SUMMARY

Senior Business Analyst with 6+ years delivering AI-augmented analysis, data-backed client outcomes, and BRDs that engineering ships from without a PM layer across BFSI, fintech, HRMS, and enterprise automation. I use ChatGPT, Claude, and Cursor as daily workflow tools, not experiments. I have managed BA teams end-to-end, run QBRs with senior finance and operations stakeholders, and owned the full requirement-to-UAT lifecycle across 135+ automation programs. I bring this same combination of AI-augmented speed and structured requirements ownership to whichever environment I'm working in, translating complex business problems into solutions engineering can build from directly.

CORE COMPETENCIES

Requirements Engineering (BRD/FRD/RTM) | AI-Augmented Workflow Design | SQL & Advanced Data Analysis | Cognos Analytics | Tableau | Power BI | Team Leadership & BA Management | Stakeholder Management | QBR Delivery | UAT Ownership | RCA Structuring | Agile/Scrum | NLP | IDP | OCR | Jira | Confluence | Visio | OutSystems | SDLC | Product Roadmap | User Stories

EXPERIENCE

HireRight Bangalore, India

Jun 2025 – Present

Senior Business System Analyst – Intelligent Automation & AI Delivery

- Built and maintain recurring AI-powered workflows using Claude, ChatGPT, and Copilot for QBR narrative drafting, RCA structuring, BRD first-pass generation, and stakeholder communication reducing documentation effort by 50% and establishing AI augmentation as the team baseline, not an exception; all workflows documented so any team member can replicate independently.
- Authored end-to-end BRD for the Uber Widescreen Plus program (\$200K+) covering SSN, DOB, county, and watchlist screening automation logic, validation rules, exception handling, and data transformation workflows—specific enough that engineering built and shipped without a PM translation layer, delivering 85% effort reduction and 70% accuracy improvement at scale.
- Wrote BRD and solution design for SPI Waiver Automation: NLP-based document validation rule logic, IDP/OCR reconciliation pipeline, and exception handling flows—owned delivery from BRD through UAT sign-off, reducing manual effort by 75% and improving accuracy by 65%.
- Maintained live automation backlog across 4 programs—each item prioritised with business justification, engineering effort estimate, and expected impact on operational throughput; identified recurring manual tasks and converted them into formal BRD candidates on a weekly triage cycle.
- Built 10+ Cognos and Power BI dashboards using SQL for tracking automation ROI, SLA compliance, KPI trends, and operational metrics—each scoped to answer a specific decision question for a defined leadership audience; presented dashboard insights proactively at senior leadership reviews.
- Led enterprise bot migration from Automation Anywhere to Power Automate (Clearing House) with zero downtime—authored the migration BRD, defined rollback logic, and reduced ongoing maintenance effort by 40%.
- Conducted 25+ discovery workshops with 15+ stakeholders across business and consulting teams; maintained RTM and data lineage documentation throughout SDLC with structured change request governance and scope enforcement.
- Serving as Scrum Master for a 6-member Agile team driving 20+ sprints, backlog prioritisation, risk governance, and on-time delivery.

Happiest Minds Technologies Bangalore, India

Mar 2022 – May 2025

Software Engineer (Business Analyst & Product Lead)

- Managed and developed a team of BAs across a 135+ bot automation program—defined output quality standards for BRDs, RCA documents, and dashboard deliverables; ran structured 1:1s, performance conversations, and SQL and tooling upskilling for each team member.
- Drove requirements engineering for HRMS digital transformation across 3 business verticals—authored BRDs, FRDs, and user stories for 12+ product features; identified recurring customisation patterns across client requests and escalated 4 to the product roadmap rather than maintaining them as custom builds.
- Scaled automation coverage to 135+ bots across IT support, finance, and BFSI—reducing operational overhead by 60% and enabling straight-through processing for 10,000+ monthly transactions.

- Defined process and solution design for 135+ automation use cases—created RTMs, data flow diagrams, and data lineage maps in Visio; maintained a structured automation backlog with business justification and impact estimates per item.
- Led Mainframe (CICS) automation for a BFSI client—integrated RPA bots with CICS screens to automate core banking workflows, reducing manual processing time by 60% and improving data accuracy.
- Built and maintained enterprise mobile apps and web portals using OutSystems for NGO healthcare initiatives, supporting 5,000+ active users. Used Cognos Analytics for project health tracking and dashboarding.
- Developed Tableau and Cognos dashboards surfacing actionable insights from large-scale datasets for senior leadership decisions.

Empulse Global *Bangalore, India*

Sept 2021 – Feb 2022

RPA Analyst

- Deployed 5+ industrial and financial process automations using Automation Anywhere A360 covering invoice processing, PO validation, and Order to Cash (O2C) workflows, reducing manual effort by 50% across finance operations.
- Conducted requirements gathering and AS-IS process mapping for each automation use case, translating business rules into RPA solution designs with supporting documentation.

TECHNICAL SKILLS

Requirements & BA: BRD, FRD, RTM, User Stories, Use Cases, Data Lineage, Process Mapping, Stakeholder Management, UAT, Change Request Management

AI & GenAI: ChatGPT, Claude, Cursor, Copilot – daily workflow; Prompt Engineering, AI Prompt Design, NLP, IDP (Intelligent Document Processing), OCR, LLM integration

Data & Visualization: SQL (complex joins, window functions, aggregations, query optimisation), IBM Cognos Analytics, Tableau, Power BI, Python, Pandas

Automation & RPA: Automation Anywhere A360, UiPath, Power Automate, GenAI-powered Automation

Agile & Project: Scrum, Scrum Master, SAFe Agile, Sprint Planning, Backlog Management, Risk Governance, SDLC, Process Mining

Low-Code / No-Code: OutSystems, Power Automate, RPA Platforms

Tools: Jira, Confluence, Azure DevOps, Microsoft Visio, ERP Systems, CRM Systems

Mainframe: CICS, Mainframe-RPA Integration, Screen Scraping for Mainframe UI Automation

CERTIFICATIONS & COURSES

Automation Anywhere (RPA) · UiPath · OutSystems · Power BI Microsoft · Tableau · Soroco · Business Analyst Professional · GenAI & Prompt Engineering · LLM & AI Applications

EDUCATION

PES University *Bangalore, India*

Jun 2021

B.Tech, Electrical & Electronics Engineering

DAV Public School (XII) & Delhi Public School (X) *Patna, India*

2015 – 2017

CBSE X & XII
