery protocols.
- Configured, maintained and monitored LAN/WAN networks and ensuring rapid incident resolution as per SLAs.
- Optimized network performance through proactive monitoring, troubleshooting, outage management and upgrade scheduling in collaboration with network's architects.
- Utilized network tools such as Wireshark, Junos Space, EDM and DM.
- BMC Remedy used for Change & Incident Management.

Hands On

- Cisco: C9300, 4010
- Avaya: VSP9012, 7254XSQ, 5952, 5698, 5520, 3510
- Juniper: MX-Series, QFX-Series, EX-Series
- Arista
- Fortinet

Technical Skills

- Switching: ETHERNET, 802.1Q, VLAN, DOT1X, xSTP, LACP, Q-IN-Q, LLDP
- Routing protocols: BGP, OSPF, EIGRP, RIP
- Multicast protocol: IGMP, PIM, IGMP-SNOOPING
- Advanced data-center technologies: MC-LAG, VXLAN, EVPN
- IP and related protocols: TCP/IP, UDP, ARP, ICMP, SNMP, DHCP, GRE, VRRP, AAA/RADIUS/TACACS, VRF

Certifications

- HPE Advanced Product Certified - HPE Aruba Networking ClearPass
- Fortinet certified NSE-1, NSE-2 & NSE-3
- Juniper Networks Certified Professional, Enterprise Routing & Switching (JNCIP-ENT)
- Juniper Networks Certified Professional, Service Provider Routing & Switching (JNCIP-SP)

- Juniper Networks Certified Specialist, Enterprise Routing & Switching (JNCIS-ENT)
- Juniper Networks Certified Specialist, Service Provider Routing & Switching (JNCIS-SP)
- Juniper Networks Certified Associate, Security (JNCIA-SEC)
- Juniper Networks Certified Associate - Junos (JNCIA-Junos)
- Advanced Junos Enterprise Switching (AJEX)

Education

Bachelor's Degree, Electronics & Communications | Year 2018
PDM College of Engineering, Haryana

Diploma in Electronics Engineering | Year 2014
Chotu Ram Rural Institute of Technology, New Delhi

Soft Skills

- Client Management
- Vendor Management
- Escalation Management
- Incident Management
- Change Management
- Technical Documentation
