PROFESSIONAL SUMMARY

Results-driven Business Analyst and Certified Scrum Product Owner (CSPO) with **10+ years of experience** in the Banking domain. Skilled in bridging business and technology across Product Management, Product Ownership, Business Analysis, Project Management, and Scrum Master functions. Expertise in requirement gathering, product backlog management, stakeholder engagement, process optimization, and Agile/SAFe delivery. Proven record of leading large-scale banking transformations — including Core-Banking API development and ORMB migration — with measurable impact on efficiency, billing accuracy, and on-time delivery.

CORE COMPETENCIES

- Requirement Gathering & Analysis
- Product Backlog Management & Refinement
- User Stories & Acceptance Criteria
- Gap Analysis (AS-IS & TO-BE)
- Process Mapping & Optimization
- Stakeholder Management & Engagement
- SAFe & Agile Framework
- PI Planning & Sprint Ceremonies
- Product Roadmap Planning
- Release Planning & Deployment Readiness
- Business Requirements Document (BRD / FRD)
- Impact Analysis & Change Management
- UAT Facilitation & Sign-off
- Cross-functional Team Leadership
- API Documentation (Swagger / JSON)
- Risk Assessment & Feasibility Analysis

CERTIFICATIONS

- **Certified Scrum Product Owner (CSPO)** — Certificate ID: 001349649
- **Professional Scrum Master™ I (PSM I)** — Certificate ID: 1300801

PROFESSIONAL EXPERIENCE

Senior Business Analyst

Capgemini — Pune

December 2021 – Present

Project 1: Core-Banking API Development

Served as the primary Business Analyst and Product Owner for a Core-Banking API initiative, driving end-to-end delivery from requirements through production deployment.

- **Product Ownership:** Developed and managed a prioritized product backlog aligned with business objectives; decomposed epics into actionable user stories and sprint backlogs to ensure timely delivery of high-value features.
- **Business Analysis:** Facilitated requirement-gathering workshops, interviews, and end-to-end sessions with business stakeholders to define scope, feasibility, and acceptance criteria.
- **API Documentation:** Authored Swagger (JSON/OpenAPI) API specifications, reducing development delays by **25%** and accelerating engineering team kick-offs through clear, standardized documentation.
- **Project Planning:** Developed project plans covering scope definition, resource requirements, timeline estimation, and risk analysis to drive on-time delivery.
- **Stakeholder Bridge:** Acted as the liaison between business stakeholders and development teams, ensuring shared understanding of requirements and resolving ambiguities proactively.
- **Scrum Master:** Facilitated all Scrum ceremonies — Sprint Planning, Daily Stand-ups, Sprint Reviews, and Sprint Retrospectives — driving team collaboration, velocity, and continuous improvement.
- **Release & Deployment:** Managed end-to-end product releases in coordination with development and QA teams; monitored post-release performance and triaged bugs to ensure minimal end-user disruption.
- **Cost & Timeline Estimation:** Delivered cost estimates for in-scope APIs and release timelines, ensuring stakeholder alignment with business priorities.

Project 2: Germany Legacy-to-ORMB Migration (Oracle Revenue Management & Billing)

Led the business analysis and product ownership activities for Germany's transition from legacy banking systems to the ORMB platform.

- **Data Migration:** Oversaw migration of customer and account data from legacy systems to ORMB with zero data loss, ensuring data integrity and seamless system transition.
- **Pricing & Billing:** Designed and implemented standard and exception pricing setups, improving billing accuracy by **15%** and reducing revenue leakage.
- **Process Optimization:** Partnered with business stakeholders and architects to design inbound/outbound file structures, cutting processing time by **20%** and improving operational efficiency.
- **Multilingual Deliverables:** Developed invoice templates in English and German, enhancing customer satisfaction and ensuring regional compliance.
- **Financial Reporting:** Delivered critical financial reports (Product Revenue Report, Customer Account Revenue Report) enabling data-driven leadership decisions.
- **Requirements Engineering:** Conducted requirement-gathering sessions using interviews, workshops, brainstorming, and focus groups; authored and maintained BRD, FRD, user stories, acceptance criteria, and process flowcharts.
- **Cross-functional Collaboration:** Streamlined communication between cross-functional teams and stakeholders, achieving a **25%** reduction in project turnaround time.
- **Global Integration:** Collaborated with senior architects to design custom file solutions ensuring global standards alignment and seamless system integration.

Business Analyst

State Bank of Mauritius (SBM) — Mumbai

December 2019 – December 2021

Project 1: PAN Card Integration — Finacle Banking Application

- Gathered and documented requirements for PAN card field integration into Finacle, improving regulatory compliance and data accuracy.
- Coordinated with Infosys and business stakeholders to design, test, and deploy the feature within agreed timelines.

Project 2: Mass Screening via Compass — Compliance Verification

- Led regulatory compliance checks on bulk customer uploads via Compass, achieving **100%** compliance and timely processing.
- Designed and validated UAT test scenarios; secured formal business sign-off.

Key Responsibilities — SBM

- Processed and managed SWIFT payments and MT messages (MT103, MT202, MT202COV) facilitating secure, efficient cross-border transactions.
- Applied knowledge of SWIFT MT/MX message types (ISO 20022) and SEPA payment products including SCT, SDD, and Instant SCT.
- Gathered, documented, and translated business requirements into user stories, acceptance criteria, and actionable project plans.
- Conducted competitive analysis and gap analysis (AS-IS & TO-BE) to identify and recommend fit-for-purpose business solutions.
- Managed product backlog prioritization and participated in full Agile ceremony cycle: Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives.
- Served as primary point of contact for project activities, coordinating with delivery managers and SMEs to ensure timely delivery.

Business Analyst

Deutsche Bank Group — Pune

September 2015 – December 2019

Project: Ko-fax Compliance Application — Operations Team

- Led end-to-end implementation of the Ko-fax Compliance application, reducing manual effort by **30%** and improving compliance accuracy.
- Facilitated UAT, gathered feedback, and coordinated iterative improvements to meet business and regulatory requirements.

- Conducted regulatory compliance checks on bulk customer uploads ensuring **100%** adherence to compliance standards within defined TAT.
- Collaborated with cross-functional teams to integrate the application into existing workflows, reducing processing errors and enhancing operational efficiency.
- Provided post-implementation support ensuring smooth user adoption and long-term solution sustainability.

TECHNICAL SKILLS

Project & Agile Tools:	JIRA, Confluence, Miro, Microsoft Visio, Draw.io
