Professional Summary

Result-driven Business Analyst with 5 years of international experience across Banking, Risk Data, and Regulatory Reporting. Skilled in requirements elicitation, BRD/FSD documentation, SQL-based analysis, and data quality improvements. Experienced in Agile delivery, UAT management, and stakeholder communication. Onsite European experience (ING Bank, Amsterdam) supporting data migration and regulatory reporting initiatives.

Core Skills

- **Business Analysis:** Requirements Elicitation, BRD/FSD, Gap Analysis, User Stories, UAT Planning & Execution, Impact Assessment, Stakeholder Management, Root Cause Analysis, Business Process Modeling, Functional Requirements Definition, Non-Functional requirements documentation, Acceptance Criteria definition
- **Methodologies & Tools:** Scrum Master, Sprint Planning, Backlog Refinement, Azure DevOps, JIRA, ServiceNow, Confluence, MS Visio
- **Data & Technical:** Advanced SQL (MySQL, Data Validation), Data Warehousing, Data Mapping, ETL Data Validation, Data Lineage & Governance, Data Quality Frameworks, Data Lineage, Advanced Excel, Power BI
- **Domain Expertise:** Risk Data, Regulatory Reporting, BCBS 239 Compliance, Data Governance, Investment Banking

Professional Experience

Cognizant Technology Solutions | Pune, India / Amsterdam, Netherlands

Business Analyst (Client: ING Bank) | July 2021 – Present

- **Agile Delivery & Leadership:** Acted as Scrum Master for a 12-member cross-functional team, managing the end-to-end SDLC. Standardized daily syncs and backlog refinement, improving sprint predictability by 15% and on-time delivery rates.
- **Requirements & Documentation:** Translated complex regulatory requirements into comprehensive BRDs, FSDs, data mapping documents, and actionable agile user stories, reducing development rework.
- **Data Quality Optimization:** Engineered automated data quality KPI checks using Advanced SQL, successfully elevating overall data accuracy and completeness by 20%.
- **Deep-Dive Analysis:** Executed complex SQL queries to perform deep-dive data validation, anomaly detection, and cross-system reconciliation, ensuring data integrity across critical risk systems.

- **Regulatory Compliance (BCBS 239):** Spearheaded impact analyses for changing regulatory directives (including BCBS 239 and local risk protocols), ensuring 100% compliance across all interconnected data systems.
- **Process Improvement:** Optimized the end-to-end operational workflow by 10-12% through targeted process re-engineering, proactive KPI monitoring, and continuous stakeholder alignment.
- **UAT & Deployment:** Designed comprehensive UAT test plans, coordinated multi-team execution, triaged defects, and ensured seamless, zero-critical-defect production go-lives.
- **Incident Management:** Conducted detailed root-cause analysis (RCA) for data incidents in production, resolving recurring structural issues and substantially improving SLA compliance.

Key Onsite Engagement: ING Bank, Amsterdam

- **Data Migration Triage:** Played a pivotal role in major data migration go-lives activities, performing high-stakes data validation, reconciliation, and triaging critical production issues under tight deployment deadlines.
- **Stakeholder Management:** Facilitated complex requirement clarification workshops with business owners, data stewards, model validators, and IT architecture teams, mitigating gaps and strengthening offshore-onsite collaboration.

Education

Bachelor of Technology (Computer Science Engineering), Silicon Institute of Technology, Bhubaneswar (July 2017– June 2021) | CGPA: 8.55

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)

Achievements

- **Award:** Recognized by client leadership for the on-time delivery of critical risk data sourcing projects directly impacting European regulatory reporting.
- 20% improvement in data accuracy and completeness through SQL-driven automated KPI checks.
- 15% increase in sprint predictability and delivery consistency as acting Scrum Master.
- 10-12% operational efficiency gain via targeted process re-engineering and KPI monitoring.
- 100% BCBS 239 regulatory compliance maintained across all data systems.
- Zero critical defects at go-live for ING Bank's major data migration project in Amsterdam.
