PROFILE SUMMARY

- ❖ Payments Product Owner with over 9 years of experience delivering large-scale **payment transformation, ISO 20022 migration, and cross-border payment modernization programs** for global banks and financial institutions.
- ❖ Expertise in **end-to-end payment lifecycle management**, including initiation, validation, clearing, settlement, reconciliation, and exception handling across SWIFT, SEPA, CIPS, and CBPR+ frameworks.
- ❖ Proven track record in **product backlog ownership, user story creation, acceptance criteria definition, and functional specification design**, ensuring seamless translation of business needs into technical deliverables.
- ❖ Experienced in leading **payment engine migration programs** (legacy to modern API-based platforms), including gap analysis, system mapping, and stakeholder alignment across multi-geography teams.
- ❖ Skilled at **Agile/Scrum/SAFe delivery environments**, facilitating sprint ceremonies, managing cross-functional teams, and driving prioritization decisions in high-pressure, regulated banking ecosystems.
- ❖ Strong stakeholder leader with expertise in **conflict resolution, trade-off analysis, and business requirement sign-off**, ensuring delivery alignment between product, operations, technology, and client stakeholders.

CORE COMPETENCIES

Payments Product Ownership

SWIFT MT/MX Messaging Standards

Payment Engine Modernization & Migration

Stakeholder & Vendor Management

ISO 20022 Migration (pacs / camt / pain)

CIPS & RMB Payment Processing

Agile Product Management (Scrum / SAFe)

User Story & Acceptance Criteria Definition

Cross-Border Payments Transformation

SEPA Credit & Direct Debit Schemes

Payment Lifecycle Management

Functional & Non-Functional Requirement Analysis

SOFT SKILLS

- 🔍 Growth-oriented Leadership
- 🔍 Cross-functional Team Collaboration
- 🔍 Adapatabiltiy in Critical Environment
- 🔍 Analytical & Critical Thinking
- 🔍 Strategic Planning & Execution

TECHNICAL SKILLS

- ❖ API Integration & Management
- ❖ SQL
- ❖ JIRA
- ❖ Confluence
- ❖ Azure Boards
- ❖ ServiceNow

CERTIFICATIONS

- ❖ Digital & Data Foundation — Artificial Intelligence — KPMG, 2025
- ❖ Certified Scrum Product Owner (CSPO) — Scrum Alliance, 2024
- ❖ Certified SAFe® 6 Practitioner — Scaled Agile, 2023

CAREER TIMELINE

May'16 – Apr'19

Business Analyst |
Accenture

Oct'20 – Sept'22

Senior Business
Analyst – Payments
Consultant |
Accenture

Sept'22 – Feb'25

Product Definition
Analyst (Product
Owner) | Amadeus IT
Group

Feb'25 – Present

Senior Consultant –
Payments Product
Owner | KPMG

WORK EXPERIENCE

Feb'25 – Present

Senior Consultant – Payments Product Owner | KPMG Assurance and Consulting Services LLP | Remote

Client: Standard Chartered Bank China — SWIFT/CIPS to SCPAY Payment Engine Migration

Key Result Areas:

- ❖ Defined and prioritized the product backlog based on stakeholder feedback, business value, and strategic goals.
- ❖ Facilitated structured stakeholder engagement through product walkthroughs, sprint ceremonies, and requirement review sessions across China business, operations, and global technology teams.
- ❖ Produced application-to-application interface specifications and data mapping documents defining integrations between SCPAY, upstream channels, and downstream finance and reporting systems.
- ❖ Supported UAT cycles and production go-live readiness through test validation coordination, defect triaging, and resolution tracking with QA and engineering teams.
- ❖ Translated business requirement documents into detailed software requirement specifications and ensured alignment through structured walkthroughs and formal sign-off cycles.
- ❖ Delivered knowledge transfer and onboarding sessions for 30+ team members, enabling continuity across delivery workstreams and functional understanding.
- ❖ Acted as primary point of contact for product clarifications, requirement decisions, and stakeholder alignment across multiple global and regional teams.
- ❖ Coordinated Agile delivery ceremonies including sprint planning, daily stand-ups, sprint reviews, and retrospectives, ensuring delivery governance and continuous improvement practices.
- ❖ Defined and refined user stories with detailed acceptance criteria, ensuring clarity of requirements and alignment between business stakeholders and engineering teams.

Highlights:

- ❖ Spearheaded end-to-end product backlog governance for migration of China payment flows (SWIFT MT, cross-border RMB via CIPS) to SCPAY API-based payment engine, including user story definition & acceptance criteria.
- ❖ Performed comprehensive current-state assessment of legacy payment processing platform and executed gap analysis against target SCPAY architecture across functional, regulatory, and operational dimensions.
- ❖ Defined migration scope, delivery sequencing, and impacted system landscape, including timeline planning and end-to-end data and message mapping in coordination with delivery leadership and SMEs.
- ❖ Covered full payment lifecycle analysis including initiation, validation, clearing, settlement, exception handling, and reconciliation processes across systems.
- ❖ Owned prioritization and continuous refinement of product backlog items based on business value, regulatory requirements, stakeholder inputs, and strategic roadmap objectives.

Sept'22 – Feb'25

Product Definition Analyst (Product Owner) | Amadeus IT Group | Bengaluru

Key Result Areas:

- ❖ Functioned as Product Owner for a payments reconciliation product covering retail payments sales and settlement data, including backlog ownership & prioritization aligned to business value, stakeholder inputs & strategic objectives.
- ❖ Converted complex payments operations requirements into structured user stories with well-defined acceptance criteria, enabling development teams to implement accurate and auditable reconciliation workflows.
- ❖ Acted as primary interface for product-related queries and clarifications, managing stakeholder expectations and addressing conflicts through structured trade-off evaluation while maintaining delivery alignment.
- ❖ Coordinated Agile sprint ceremonies including sprint planning, daily stand-ups, sprint reviews, and retrospectives, ensuring consistent delivery cadence and process adherence.
- ❖ Presented product demonstrations during sprint reviews to internal and external stakeholders, communicating feature progress, completion status, and alignment with defined business requirements.

Oct'20 – Sept'22

Senior Business Analyst – Payments Consultant | Accenture Solutions Private Limited | Kolkata, India (Remote)

Client: Fiserv Enterprise Payments Platform (EPP) — EMEA Global Banks (CBPR+, SEPA, TARGET2)

Key Result Areas:

- ❖ Defined functional and non-functional requirements for Fiserv EPP implementations across EMEA banking clients, covering CBPR+, SEPA (SCT/SDD/Instant), and TARGET2 payment schemes.
- ❖ Led ISO 20022 migration initiatives for multiple EMEA financial institutions, including gap analysis and preparation of functional specifications for development and QA teams.
- ❖ Supported product backlog refinement activities in collaboration with Product Owners, including translation of business requirements into user stories and contribution to prioritization and change request analysis.
- ❖ Facilitated requirements validation and sign-off sessions with client stakeholders, along with defect triaging, SME coordination, and release support activities.
- ❖ Contributed to delivery of payment hub enhancements by collaborating with product, delivery, and client banking teams, ensuring alignment across requirements, changes, and defect resolution cycles.

Santander Bank North America — SWIFT MT103 Wire Transfer Migration (PayPlus → Fiserv Dovetail)

Key Result Areas:

- ❖ Executed migration of wire transfer processing from PayPlus to Fiserv Dovetail Payments Platform, covering inbound and outbound SWIFT MT103 messages & integration with channels, third-party systems & core banking applications.
- ❖ Performed interface mapping and end-to-end gap analysis between legacy and target systems, identifying functional gaps and improvement opportunities across payment flows.
- ❖ Engaged in collaborative team discussions for knowledge sharing, requirement clarification, and structured problem-solving to support delivery consistency.
- ❖ Developed and maintained project documentation supporting training and operational readiness, ensuring clear understanding of new system processes and workflows.
- ❖ Conducted root cause analysis for processing issues, coordinated resolution activities, and facilitated knowledge transfer sessions for 30+ team members to ensure smooth onboarding and continuity.

May'16 – Apr'19

Business Analyst | Accenture Solutions Private Limited | Pune, India

Client: Barclays UKRBB — Retail Banking Channel Migration (Account Opening, KYC, Digital Debt Switcher)

Key Result Areas:

- ❖ Contributed to migration from Barclays Customer Gateway System to a Multi-Channel Application platform, supporting business analysis across Create Customer, Account Opening, KYC, and Digital Debt Switcher modules.
- ❖ Elicited, documented, and structured business requirements in collaboration with stakeholders, ensuring clear articulation of scope, risks, and dependencies, with timely escalation of issues impacting delivery alignment.
- ❖ Provided regular updates in Agile stand-ups to Scrum Master and Product Owner, covering requirement clarity, analysis progress, and dependency tracking across workstreams.
- ❖ Coordinated deployment readiness activities with development and environment teams across multiple test environments, enabling stable builds for functional validation and testing cycles.
- ❖ Converted business requirements into BDD-based test scenarios, enabling alignment between business expectations, development implementation, and structured validation outcomes.
- ❖ Managed defect tracking and resolution in collaboration with development teams, validating fixes against business requirements and supporting structured retesting cycles.
- ❖ Conducted functional walkthroughs and demonstrations across multiple applications, validating delivered features against documented requirements and ensuring stakeholder alignment.
