

Avinash H R

Process Excellence | Business Transformation | Digital Transformation

Bangalore, India | 8105619808 | rishabpratham@gmail.com | [linkedin.com/in/avinashhr](https://www.linkedin.com/in/avinashhr)

PROFESSIONAL SUMMARY

Process Excellence Leader with 14 years driving business transformation across BPO, e-commerce, and EdTech. Lean Six Sigma Black Belt with a record of delivering \$1.2M in annual savings through a 46% SLA reduction at Amazon using DMAIC and a 63% turnaround time improvement at First Advantage using VSM and RPA-led automation. Led enterprise-scale AI-powered transformation at Intuit, establishing ground truth frameworks and automated quality evaluation across 17 Business Units. Expert in designing target operating models, governing multi-vendor BPO networks, aligning C-suite stakeholders, and applying the change management discipline needed to sustain operational and digital gains at scale.

CORE SKILLS

Operational Excellence: Lean Six Sigma (DMAIC, VSM, FMEA, RCA), Kaizen, Continuous Improvement, QMS Framework, Process Re-engineering, Root Cause Analysis, COPC Standards, SOP Design, Gap Analysis, Target Operating Model (TOM) Design, Calibration

Tools and AI Strategy: GenAI Automation, Annotation Drift Detection, Labeling Inconsistency Detection, Agentic AI, Prompt Engineering, Human-In-The-Loop (HITL) Governance, Model Performance Assessment, Drift Analysis, Training Data Validation, ASR / TTS / Transcription / NLP Support, MS Excel (Advanced/VBA), Power BI, MS Visio, Miro, UiPath (RPA), Qlik Sense, Tableau, SQL, Python (ETL Pipelines), JIRA, Qualtrics

Consulting, Risk and Governance: Digital Transformation, RPA Strategy, SLA/SQS Governance, WBR/MBR/QBR Reporting, Risk Identification, Compliance Frameworks, Executive Reporting, Risk Mitigation, Quality of Service (QoS)

CX and Leadership: Cross-Functional Leadership, C-Suite Stakeholder Management, Change Management, Agile Scrum, Training and Capability Building, VoC Programs, NPS Improvement, CSAT, Churn Analysis, BPO Operations, Capacity Planning

WORK EXPERIENCE

Associate Consultant (PeX) / Business Transformation Manager | Teleperformance - Bangalore *Dec 2024 – June 2026*

- Designed Target Operating Model (TOM) for Intuit QuickBooks delivery network - established QMS governance standards, SOP frameworks, and continuous improvement loops across multi-vendor consulting team.
- Designed As-Is and To-Be Swimlane workflow diagrams using Miro to provide end-to-end process visibility and stakeholder alignment.
- Led ground truth studies across 17 Business Units to formalize quality judgment into deterministic scoring rubrics - built behavioral marker taxonomy capturing how experts evaluate subjective dimensions. Implemented calibration protocols reducing inter-annotator disagreement; established model drift detection to identify when quality frameworks degrade in production.
- Led onboarding and ongoing training for annotators including structured calibration sessions - provided detailed feedback on annotation quality and impact on algorithmic model performance. Coordinated knowledge-sharing to establish shared quality standards and edge-case handling before scaling production volumes.
- Built working relationships with C-suite, VPs, Vendor Directors, and Site QMs - co-designed Qlik Sense dashboards for real-time performance visibility and led WBR/MBR governance cycles to drive corrective action plans for strategic performance recovery.
- CX Strategy and Risk Mitigation (IES Product) - Drove CX strategy for the IES product by synthesizing churn signals and Voice of the Customer (VoC) data. Identified process risks stemming from product bugs and implemented a transparency-first migration strategy to rebuild customer credibility - delivering sustained NPS improvement and reduced repeat contact rates.

Key Achievements

- 40% Efficiency Gain - GenAI Audit Automation:** Deployed a GenAI-powered Audit Gem (LLM-powered QA) automating CSM evaluations against a 6-point audit framework - cut audit and documentation time 40% and enabled consistent, bias-free measurement across all delivery partners.
- 2-Minute AHT Reduction:** Identified that experts spent 40% of handle time on manual research across fragmented knowledge sources. Built a dynamic knowledge assistant using Google NotebookLM - drove a 2-minute AHT reduction on live calls and improved First Time Right (FTR) scores by reducing nuanced knowledge gaps at the point of customer interaction.

Business Quality Manager | Amazon Development Centre - Bangalore*Sep 2022 - Dec 2023*

- Managed delivery quality and SLA governance leading 50-member multi-region delivery team across high-severity ASIN and customer complaint workflows owning SLAs, capacity planning, resource optimisation, and escalation governance.
- SLA Risk Prediction and Proactive Governance - Partnered with tech teams to build SLA breach prediction logic using historical approval trends and inventory signals - enabling proactive risk interventions before service quality degradation and reducing missed delivery deadlines by 75%.
- Peak Planning and Change Management - Directed Prime Day and Black Friday operational planning cycles - revising SLAs, SOPs, and demand forecasts. Managing process change across 200+ employees through Agile governance and structured knowledge management.
- Partnered with operations, pricing, and compliance teams to identify process gaps and drive corrective action - functioning as an internal process consultant across seller and vendor workflows.

Key Achievements

- **SLA Reduction Initiative - \$1.2M Annual Savings** - Reengineered pricing delivery workflow using DMAIC - cutting SLA by 46% (3 hrs to 1 hr 37 min); eliminating 50% of uncompetitive delays; sustaining SLA adherence across multi-region operations.
- **75% Fewer Missed Delivery Deadlines:** Co-built a Python ETL pipeline with intelligent routing by inventory level, price variance, and approval trends - eliminating 10,000+ redundant manual reviews daily and restoring SLA confidence across operations.
- **Excel VBA Automation:** Built an Excel VBA macro processing ~1M rows - auto-splitting and exporting ASIN data for Prime Day and Black Friday, eliminating a full day of 3-4 FTE manual effort per event and reducing data entry errors to zero.

Quality Manager | Unacademy - Bangalore*Sep 2020 - Jul 2022*

- Built the Quality Management System from scratch under startup velocity - designed audit frameworks, scoring rubrics, and governance SOPs.
- Generated ₹4M+ in revenue by linking quality training programs to conversion and retention metrics; built automated TNI dashboards in Google Looker Studio and led RCA-driven coaching to significantly improve CSAT.

Team Leader | First Advantage Offshore Services - Bangalore*May 2013 - Nov 2019*

- **63% TAT Reduction - DMAIC Lean Transformation:** Transformed Education and Employment verification workflow using DMAIC and Lean methodologies - performed swimlane mapping, 5-Why root cause analysis, and time-motion studies addressing SOP and SLA gaps inherited during Hexaware transition. Standardized verification SOPs from scratch and collapsed TAT from 30 to 11 days (63% reduction).
- **RPA and NVA Elimination - MS Visio Keystroke Mapping:** Performed keystroke-level VSM/process mapping across 21 sub-processes using MS Visio to identify automation and NVA elimination opportunities; delivered two outcomes - an OCR scanner routing data directly into systems with exception handling for manual review, and a fully unattended UiPath RPA bot eliminating a high-repetition process end-to-end, resulting in 10 FTE reduction. Managed workforce transition, stakeholder communication, and process adoption to maintain operational continuity.

Technical Support Associate | Dell International Services - Bangalore*Oct 2009 - Apr 2013*

- Delivered L2 hardware and software support across consumer segments along with Upselling.

EDUCATION AND CERTIFICATIONS**Bachelor of Commerce** | Rabindranath Tagore University, Raipur MP | June 2019 - June 2021**Certified:** Lean Six Sigma Green Belt (LSSGB) - KPMG, Lean Six Sigma Black Belt (LSSBB) - VarSigma**Training / Knowledge:** [IBM Business Analyst](#)**GenAI and ML Upskilling:** AI/ML and Deep Learning, LLM and NLP, Agentic AI, Generative AI, [Python for Data Science](#), [Google Prompting Essentials](#)
