Employment History:

- De facto Infotech Pvt. Ltd., Senior Functional Consultant (Nov 2025 to March 2026)

Experienced Senior Functional Consultant with a solid background in developing, customizing, and delivering business applications and services. I focus on understanding business requirements and converting them into practical, effective solutions that align with organizational objectives. My role involves end-to-end ownership of assigned tasks — from requirement gathering and design review to testing and delivery. I take a hands-on approach to resolving technical challenges, improving business processes, and ensuring that every deliverable meets the expected quality and timeline.

- Magnum Opus IT Consulting Pvt Ltd., Functional Consultant (May 2023 to Sep 2024)
- Tata Consultancy Services Ltd., BPS & Functional Consultant (Feb 2012 Apr 2022)

- Infosys., BPS (Feb 2008 to Oct 2011)

Projects:

Project	Project Liberty for Pinkerton
Duration	22 May 2023 - 30 Sep 2024
Client	Pinkerton
Platform/tools	Microsoft Dynamics 365 CE (Filed Services)
Role &Contribution	Functional Consultant, Development & Unit testing
Description	The project aimed to enhance Pinkerton is the leading Service institution that provides services such as advisory, Security, Investigations, and other services to corporations or large businesses, as required to individual members of the public, Commercial business by implementing a comprehensive solution integrated with Dynamics 365 Finance & Operations (F&O) and CRM. The objective was to streamline operations, automate business processes, and ensure seamless synchronization between financial, operational, and customer data. I was responsible for gathering business requirements, conducting fit-gap analysis, and preparing functional design documents. I collaborated closely with business stakeholders through workshops and client meetings to refine business rules and ensure the solution aligned with operational needs. A key aspect of the project involved designing and implementing integrations between Dynamics 365 modules to enable real-time data flow across systems, improving data accuracy and reducing manual intervention. Additionally, I supported the team in functional clarifications, provided end- user training, and delivered product demonstrations to business SMEs. This initiative resulted in improved operational efficiency, enhanced visibility into vehicle and fleet data, and empowered the client with better decision- making capabilities through integrated business intelligence.

Project	Karabina
Duration	14 Sep 2020 - 22 Apr 2022
Client	Nstar
Platform/tools	Microsoft Dynamics 365 CE (Sales & Filed Services)
Role &Contribution	Functional Consultant, Development & Unit testing
Description	The project aimed to enhance Karabina's vehicle tracking and fleet management capabilities by implementing a comprehensive solution integrated with Dynamics 365 Finance & Operations (F&O) and CRM. The objective was to streamline operations, automate business processes, and ensure seamless synchronization between financial, operational, and customer data. I was responsible for gathering business requirements, conducting fit-gap analysis, and preparing functional design documents. I collaborated closely with business stakeholders through workshops and client meetings to refine business rules and ensure the solution aligned with operational needs. A key aspect of the project involved designing and implementing integration's between Dynamics 365 modules to enable real-time data flow across systems, improving data accuracy and reducing manual intervention. Additionally, I supported the team in functional clarifications, provided end- user training, and delivered product demonstrations to business SMEs.

Project	ACH 825 sub ledger.
Duration	20 Feb 2019 -31 Aug 2020
Client	Citi bank.
Platform/tools	Desktop Automation Process (Python)
Description	The project focused on automating and streamlining the processing of debit and credit transactions received through the ACH 825 sub-ledger, a core component of Citi Bank's retail banking services. The objective was to ensure accurate and efficient handling of financial transactions based on market, transaction amount, and reason type, as defined in the ACH 825 requests. I was actively involved in requirement gathering, preparing detailed Business Requirement Documents (BRDs), and designing process flow diagrams using Microsoft Visio. My role also included coordinating with the technical team for requirement clarifications, managing deliverables, and collaborating closely with business stakeholders through one-on-one discussions and workshops. Additionally, I participated in weekly client meetings to provide status updates, assisted team members in understanding business functionality, and conducted demonstrations and presentations for customer SMEs. Post-implementation, I documented the finalized process flows to support smooth transition and operational consistency. This initiative enhanced transaction accuracy, improved process, transparency, and strengthened the overall efficiency of Citi Bank's ACH 825 sub-ledger operations. and version control support.

Project	Account closed out forms
Duration	5 Mar 2018 - 10 Jan 2019
Client	Citi bank.
Platform/tools	Desktop Automation Process (.Net)
Description	The project focused on optimizing the Account Closed-Out process within Citi Bank's Retail Banking Centre of Excellence. The primary objective was to identify zero-balance accounts across two source systems, validate account details, and process closure requests based on the customer-provided closure reasons. This initiative aimed to ensure accuracy, compliance, and efficiency in handling account termination requests. I was responsible for gathering business requirements, preparing comprehensive Business Requirement Documents (BRDs), and creating detailed process flow diagrams using Microsoft Visio. My role also involved coordinating with cross-functional teams to clarify requirements, managing deliverables, and collaborating with business stakeholders through one-on-one meetings and workshops for business rule validation. Additionally, I conducted weekly client meetings for status updates, delivered demos and presentations to customer SMEs, and facilitated user training sessions to ensure a smooth transition to the new process.
