Summary

Workfront Developer with 4 years of experience specializing in Adobe Workfront administration, Fusion integrations, and API-based automation. I design scalable workflows, custom forms, and dashboards to optimize resource management and governance. Expert in SSO, role-based access control, and data analysis via Power BI, I bridge the gap between technical solutions and stakeholder needs to drive business efficiency.

Professional Experience

Workfront Developer

Labcorp, Bangalore | March 2025 – Present

- Implement, Onboard, Administer and support the Adobe Workfront platform, enabling project and portfolio management across global teams. - Configure Workfront workflows, custom forms, reports, and dashboards to streamline project tracking and enhance visibility for leadership teams.
- Support and maintain Workfront Fusion integrations and troubleshoot APIs to ensure seamless data flow across enterprise applications.
- Implement and manage Workfront user provisioning, roles, and permissions to maintain security and compliance.
- Collaborate with stakeholders to design scalable solutions, optimize existing processes, and improve adoption of Workfront features.
- Deliver training sessions and documentation to empower business users and improve self-service.

Key Contributions:

- Automated approval workflows through Fusion, reducing manual tasks by 30%.
- Designed scalable reporting dashboards, improving real-time decision-making for project managers.
- Enhanced governance by streamlining role-based access control and SSO setup in Workfront.

Workfront Administrator

Piramal Finance, Noida | September 2024 – March 2025

- - Supported the administration and optimization of Adobe Workfront, ensuring platform stability and user efficiency across departments.
- - Managed user provisioning, access roles, and permissions, maintaining governance and data security standards.
- - Configured custom forms, reports, and dashboards to enhance visibility and process automation for project and resource management.
- - Assisted in maintaining Workfront integrations with Azure and other enterprise tools, resolving API and synchronization issues.
- - Collaborated with business teams to capture requirements and streamline workflows, ensuring consistent adherence to organizational standards.

Key Contributions:

- Improved reporting accuracy by standardizing custom form configurations and reducing manual data entry.
- Strengthened platform governance through structured user access and audit-ready documentation.

Workfront Support Engineer

Adobe, Noida | June 2023 – August 2024

- Delivered expert technical support for Adobe Workfront, assisting enterprise customers with project management, workflow automation, and resource planning.
- Resolved issues related to custom forms, Fusion automation, API integrations, and reporting dashboards.
- Configured Workfront SSO authentication, user roles, and security policies for smooth enterprise adoption.
- Conducted product training, onboarding, and best practices workshops, driving Workfront adoption and retention.
- Partnered with engineering and product teams to escalate and resolve recurring issues.

Key Project:

- Workfront Migration to Adobe Admin Console: Led the customer migration process, ensuring smooth transition, rolemapping accuracy, and minimal downtime.

Technical Support Executive

Benchmark, Gurugram | February 2022 – May 2023

- Supported cloud-based SaaS applications and assisted in Workfront-related administrative tasks, including user setup, permissions management, and minor workflow maintenance.
- Provided customer assistance with API troubleshooting, workflow automation, and data sync issues across multiple systems.
- Helped maintain Workfront documentation and reporting templates, contributing to improved internal efficiency and user experience.
- Supported email deliverability (SPF, DKIM, DMARC) and managed integrations between various platforms.
- Utilized Zendesk, Jira, and Power BI to track, analyze, and optimize support performance.

Key Contributions:

- Improved Workfront ticket resolution turnaround by standardizing escalation and documentation processes.
- Enhanced SaaS operational visibility by developing reusable reporting dashboards and automation checks.

Education

Bachelor of Science in Information Technology
Dev Bhoomi Uttarakhand University | July 2019 – August 2022

Technical Skills

- Workfront Expertise: Workfront Administration, Fusion Integrations, Reporting & Dashboards, Custom Forms, User Provisioning & Access Control
- SaaS & Cloud: Azure, SaaS Application Support
- Data & Automation: SQL Queries, Power BI, Zapier
- Support Tools: Zendesk, Jira, MS Dynamics, Salesforce, Symphony Summit, Freshworks
- Networking & Security: SSO, Active Directory, VPN, Authentication Protocols - Database Management: SQL

Core Competencies

- Adobe Workfront Development & Administration - Workfront Fusion Automation & API Integrations
- Workflow Optimization & Process Automation
- Troubleshooting & Problem Resolution
- Customer Training & Technical Documentation
