PROFESSIONAL SUMMARY

Delivered 80% reduction in manual regulatory reporting effort (Citi/RBI EWS), 60% improvement in data accuracy (BNY Mellon Product Grid), and zero post-launch critical defects across MDM integration for Northern Trust. Managed 300+ user story backlogs across 10+ integrated source systems with sustained 45+ sprint velocity. Deep domain expertise in Capital Markets, Regulatory Reporting (RBI EWS, CFTC, ISDA, SDL), Client Onboarding, and AML/KYC platforms. PSM I · IIBA-AAC certified. AI-enabled BA/PO with 13+ years of BFSI delivery experience across global banking institutions.

CORE COMPETENCIES

Product Ownership & Roadmap Planning | Backlog Management & Grooming | Sprint Planning & Scrum Facilitation | Release Management & Go-Live Governance | Stakeholder Management (8 Global Stakeholders) | User Story Definition & Acceptance Criteria | Regulatory Reporting (RBI EWS, CFTC, ISDA, SDL) | AML / KYC / Client Onboarding | Trade Settlement | Capital Markets | Agile / Scrum / Kanban | Product Vision & Feature Prioritisation | RAID Governance | UAT Sign-off | Vendor Management | Budget Planning Support

TOOLS & TECHNOLOGIES

JIRA | Azure DevOps | Confluence | MS Project | Excel | Power BI | Visio | MIRO | iGrafx | Lucid Charts | SQL (Basic) | XML | API Management | Kafka | SFTP | TCS BaNCS | MDM Platforms | Broadridge

PROFESSIONAL EXPERIENCE

Lead Business Analyst / Product Owner | Creospan (Client: Northern Trust) Aug 2025 – Apr 2026

Pune, India | MDM Integration · Client Onboarding · Trade Settlement

- Owned product delivery for MDM integration with TCS BaNCS, defining product vision, feature roadmap, and release plan for client master data modernisation across 8+ global stakeholder groups.
- Authored and prioritised user stories, epics, and acceptance criteria covering data mapping, XML publishing, batch processing, near real-time synchronisation, and exception management flows.
- Supported Trade Settlement technology workstream, collaborating with the Northern Trust technology team to define data flow requirements, settlement instruction mapping, and exception handling logic aligned to post-trade processing standards.
- Facilitated Agile ceremonies — sprint planning, backlog refinement, sprint reviews, and retrospectives — maintaining a healthy, prioritised product backlog aligned to delivery milestones.
- Governed product risk through RAID log maintenance, vendor coordination, and milestone reporting, ensuring production readiness with zero post-launch critical defects.
- Defined and enforced DoD standards across all sprint deliverables.
- Collaborated with solution architects, developers, and QA teams to ensure product increments met defined acceptance criteria, integration standards, and non-functional requirements.
- Conducted bi-weekly sprint review demos with 8 global business stakeholders.

Lead Business Analyst / Product Owner | IRIS Software (Client: Citi)

Sep 2024 – Aug 2025

Pune, India | RBI Regulatory Reporting Product — STP Transformation

- Acted as Product Owner for RBI EWS regulatory reporting platform, owning a backlog of 300+ user stories and driving prioritisation, refinement, and sprint planning for a 10+ member cross-functional delivery team.
- Defined product vision, communicated strategic roadmap and release strategy for STP transformation, achieving 80% reduction in manual reporting effort and enabling direct system-to-regulator reporting to RBI channels.
- Integrated product requirements across 10+ source systems, defining business rules, threshold logic, data validation frameworks, and error-handling protocols aligned to regulatory compliance mandates.

- Managed product governance including BRD/FRD ownership, architecture coordination, DLQ design, UAT sign-off, budget planning support, and stakeholder alignment sessions with 8 global business owners.
- Aligned product backlog priorities to OKRs/KPIs defined by business leadership.
- Maintained consistent sprint velocity of 45+ story points across 12 sprints.
- Managed 5 major product releases on schedule, with each release preceded by structured UAT cycles, release readiness reviews, and go-live checklists.

Senior Business Analyst (Product Focus) | BNY Mellon

Jul 2022 – Sep 2024

Pune, India | Capital Markets · Product Data Management · Client Onboarding · Proxy Operations · Regulatory Reporting

- Championed product data management transformation, designing and delivering Product Grid UI that eliminated Excel-based workflows and improved data accuracy by 60% for global product teams.
- Defined product features, wireframe requirements, and user acceptance criteria for the Product Grid, working iteratively with UX and development teams through Agile sprint cycles.
- Defined requirements for KYC client onboarding enhancements including document upload and verification flows and integration with AML/KYC screening tools, enabling process automation and measurable reduction in onboarding error rates for the KYC operations team.
- Led CANE (Customer Account Number Expansion) — a firm-wide client onboarding infrastructure change impacting 15+ global applications, coordinating feature rollout across product and technology teams to improve account architecture scalability and client data integrity.
- Defined requirements for the Proxy Enhancement Project — a new screen within the client onboarding application that digitised proxy service provider form submission to Broadridge, eliminating manual form-based communication. Designed an auto-population feature triggered by Proxy Edge ID selection, automatically populating provider name, address, contact, and email details for the top 2 proxy service providers (covering 80% of use cases), with manual entry retained for remaining 20% edge cases. Reduced pending case turnaround time by 2 business days, eliminating data entry errors and improving onboarding SLA adherence for global custody clients.
- Owned regulatory product change delivery for CFTC, SDL, and ISDA initiatives, managing feature charters, regulatory playbooks, and user training aligned to compliance deadlines.
- Incorporated VoC (Voice of Customer) insights from 3 regional teams into product backlog prioritisation.
- Defined MVP scope for Phase 1 of the Proxy Enhancement Project.

Business Analyst | TCS

May 2015 – Jul 2022

Pune, India | Banking · AML · KYC · Financial Services

- Supported product and delivery teams across Banking and Financial Services programmes, managing requirements, feature documentation, and release coordination for AML, KYC, and client onboarding platforms.
- Collaborated with Product Managers and business SMEs to translate strategic objectives into prioritised backlogs, user stories, and sprint-ready feature sets.
- Facilitated UAT, defect management, and release sign-off activities, ensuring product increments met business acceptance criteria before go-live.
- Managed end-to-end business analysis across multiple concurrent AML/KYC programmes, working with compliance, operations, and technology stakeholders to deliver regulatory-aligned solutions.
- Produced BRDs, FRDs, process flow diagrams, and data mapping artefacts for banking and financial services platforms serving global client bases.

Process Associate | Gallagher

May 2013 – May 2015

Pune, India | Insurance Operations

- Supported insurance product operations, contributing to process accuracy, SLA adherence, and operational efficiency improvements through structured data processing and team coordination.

KEY PROJECTS

Product Grid Development | BNY Mellon

- Defined and delivered a centralised multi-product data application, replacing Excel-based tracking tools and improving data accuracy by 60% — enabling faster, data-driven product decisions for global teams.

Proxy Enhancement Project | BNY Mellon

- Digitised proxy service provider form submission to Broadridge via a new onboarding screen with auto-population logic (80% coverage via Proxy Edge ID), reducing pending case TAT by 2 business days.

Client Master Data Modernisation | Northern Trust

- Product-owned MDM integration with TCS BaNCS, delivering data mapping, XML publishing, audit design, and real-time sync features aligned to client onboarding product roadmap milestones.

RBI Regulatory Reporting Automation | Citi

- Owned product backlog and release governance for RBI EWS STP automation, integrating 10+ source systems and eliminating 80% of manual reporting effort through structured product delivery.

CANE — Customer Account Number Expansion | BNY Mellon

- Led firm-wide client onboarding infrastructure change across 15+ global applications, improving account architecture scalability and client data integrity for global custody operations.
