📍 Bangalore, India

## PROFILE

Business Analyst/Product owner with 7+ years of experience and strong domain expertise in banking, payments, and regulatory systems. Experienced in NPCI and Aadhaar integrations, API-based solutions, requirement analysis, and functional documentation (BRD/FSD). Adept at coordinating with business users, banks, vendors, and internal teams to deliver compliant payment and digital banking solutions.

## JOB RESPONSIBILITY

- Led end-to-end requirement elicitation and analysis for banking, payments, and regulatory systems using Agile (Scrum) and Traditional SDLC methodologies.
- Delivered solutions across NPCI payment rails including NACH, UPI Autopay, e-Mandate, Paper Mandates, ONMAGS, and Aadhaar-based services, acting as a liaison between client, product, and technology teams.
- Prepared and owned BRD, FRD/FSD, approach documents, solution scope, and interface analysis, ensuring requirement traceability and regulatory alignment.
- Experience working with Indian as well as international banks, with exposure to diverse business requirements, regulatory environments, and cross-border collaboration
- Designed and reviewed end-to-end mandate and payment flows (inward/outward), including validation, reconciliation, exception handling, and impact analysis.
- Acted as a Subject Matter Expert (SME), providing integrated business and technical solutions aligned with banking, compliance, and market requirements.
- API-based integrations between Core Banking Systems, NPCI, and third-party platforms, ensuring functional correctness and adherence to standards.
- Worked on information security and compliance initiatives, including Application security, Network VAPT, SOC 2, ISO 27001:2022, and PCI DSS, coordinating internal and external audits.
- Ensured compliance with security, audit, and regulatory requirements, including evidence preparation, audit observations closure, and risk mitigation.
- Identified data requirements, performed SQL-based data extraction and validation, and delivered insights through Power BI dashboards.
- Created business process flows, use cases, UML/sequence diagrams, and supported UAT planning, defect management, business sign-off, and production support.

Product Management | Business Analysis | Requirement Elicitation | Gap Analysis | Stakeholder Management | JAD Session | Agile Methodology | SDLC | Wireframing | Team Management | Process Automation | BRD | FRD | Use Cases | User Stories | Market Research | Statistics | SQL | Tableau | Power BI | Dashboard | Postman collection | API | Python | Swift Payments | MT103 | Payment gateways | KYC/ Compliance | NPCI | NACH | UPI | Retail Banking | Trade Finance | NACH Payment | Banking | Insurance

## PROFESSIONAL EXPERIENCE AND PROJECTS

### 1. PAYCORP SOLUTIONS PVT LTD

04/2024 – Present

Project 1- NPCI Mandates & Payment Platform(NACH, UPI Autopay, APBS)

- Worked on end-to-end NPCI-aligned project supporting NACH, UPI Autopay, e-Mandate, Paper Mandates and Aadhaar-based services (Aadhaar Seeding/Deseeding, APB credit, BASE).
- Led requirement gathering for the complete mandate and transaction lifecycle, including onboarding, validation, execution, reconciliation, and exception handling.
- Prepared BRD, FRD/FSD, solution scope, and process flow documents in line with NPCI and bank regulatory guidelines.

- Designed and reviewed inward and outward mandate and payment flows, covering authentication, consent, settlement, and reversals.
- Coordinated with banks, NPCI and internal stakeholders to support UAT, certification, audit readiness, and production go-live.
- Supported onboarding and processing of 1+ million records, achieving >99% mandate success rate post go-live

### **Project 2: API-Driven Rent Collection & Mandate Platform**

- Worked on API-driven integration project for Sohar International bank connecting Core Banking Systems, CBO, and partner platforms for rent collection
- Gathered and analyzed requirements for APIs including account enquiry, authentication, UI design, mandate execution, debit/credit posting, and status callbacks.
- Performed interface analysis and data mapping, ensuring secure and reliable data exchange across systems.
- Acted as a liaison between business, product, and development teams to deliver scalable, compliant, and high-availability integrations.
- Improved turnaround time for mandate execution and status updates by 30–40% through streamlined API flows.
- Configured Postman requests for seamless integration and testing of web services, ensuring optimal performance and reliability.
- Supported development processes, monitored deployments, and ensured smooth functionality post-implementation.
- Managed integrations over APIs and web services, enabling efficient communication and data exchange between systems.

### **Project 3: Regulatory, Audit & Information Security Compliance**

- Supported information security, regulatory, and audit initiatives in the organisation.
- Actively involved in VAPT, SOC 2, ISO 27001:2022, and PCI DSS audits, including coordination with auditors and internal teams.
- Assisted in control documentation, evidence collection, audit observation tracking, and remediation closure.
- Ensured compliance with security, audit, NPCI, UIDAI, and regulatory requirements across applications and processes.
- Worked with stakeholders to mitigate risks and support audit sign-off and regulatory readiness.
- Supported 100% audit closure on time across VAPT, SOC 2, ISO 27001, and PCI DSS with zero critical observations

### **2. BARODA GLOBAL SHARED SERVICES LIMITED**

03/2021 – 04/2024

- Elicited and documented business requirements for payments and trade finance by collaborating with cross-functional stakeholders, translating complex business needs into actionable functional and technical specifications
- Led gap analysis and automation for International Wire Payment via inward SWIFT messaging (MT103), google payments, and cross-border transaction initiatives, ensuring comprehensive data mapping and compliance adherence
- Facilitated stakeholder workshops and requirement walkthroughs between business units, technology teams, and vendors to ensure solution alignment with business objectives and regulatory frameworks
- Enhanced the existing mobile application by integrating outward forex transactions, loans, insurance, and reinsurance services into a unified platform for improved customer convenience and usability.

### **3. INNODATATICS INC(Internship)**

02/2020 – 02/2021

Project name - Term deposit subscription

Problem Statement - There has been a revenue decline for the bank and they would like to know what actions to take. After investigation, it was found out that the root cause is that customers are not depositing as frequently as before. Knowing that term deposits allow banks to hold onto a deposit for a specific amount of time, so banks can invest in higher-gain financial products to make a profit. As a result, the bank would like to identify existing customers who have a higher chance to subscribe for a term deposit and focus marketing efforts on such customers. Workflow- Problem identification, Requirement elicitation, documentation, database, export data from database to CSV format to get data insights, dashboarding, architecture, development, testing, and integration to the system. Tools- Google Docs, SQL, Power BI, Python.

### **4. AXIS BANK LTD**

06/2018 – 01/2020

Different Data-driven customer-centric approaches to target customers for getting high accuracy in pitching products like Insurance, Reinsurance, Mutual funds, Term deposits, Auto Loans, Home Loans, Cash Credit, Education Loans, Personal Loans, Corporate Banking, Term Loans, Overdrafts, Credit cards. Maintaining a portfolio of HNI customers using Microsoft Excel for quick and better services. Handling NEFT, RTGS, CASA, Forex Prepaid / Wallets.

## **EDUCATION**

### **Post Graduate Diploma in Banking, Finance and Services**

MANIPAL SCHOOL BANKING

### **Bachelor of Technology- Electrical Engineering**

GIET University
