Summary

Cybersecurity professional with extensive experience supporting CISOs and executive leadership in driving enterprise security strategy, cyber risk management, governance, compliance, and cyber resilience initiatives. Proven expertise in cybersecurity governance, vulnerability management, security operations, IAM, SIEM, cloud security, application security, third-party risk management, and security control assessments across large-scale enterprise environments. Successfully led security transformation and remediation governance programs that improved the organization's overall security posture, increasing the cloud security score from 70% to 95% through risk-driven remediation, control enhancement, and continuous security monitoring initiatives. Experienced in aligning security programs with industry frameworks including ISO 27001, NIST CSF, CIS Controls, and PCI DSS. Strong track record of partnering with Cloud, Infrastructure, Network, DevSecOps, and Development teams to reduce cyber risk, strengthen security controls, and ensure regulatory compliance. Adept at executive stakeholder management, board-level reporting, security consulting, and supporting enterprise-wide cybersecurity transformation programs that deliver measurable business value, operational resilience, and continuous improvement of the organization's security maturity.

Professional Experience

Manager – IT & Cyber Risk | Grant Thornton Bharat LLP, Bengaluru, India

June 2025 - Present

- Partnered directly with the CISO and senior leadership to define, implement, and drive enterprise-wide cybersecurity strategy, aligning security initiatives with business objectives, regulatory requirements, and organizational risk appetite.
- Led information security governance and security operations by collaborating with enterprise architects, infrastructure teams, cloud teams, application owners, and business stakeholders to embed security controls, secure architectures, and cybersecurity best practices across the organization.
- Supported the CISO in driving enterprise cybersecurity governance, risk, and compliance initiatives across key security domains including EDR, SIEM, DFIR, PKI, SSO, Microsoft Entra ID, Active Directory, Identity Lifecycle Management, User Access Reviews, Third-Party Risk Management (TPRM), Risk Assessments, and Security Control Testing.
- Developed and maintained comprehensive Incident Response and Cyber Crisis Management frameworks, leading security investigations, threat analysis, root cause assessments, post-incident reviews, and remediation activities to strengthen organizational cyber resilience.
- Managed end-to-end Vulnerability Management programs, including Internal VA, ASV Scan, Internal PT, External PT, Configuration Audit, Segmentation PT, Rogue WiFi Scan, Risk-based prioritization, remediation tracking, patch governance, executive reporting, and closure validation across network, cloud, servers, databases, and applications.

- Coordinated with Network, Cloud, Infrastructure, DevOps, and Development teams to implement secure configurations, address critical vulnerabilities, enforce security baselines, and ensure timely remediation in line with regulatory and organizational security requirements.
- Extensive experience in implementing and maintaining compliance with **PCI-DSS, ISO 27001, ISMS, NIST CSF, RBI Cyber Security Framework (RBI-CSF)**, and regulatory audit requirements.
- Performed IT Risk Assessments, Gap Assessments, Security Control Reviews, and Risk Treatment Planning while supporting management and risk committees in identifying, evaluating, and mitigating cybersecurity risks impacting business operations.
- Hands-on expertise in Secure SDLC, Static Application Security Testing (**SAST**), Dynamic Application Security Testing (**DAST**) and OWASP-based security assessments to strengthen application security posture.
- Supported regulatory, statutory, and internal audit programs by ensuring timely closure of audit observations, maintaining compliance evidence, tracking remediation activities, and improving overall audit readiness and security maturity.
- Contributed to cybersecurity awareness initiatives by conducting security training sessions, stakeholder workshops, phishing awareness campaigns, and security advisory communications for employees and management teams.
- Demonstrated strong leadership, stakeholder management, and cross-functional collaboration skills while working with global teams, managing security incidents, driving strategic cybersecurity initiatives, and supporting business continuity objectives.
- Leveraged industry-leading cybersecurity technologies including **Nessus, Qualys, Wiz Cloud, Prisma Cloud, Microsoft Sentinel, KQL, SIEM, Nmap, Kali Linux, CSPM, CWPP, Jira, ServiceMax, XMCO** to enhance threat detection, vulnerability management, cloud security, and security operations effectiveness.

Project Manager | Samona Limited, London, United Kingdom
June 2024 – May 2025

- Supported the CISO in overseeing enterprise Security Operations and Incident Response functions, serving as the escalation focal point for critical cybersecurity incidents, complex investigations, and high-risk security events to ensure timely resolution and effective risk mitigation.
- Partnered with the CISO to drive SOC maturity and operational excellence initiatives, providing guidance, governance, and capability development across L1/L2/L3 security teams to enhance detection, response, and operational effectiveness.
- Led and supervised major security incident investigations, coordinating cross-functional teams to perform root cause analysis, validate findings through log analysis, assess business impact, and provide executive-level reporting and recommendations.
- Supported the CISO in advancing Threat Intelligence and Threat Hunting programs by overseeing proactive threat detection activities, identifying emerging threats, and strengthening organizational resilience against advanced cyber adversaries.
- Acted as a trusted cybersecurity advisor to business and technology stakeholders, delivering risk-based security insights, recommendations, and governance support to improve security posture and support informed decision-making.

- Directed enterprise vulnerability and risk assessment initiatives, leveraging security tools and threat intelligence to identify, prioritize, and communicate risks based on exploitability, business impact, and organizational exposure.
- Collaborated with Cloud, Infrastructure, Network, DevSecOps, and Development teams to establish remediation strategies, oversee risk treatment plans, and drive security improvements that reduce the organization's attack surface.
- Supported the CISO in the governance and expansion of Security Operations Center (SOC) capabilities, including onboarding new services, enhancing monitoring use cases, and optimizing Microsoft Sentinel-based detection and response programs.
- Governed Vulnerability Management programs by overseeing security assessments, tracking remediation efforts, validating risk reduction activities, and reporting security posture improvements to executive leadership.
- Utilized enterprise security technologies including **Microsoft Sentinel, SIEM, EDR, Microsoft Defender for Endpoint, Qualys, MITRE ATT&CK, KQL, and Python** to support security monitoring, threat detection, Risk Assessment, and strategic cybersecurity initiatives.

SOC Lead Specialist | Fortuna Identity Pvt. Ltd, Hyderabad, India

Duration: March 2022 - May 2024

- **Data Loss Prevention and Incident Management:** Monitor and respond to potential threats to ensure systems and data confidentiality, integrity, and availability.
- **Event/Event Analysis:** If enough agents are deployed to IDS, IPS, firewall, server, and any other security device, logging is performed to detect significant security or anomalies.
- **Use of Microsoft Sentinel SIEM:** Microsoft Sentinel collects and correlates security data, making it easier to detect and investigate threats.
- **Azure Lighthouse and Detection Config:** Create Azure Lighthouse scripts to onboard customers' tenants, configure detection analytics rules, define a data connector, and challenge KQL queries to improve visibility.
- **Incident Documentation and triaging:** Triage and prioritize incidents, document actions taken, gather evidence, and record remediation steps and lessons learned.
- **Stakeholder communication and security awareness:** Communicate clearly with stakeholders, provide updates on security incidents, work with team members, and promote security best practices across the organization.

Digital Forensic Consultant - Glorywebs Creative Pvt. Ltd., Ahmedabad, Gujarat, India

Duration - April 2019 - February 2022

- Supported crime investigations in a forensic capacity that led to multiple successful prosecutions (child exploitation, money laundering, and fraud investigation) that directly resulted in industry regulation and changes in law enforcement methodologies.
- I have worked with law enforcement agencies such as the Central Bureau of Investigation, Goods and Service Tax Department, and Income Tax Department to support fraud and criminal investigations, supporting more industry-wide anti-fraud efforts.
- Assisted in producing user guides and writing SOPs for technician processes as part of onboarding new starters and knowledge embedding.

- Forensic tools through copying digital evidence and securing data integrity and admissibility of digital data.
- Oversee the examination of data pulled from computers, smartphones, and hard drives to various forensic devices. Understand Windows artifacts on the file system level.
- Have hands-on experience with forensics hard drives. The suspect attempted to wipe, delete, or refer to ID, Marking a hard drive with improper identification. Hardware fixes on phones; data retrieval.
- Write a statement and create a report that was later submitted to the court.
- **Tools Used: FTK, EnCase, Oxygen Forensic, Intella, Deft Zero, MobileEdit, BackupTrans**

Founder/Director - Global IT Solutions– Bharuch, Gujarat, India

Duration – July 2017 - March 2019

IT Consulting and Services, Hardware Supply, Troubleshooting and AMC Services.

IT Specialist - Trio Hat Intelligence, Bharuch, Gujarat, India

March 2013 - June 2017

Provided end-to-end IT support including system maintenance, troubleshooting, network management, and implementation of secure and efficient technology solutions.

Education

Master of Technology (M.Tech) in Cybersecurity

Rashtriya Raksha University, Gandhinagar, Gujarat, India

CGPA: 7.89 out of 10

Bachelor of Engineering (B.E.) in Information Technology

Gujarat Technological University, Ahmedabad, Gujarat, India

CGPA: 7.12 out of 10

Certifications and Achievements

- **Certified Information Security Manager (CISM) – ISACA**
- **Innovation Excellence Award** at ROI E-Solutions – October 2024
- **SC-200: Microsoft Security Operations Analyst – April 2024**
- **Cyber Security Summer Internship: Gurugram Police – July 2021**

Mentoring and Volunteer Work

Contribution to Security Operations Center with Microsoft Sentinel Mentoring Program

September 2024 to December 2024
