

ASHUTOSH AGRAWAL

PMO & Process Excellence Leader | Lean Six Sigma Black Belt | Digital Transformation | RPA

+91 9760582027 | reachmeatashutosh@gmail.com | Hyderabad, India

IMPACT AT A GLANCE

₹30+ Cr / USD 1.5M+ Total Cost Savings | Up to 60% Process Efficiency Gains | 10+ GB Projects | 100+ Employees Trained on LSS / CI

PROFILE SUMMARY

Lean Six Sigma Green Belt Certified (KPMG Sponsored) professional with 10+ years driving Process Excellence, PMO, and Digital Transformation across GCC, NBFC, and Heavy Manufacturing sectors. Proven track record of delivering USD 1.5M+ in annual savings through RPA-UiPath automation, DMAIC-led project execution, VSM, and Kaizen-based continuous improvement. Adept at leveraging Power BI, SQL, and AI-powered tools for real-time governance and data-driven decision-making across cross-functional GCC, US, and India-based teams.

I am currently pursuing my Lean Six Sigma Black Belt certification from the Indian Statistical Institute (ISI).

I have personally led all 10 Green Belt projects, managing them through the project lifecycle and driving them toward successful completion.

Yes, I have managed the end-to-end Lean Six Sigma programme lifecycle across Black Belt, Green Belt, and Yellow Belt initiatives, including nominations, mobilisation, training coordination, assessments, project allocation, mentoring, certification, progress tracking, and reporting.

I have trained 100 employees in Lean Six Sigma and Continuous Improvement, comprising approximately 65 Yellow Belt and 35 Green Belt participants.

Yes. I have developed two structured training modules — ACE 1 and ACE 2 — covering Lean Six Sigma and Continuous Improvement concepts, methodologies, tools, and practical application.

I have worked across multiple process-improvement tracks, including Billing, Billing Rewrite, and other operational processes. Through process and data discovery, I identified 39 improvement opportunities. Of these, 30 were converted into automation initiatives, 6 into process-improvement initiatives, and 3 into technology-enhancement initiatives. This involved understanding the As-Is process, identifying pain points and waste, analysing root causes and data, and developing appropriate To-Be solutions.

Yes. I established and drove a Continuous Improvement culture across an organisation of approximately 1,365 employees. I introduced a biweekly Process Health Check (PHC) mechanism covering process landscapes, SOPs, Continuous Improvement trackers, employee idea submissions, FMEA, quality checks, error logs, and CAPA. This created a structured mechanism for employees to identify, track, and implement improvement opportunities across the organisation.

Approximately 30% of my role involved engagement and consulting with senior stakeholders, while 70% was focused on execution and implementation. My stakeholder responsibilities included understanding business problems, presenting data-driven findings, recommending improvement opportunities, obtaining alignment, and providing updates on the progress and impact of improvement initiatives.

KEY PROJECTS & INITIATIVES

AI-Powered Process Health Dashboard | Clean Harbors

Built a Power BI dashboard integrating RPA telemetry and SAP data for real-time process health scores across GCC departments. Reduced escalation response time by 40% and enabled proactive SLA management. Tech: Power BI, SAP, UiPath, SQL

Intelligent Document Processing (IDP) Automation | Mahindra Home Finance

Deployed enterprise IDP using UiPath + OCR to automate KYC and compliance verification. Achieved 100% regulatory compliance and cut manual verification by 70%. Impact: ₹1.5 Cr annual savings.

End-to-End Loan Process Digitization | Mahindra Home Finance

Drove full digital transformation of the loan lifecycle via RPA and workflow automation. Reduced TAT from 35 days → 7 days (80%), increased business volume by 14%, saving ₹2 Cr/year.

Enterprise Lean Transformation Roadmap | Clean Harbors GCC

Designed multi-year Lean Transformation roadmap across 5 business units integrating VSM, FMEA, and Kaizen events. Delivered 20% OE improvement in Year 1 with a CI governance framework.

VoC Analytics Framework | Mahindra Home Finance

Established a VoC framework using Google Analytics and NPS/CSAT data to prioritize product features. Resulted in 13.5% improvement in customer retention and 18% CSAT uplift.

CI Tracker Digitization: Excel → PowerApps | Clean Harbors

Led end-to-end digitization of CI tracker with real-time dashboards and automated alerts. Improved process visibility by 60%, reduced manual reporting by 5 hrs/week.

WORK EXPERIENCE

Clean Harbors | Hyderabad | PMO – Global Process Excellence Manager | Dec 2025 – Present

- Restored momentum on 3 stalled Green Belt projects delivering ~USD 1M in recovered annual savings, by applying structured DMAIC re-engagement and cross-functional stakeholder realignment
- Eliminated process bottlenecks in US WIN Applications Compliance Modernization achieving 35% efficiency improvement, by conducting end-to-end VSM and SIPOC analysis across impacted workflows
- Reduced operational error rates across GCC functions cutting defects by 15%, by facilitating structured RCA workshops using Fishbone diagrams and 5-Whys methodology
- Scaled automation and digital initiatives enterprise-wide saving USD 500K annually and reducing manual effort by 25%, by leading RPA-UiPath deployments and process digitization across GCC operations
- Built an organization-wide continuous improvement culture enabling 100+ employees to lead DMAIC projects with a GCC CI governance framework, by designing and delivering LSS training covering VSM, FMEA, Kaizen, and RCA

Mahindra Home Finance | Hyderabad | Business Excellence Manager | Aug 2023 – Nov 2025

- Transformed loan processing speed end-to-end delivering 80% TAT reduction (35 → 7 days) and ₹2 Cr saved annually, by applying DMAIC-led process redesign integrated with RPA-UiPath workflow automation
- Eliminated non-value-adding steps across 5 departments driving process efficiency from 15% → 35%, by executing comprehensive VSM to surface and remove waste at each process stage
- Achieved full KYC and compliance accuracy generating 100% regulatory compliance and ₹1.5 Cr in annual savings, by deploying Poka-Yoke driven IDP automation using UiPath and OCR — cutting manual effort by 70%
- Improved complaint resolution across NHB, CPGRAMS, and NCH portals cutting closure TAT from 11.9 → 5 days (58% faster), by applying FMEA and Control Charts for proactive SLA monitoring and risk management
- Strengthened customer loyalty and satisfaction scores contributing to 13.5% retention uplift and 18% CSAT improvement, by applying Pareto analysis and VoC (NPS/CSAT) insights to prioritize CRM product enhancements

Tata Hitachi Construction Machinery | Pan India | Operations Excellence Manager | Jul 2019 – Jul 2023

- Reduced non-turbo parts rejection rate from 15% → 5% generating ₹10 Cr in cost avoidance, by executing DMAIC projects validated through Gauge R&R and process capability (Cpk) analysis
- Lowered Hub Line consumable cost from ₹18 → ₹15.4 per part saving ₹13.2 Cr across production cycles, by applying Kaizen events and Pareto-driven root cause elimination to target high-waste inputs
- Reduced fly housing machining rejection from 0.51% → 0.10% resulting in ₹6 Cr in savings, by implementing DMAIC Control phase with Run Charts and Statistical Process Control (SPC)
- Improved production planning efficiency and inventory control achieving reduced lead time variability and lower excess stock, by implementing JIT and Kanban systems alongside cross-functional Kaizen events mapped via SIPOC

GHH-Fahrzeuge (now Komatsu) | India | Mechanical Engineer | Sep 2016 – Feb 2019

- Maximized underground mining equipment reliability achieving 95%+ uptime and 20% reduction in unplanned downtime, by applying 5-Whys RCA for recurring failures and implementing structured preventive maintenance schedules

EDUCATION & CERTIFICATIONS

- B.E. Mechanical Engineering — Yashwantrao Chavan College of Engineering, RTMNU 2016
- Certifications: Lean Six Sigma Black Belt • Lean Six Sigma Green Belt (KPMG Sponsored) • ISO 9001:2015 • SAP MM Certified

TECHNICAL SKILLS

- Tools & Platforms: MS Office (Advanced Excel), Power BI, JIRA, Google Analytics, SAP MM, SQL, Tableau
- LSS & Statistical Tools: DMAIC, DMADV, VSM, Kaizen, Poka-Yoke, FMEA, SIPOC, 5-Whys, Fishbone, Minitab, Pareto, Control Charts, Gauge R&R, Cp/Cpk
- Automation: RPA – UiPath, Microsoft PowerApps, Power Automate, Agile, Kanban
- Emerging Tech: Copilot / AI Tools, Python (basics), Confluence / Notion
