PROFESSIONAL SUMMARY

- Over all **4+ Years** of IT experience and **4 years** relevant hands-on-experience as **SERVICENOW DEVELOPER**.
- Expertise in ServiceNow modules such as **ITSM, CMDB, ITOM, CSM, ITAM, HRSD, GRC, IRM**.
- Extensive experience in Business Rules, Client Scripts, UI Policies, UI Actions Script Includes, ACLs, Flow Designer, Flows Notifications.
- Experience in Implementation, Customization and Maintenance of ITSM modules such as Incident Management, Change Management, Problem Management, Service Catalog and User Administration in Service Now.
- Attended daily stand-up meetings with Business Analysts, Product Owners, and stakeholders.
- Understanding new requirements, enhancement requests, and defect fixes.
- Good knowledge of Web application development technologies such as HTML JavaScript, CSS, AJAX, XML.
- Experience in client-side development with **JavaScript, jQuery, JSON, and HTML**.
- Consume external APIs and expose ServiceNow APIs & Troubleshoot integration failures and monitor API transactions.
- Design approval workflows and automate business processes using Flow Designer.

EDUCATIONAL QUALIFICATION:

Bachelor of Science (B.Sc) under Tumkur university from Kalpataru First grade college, Tiptur

PROFESSIONAL EXPERIENCE:

Working as **ServiceNow Developer** for **Inventus Info Consulting (INFOSYS)**, Bangalore from April 2022 to till date

CERTIFICATIONS

CSA (Certified System Administrator) is completed and CAD (Certified Application Developer) is currently in progress.

TECHNICAL SKILLS:

ServiceNow: ITSM, ITAM, ITOM, CMDB, Discovery, Service Mapping, Service Catalog, Flow Designer, Integration Hub, HRSD, CSM.

Scripting: JavaScript, Glide API, Glide Record, Business Rules, Client Scripts, Script Includes, ACLs

Integrations: REST APIs, SOAP APIs, MID Server, OAuth 2.0

Database: Import Sets, Transform Maps, Data Sources

Project Details:

Project 1:

Project	HYGO
Description	The project focused on implementing ServiceNow HR Service Delivery (HRSD) to automate HR processes such as employee onboarding, offboarding, case management, document management, and employee self-service. The objective was to improve employee experience, reduce manual HR activities, and streamline HR operations across multiple business units.
Technologies	ServiceNow HRSD, Employee Center, Flow Designer, Service Catalog, JavaScript, Business Rules, Client Scripts, Script Includes, Notifications, REST APIs
Responsibilities	• Configured HR Services, HR Case Categories, and HR Templates based on business requirements. • Developed custom HR Catalog Items and Record Producers for employee requests. • Created Lifecycle Event (LE) activities for employee onboarding, internal transfers, and offboarding. • Configured HR Assignment Rules, Escalation Rules, and Auto Assignment. • Developed HR Agent Workspace components and customized workspace layouts. • Configured HR Knowledge Base and Employee Centre Portal. • Implemented Document Management for HR policies and employee documentation. • Developed reusable Script Includes, Business Rules, and Client Scripts for HR applications. • Configured ACLs to protect sensitive employee information using HR Criteria.

	• Implemented Flow Designer for HR Case automation and approval workflows. • Configured Notifications, Email Templates, and Scheduled Reports. • Developed REST integrations with Workday, Active Directory, and Payroll systems.
--	---

Project.2

Project	NEXTEC
Description	The project focused on improving Configuration Management Database (CMDB) health by implementing Discovery, Service Mapping, Identification and Reconciliation Engine (IRE), and CMDB Data Manager. The objective was to improve Configuration Item (CI) accuracy, automate infrastructure discovery, and establish service relationships for better IT Operations visibility.
Technologies	ServiceNow CMDB, Discovery, Service Mapping, IRE, MID Server, JavaScript, Flow Designer, REST APIs
Responsibilities	• Configured Discovery schedules for Windows, Linux, VMware, Network Devices, and Cloud resources. • Installed, configured, and upgraded MID Servers across multiple environments. • Customized CI Class Manager and CMDB Data Model. • Integrated Discovery with AWS, Azure, VMware, and Kubernetes environments. • Configured Event Management integrations with SolarWinds, Dynatrace, Splunk, and Nagios. • Created REST API integrations for CI synchronization with external asset repositories. • Implemented Service Mapping for critical business applications. • Customized Discovery Patterns and Probes. • Worked on Identification & Reconciliation Rules (IRE). • Improved CMDB Health Dashboard and Data Certification. • Developed Business Rules, Script Includes, and Client Scripts. • Integrated third-party inventory tools using REST APIs. • Created reports for CI completeness and compliance. • Supported production issues and Discovery troubleshooting.

DECLARATION:

I hereby declare that the information furnished above is true to the best of my knowledge.
