

BHARGAV KRISHNA BEVARA

Data Scientist/Python Developer/GenAI Engineer
+919502268935 • latentspacesolutions@gmail.com

Summary

AI Engineer with 8 years of experience building and deploying machine learning solutions across industrial and enterprise environments. Specialized in developing LLM applications, RAG systems, and fine-tuning language models for automated workflows. Proven track record of reducing operational inefficiencies through AI implementation - from industrial diagnostic systems to customer onboarding platforms. Currently architecting scalable AI infrastructure including LLM, TTS, STT pipelines on GPU clusters. Driven by curiosity and passion for leveraging AI to solve complex business challenges across diverse domains.

Key Achievements

- **Downtime Reduction**
Reduced equipment downtime by 900+ hours across 50+ machine types with 78% F1 score accuracy.
- **Diagnostic Optimization**
Enhanced diagnostic analysis by reducing time from 3 days to 2 hours.
- **Model Deployment Success**
Implemented 200+ machine learning models for industrial equipment monitoring.
- **Team Leadership Excellence**
Managed a cross-functional team to deliver spiderAI™ an Generative AI based Machine Diagnostic platform for Industries with improved analysis speed.

Experience

- Brane Enterprises** Hyderabad, India
Solution Leader 06/2025 - Present
 - Fine tune** language models using PEFT - LoRA Methodology to generate proprietary design patterns and solution artifacts for automation workflows.
 - Develop/Deploy/Maintain RAG-based solutions** for automating customer onboarding workflows.
 - Engineered **AI service pipelines for LLM, text-to-speech, speech-to-text, and document processing applications** deployed on internal GPU infrastructure using VLLM, among other tools.
- minto.ai** Hyderabad, India
Systems Intelligence Specialist 02/2025 - 05/2025
 - Developed ontological structures** for seamless integration of industrial knowledge bases with LLM diagnostic systems
 - Applied motor monitoring expertise** to define AI system specifications and validate performance against industry standards
 - Established success metrics** for LLM-driven industrial applications, tracking accuracy and operational impact
 - Executed field deployments** of agentic AI platforms, ensuring successful integration with existing industrial processes
 - Bridged technical domains** by translating requirements between subject matter experts and development teams
- minto.ai** Hyderabad, India
Product Lead - spiderAI™ 08/2024 - 02/2025
 - Led cross-functional product team** to develop spiderAI™ from concept to prototype/production, covering both MCSA and vibration analysis applications
 - Achieved 90% efficiency improvement** by reducing diagnostic analysis time from 2-3 days to 2 hours through strategic LLM integration
 - Established comprehensive product evaluation framework** measuring trustworthiness, accuracy, reliability, and helpfulness for industrial AI applications
 - Designed product architecture** connecting LLMs with knowledge graphs, databases, and spectrum visualization for seamless user workflows
 - Designed testing and **validation frameworks for systematic evaluation of GenAI applications** in industrial diagnostic contexts
 - Implemented **expert-mimicking diagnostic methodology** using hypothetico-deductive reasoning to ensure clinical-grade decision making for Industries.
- minto.ai** Hyderabad, India
LLM Application Developer 09/2023 - 08/2024
 - Architected agent-based LLM solutions** leveraging LangGraph for scalable industrial diagnostic automation
 - Crafted specialized learning methodologies** incorporating curated industrial case studies to enhance model reasoning through targeted few-shot approaches
 - Established application telemetry systems** providing comprehensive visibility into GenAI performance, operational costs, and system latency
 - Implemented knowledge augmentation pipelines** using Vectara RAG technology to enrich LLM responses with external expertise

Experience

minto.ai(Previously called as glitterpoint Solutions pvt ltd)

Hyderabad, India

Data Scientist

10/2017 - 09/2023

- **200+ production machine learning models** deployed across industrial equipment monitoring for enterprise clients including TATA Steel, SAIL, and Patil Rail Infra
- **Latent space anomaly detection framework** enabling out-of-distribution fault identification and continuous learning across diverse equipment types
- **Predictive maintenance system** achieving 900+ hours downtime prevention across 40 machines with 75% F1 score precision
- **End-to-end ML pipeline infrastructure** spanning data extraction through model deployment using AWS SageMaker ecosystem
- **Model explainability framework** for Motor Current Signature Analysis providing transparent diagnostic reasoning
- **On-site diagnostic implementation involving plant** visits to validate ML models in real industrial conditions and hands-on troubleshooting.

Decathlon

Hyderabad, India

Sports Leader

05/2017 - 09/2017

- **Cycling department operations** including sales, equipment installation, and comprehensive after-sales service management
- **Fitness equipment setup and customer training** covering on-site installation of treadmills, cross trainers, and trampolines across Hyderabad with equipment usage guidance

Technical Skills

Python

8 years of Python expertise spanning edge firmware to cloud ML pipelines and service deployment. Translated complex research algorithms into production code for industrial health monitoring systems, LLM-powered diagnostic platforms, and scalable AI service infrastructure.

- Tensorflow
- Pandas
- TsLearn
- Plotly
- Scipy
- FastAPI
- VLLM
- Transformers

Cloud

Extensive AWS experience deploying ML pipelines in SageMaker (both instance-based and serverless). Developed Python Lambda functions for APIs, managed S3 data workflows, and containerized applications with Docker.

- AWS Sagemaker
- AWS Sagemaker Serverless
- AWS Athena
- AWS S3
- AWS BedRock
- AWS Lambda
- Docker

Data Science/Machine Learning/AI

Designed and deployed 200+ machine learning models for industrial equipment monitoring using AWS SageMaker. Developed anomaly detection systems, latent space monitoring, and predictive maintenance solutions processing 100's of GB of spectrum data.

- Tensorflow
- Auto Encoders
- Deep Neural Networks
- Convolutional NN
- Transformers
- PyTorch
- sk-learn
- Keras
- Tableau
- Time Series Analysis
- PEFT - LoRA

Technical Skills

GenAI

Developed industrial LLM applications as Application Developer, Product Lead, and Systems Intelligence Specialist. Built multi-agent systems with knowledge integration, designed diagnostic workflows, and implemented evaluation frameworks for AI solutions.

- Prompt Engineering
- RAG
- Fine Tuning Language Models
- Knowledge Graphs
- Planner Agents
- Vector Stores
- Re-Act Agents
- Orchestration
- LangGraph
- Agentic Workflows
- LLM Application Evaluation

Language

Telugu — Native

English — Proficient

Education

G.M.R. Institute of Technology (GMRIT)
Bachelor of Technology in Computer Science Engineering

Rajam
2013 - 2017
