PROFESSIONAL SUMMARY

Results-driven Network Development Engineer with 4+ years of experience engineering and automating hyperscale data center networks (10,000+ devices) across Oracle Cloud (OCI), Juniper Networks, and Cisco environments. Expert in BGP, EVPN-VXLAN, MPLS, and Python-driven network automation. Proven track record of reducing operational overhead by 95% and resolving critical P1/P2 architecture bottlenecks. Recognized with corporate awards for technical excellence and rapid professional advancement.

TECHNICAL SKILLS

Protocols & Fabrics: BGP, OSPF, IS-IS, MPLS, EVPN, VXLAN, MC-LAG, STP, VTP, Segment Routing, ARP, DNS, DHCP

Hardware & Platforms: Cisco Nexus/Catalyst, Juniper MX/PTX/ACX/QFX/EX series, Palo Alto Networks Firewalls

Automation & DevOps: Python (Netmiko, Paramiko), Ansible, REST APIs, Git version control, CI/CD pipelines

Telemetry & Systems: Grafana, Zabbix, gNMI telemetry, Linux/Unix system administration, AWS Networking Fundamentals

PROFESSIONAL EXPERIENCE

Oracle Cloud Infrastructure (OCI) — Network Developer Engineer II

Nov 2025 – Present

- Engineer and certify next-generation hyperscale AI and cloud data center network deployments spanning 10,000+ active devices and multi-thousand rack topologies.
- Architected a Python-based network validation automation framework, reducing pre-production testing cycles by 97% (from over 10 hours down to 15 minutes).
- Perform end-to-end continuous validation of BGP, OSPF, EVPN, VXLAN, and multi-tier fabric connectivity to eliminate production-impacting regressions.
- Leverage Grafana, Zabbix, and gNMI telemetry data to construct high-visibility operational dashboards, improving deployment reliability across global regions.
- Debug and resolve complex EVPN/VXLAN fabric routing anomalies in cross-functional collaboration with SRE, Cloud Infrastructure, and DevOps teams.

Juniper Networks — Technical Support Engineer II

Dec 2023 – Oct 2025

- Spearheaded root-cause analysis and resolution for 300+ enterprise and service provider support cases, including over 100 high-severity P1/P2 production network outages.
- Restored critical production environments and core fabric infrastructure for Tier-1 healthcare and transportation customers across Europe during live infrastructure crises.
- Partnered directly with Core Engineering teams to reproduce hardware/software defects, validate hotfixes, and drive rapid software defect resolution.
- Promoted ahead of schedule (2024) and honored as Employee of the Year (2025) for exceptional technical leadership and global customer impact.

Capgemini (Cisco TAC) — Associate Engineer

Jan 2022 – Nov 2023

- Delivered enterprise-level Tier-3 TAC technical support for global Cisco Catalyst switching and ISR/ASR routing portfolios.
- Diagnosed complex Layer 2/Layer 3 infrastructure failures including spanning-tree loops, VTP misconfigurations, ARP storms, and DHCP exhaustion issues.
- Executed high-risk production software upgrades, disaster recovery procedures (ROMMON), and comprehensive end-to-end troubleshooting for Fortune 500 networks.
- Collaborated closely with engineering units to reproduce software bugs and validate production-ready patches.

KEY PROJECTS

Network Validation Automation Framework (Python, Netmiko, Git)

- Designed and scaled a multi-vendor automation framework that reduced device pre-production validation time from 10 hours to 15 minutes, standardizing configurations across hyperscale environments.

Large-Scale Multi-Vendor Upgrade Orchestrator (Ansible, Python)

- Built an automated orchestration framework capable of safely deploying OS upgrades across 1,000+ distributed Juniper routing and switching devices simultaneously while minimizing localized downtime windows.

Automated Log Analysis & Fault-Correlation Engine (Python, Regex)

- Developed log parsing and fault-correlation tooling to ingest real-time device syslog data, cutting down average troubleshooting and root-cause discovery times by 40%.

EDUCATION & CERTIFICATIONS

B.Tech in Electronics & Communication Engineering

Punjab Technical University (Graduated 2021)

Professional Certifications: AWS Cloud Fundamentals | JNCIS | JNCIA | PCNSA | CCNA
