Profile

Full-stack engineer with 7+ years of experience **architecting and scaling** SaaS and platform systems across Insurance, HR, and EdTech. Experienced in distributed systems, multi-tenant platforms, identity, cloud infrastructure, and AI-enabled applications. Proven track record **owning complex systems end-to-end** across architecture, scaling, security, and production operations.

Core Engineering

Platform Architecture · Distributed Systems · Scalability & Performance · Cloud-Native Systems · Multi-Tenant SaaS · Identity & Authentication · Full-Stack Systems · AI-Enabled Applications

Experience

Senior Full-Stack Engineer – Sapiens (DigitalSuite R&D)

2023–Present

- **Agentic Platform Migration & Automation:** Architected a Node.js/Claude migration platform to automate per-client portal customizations across **13+ enterprise insurance clients**, reducing manual migration work performed by delivery teams of **8+ developers per client** through classified playbooks and runtime tenant configuration.
- **Enterprise Identity & Auth Architecture:** Architected a **configuration-driven authentication platform** using NextAuth, OAuth 2.0/OIDC, MongoDB, and AJV; unified Keycloak and Microsoft Entra ID with SSO, identity brokering, token lifecycle management, and federated logout across multi-tenant environments.
- **Design System & Platform Standardization:** Established and drove adoption of a **token-based design system** across **3 engineering teams and 20+ developers**; standardized primitive, semantic, and component-token patterns with CSS-variable theming and reusable React/Next.js platform components.
- **Supply-Chain Security & Platform Reliability:** Owned **production supply-chain security** across shared platform packages; remediated npm CVEs, developed targeted patches, and drove dependency upgrades for core platform components.
- **AI-Enabled Dynamic UI Framework:** Extended the core UI framework for AI-powered conversational rendering, enabling insurance information retrieved through LLM interactions to dynamically compose and render validated React components at runtime.

Full-Stack Engineer – SaaS & Platform Products

2020–2023

- **High-Scale Distributed Execution:** Re-architected **payroll workloads** from AWS Batch to Node.js asynchronous workers and BullMQ; leveraged event-driven I/O for an I/O-intensive workload, scaling supported payroll processing from **10k to 80k+ employees** while addressing database bottlenecks.
- **Kubernetes-Native Workload Platform:** Architected and deployed a **Kubernetes-native scheduling platform** to replace AWS Batch during the organization's migration away from AWS-managed execution; used Kubernetes Jobs for application-level scheduling, lifecycle management, retries, and scoped execution control.
- **ML Application Pipeline Architecture:** Built SmartBook, a multi-model ML platform integrating Django, DRF, FastAPI, Pydantic, and Vue.js; **decoupled synchronous web traffic from asynchronous model-processing pipelines**.
- **Schema-Driven UI Engine:** Developed an embeddable JSON Schema-based form engine using Vue.js and AJV; dynamically generated validated UIs integrated with background worker pipelines for asynchronous document generation.

Backend / Platform Engineer – ConnectWise

2018–2019

- **I/O Performance Engineering:** Increased **throughput** of an I/O-intensive Python application using greenlet-based concurrency, improving I/O utilization without an architectural rewrite.
- **Identity & API Modernization:** Designed automated Active Directory identity synchronization with a web portal using WSS, Flask, and a side-loaded C# Windows client; built an API translation layer mapping REST semantics to existing SOAP services without rewriting underlying business logic.

Technical Skills

Languages: TypeScript, JavaScript, Python **Backend:** Node.js, NestJS, Django, Flask, FastAPI

Frontend: React, Next.js, Vue.js, Tailwind CSS, Styled Components **Infrastructure & Cloud:** AWS, Kubernetes, Docker

Databases: PostgreSQL, MongoDB **AI Engineering:** Claude, OpenCode, LLM Agents

Education & Certification

B.E. Computer Science and Engineering – Rao Bahadur College of Engineering, Karnataka

2012–2016

AWS Certified Solutions Architect – Associate

2026–2029
