

Detailed Critique on DoRight website

Upon reviewing the website, I noticed the following things:

1. The first thing which I observed was the color palette and typography which is consistent throughout the site which makes it look more professional and highlights the brand identity.
2. Even though the first impression of the website is usually the color theme and look of the site, the content also plays a crucial role in grabbing the attention of the visitors. The website lacks in detail information related to their clients and successful projects, including which would result in more registrations of new clients.
3. Although the colour palette of the website is consistent it can use more of visual elements to make the website more attractive and engaging for the users.
4. The website can also incorporate SEO to improve the site's visibility in search engine results.
5. The site performs well on mobile devices, making it easier for users to access the website according to their convenience.
6. The subtle effects like animation and hovering on the buttons and links makes the site more interactable.
7. The search bar feature is missing from the website which would make it easier to access.
8. Overall the website is fine, but it can definitely use more colour and visual elements to make it more impressive.
