

Ch Prashant

SENIOR ANALYST

+91 9347591393 | prashantchigulla@gmail.com | Marathalli, Bengaluru, India

PROFESSIONAL SUMMARY

Results-driven **Senior Analyst – Fund Accounting & Financial Reporting** with **4.11 years of experience** supporting end-to-end fund financial reporting processes across Private Equity, Real Estate, Hedge Funds, and Mutual Funds. Proven expertise in leading quarterly and annual **financial statement close cycles (US GAAP/IFRS)**, preparing financial statement disclosures, workpaper review and sign-off, **Big 4 audit execution**, third-party service provider oversight, fee and waterfall calculations, and investor reporting — consistently delivering near-zero error-rate fund deliverables at **HSBC**. Experienced in owning workstreams, coaching junior team members, and driving efficiency through process improvement and automation. Proficient in **Investran, Geneva, Bloomberg Terminal, CapIQ, Advanced Excel, Power BI, and SQL**.

PROFESSIONAL EXPERIENCE

Senior Analyst | HSBC
Bengaluru, India

June 2022 – Present

Preparation of Financial Statements

- Led end-to-end close-to-reporting execution for quarterly and annual fund financial reporting cycles across Private Equity, Real Estate, and Mutual Funds — aligning inputs from general ledger, portfolio operations, valuation, treasury, and fund administrators while managing calendars, dependencies, and cutoffs.
- Independently prepared, reviewed, and signed off on financial statements, footnotes, and supporting schedules applying US GAAP and IFRS standards across multi-jurisdiction fund structures including 40 Act and non-40 Act vehicles.
- Reviewed and approved key workpapers and tie-outs — trial balance to financials, roll forwards, and lead schedules — ensuring completeness, auditability, and consistent presentation across fund classes and share classes.
- Prepared and reviewed financial statement disclosures covering investments, fair value, capital activity, related parties, and commitments and contingencies — coordinating inputs and maintaining complete source support for each disclosure.

Financial Reporting

- Served as the final quality gate for all fund deliverables — NAV packs, investor reports, and financial statements — before client submission, maintaining a near-zero error rate across all reporting cycles.
- Delivered period-over-period variance and trend analytics across fund portfolios, translating AUM, income, and expense drivers into clear, leadership-ready narratives for senior stakeholders.
- Coordinated regulatory reporting support by providing schedules and source data to internal tax and compliance teams and external providers.
- Led process documentation, controls, and quality reviews — checklists, sign-offs, and reconciliations — identifying gaps and implementing remediation to reduce reporting risk.
- Drove continuous improvement initiatives including standard templates, reconciliation automation, and workflow optimisation to improve cycle time, reduce errors, and increase transparency.

Investor Services & Capital Activity

- Managed the complete subscription and redemption cycle for Mutual Funds — including AML/KYC verification, unit allotment, and confirmation dispatch — maintaining accurate unit-holder register and investor records with zero errors on investor-facing documents.
- Processed dividend declarations, income distributions, and reinvestment instructions, ensuring accurate unit-holder entitlements and timely payment processing.
- Sole reviewer for capital call notices, distribution waterfall calculations, and LP capital account statements across PE and Real Estate funds — directly impacting investor trust and fund financial reporting integrity.
- Supported and reviewed investor reporting packages — capital account statements, capital activity schedules, and performance summaries — with a consistent zero-error rate.

Fee & Waterfall Calculations

- Independently calculated and validated management fees, performance/incentive fees, carried interest (multi-tier waterfall structures including preferred return, GP catch-up, and carry splits), TER, and fund expense allocations per LPA terms and prospectus.
- Reviewed complex accounting activities impacting reporting — including capital calls, distributions, allocations, management and performance fees, and expense allocations — ensuring accurate reflection in financial statements.

- Detected and corrected fee calculation errors prior to investor billing, preventing financial and reputational risk to the fund and the firm.

Reconciliation & Exception Management

- Led multi-system reconciliations between Investran/Geneva and portfolio records; conducted daily, monthly, and annual reconciliations of fund holdings, cash balances, and trade data — resolving exceptions within defined SLA windows.
- Performed trade and cash reconciliations between internal records and prime broker/custodian statements, ensuring zero unresolved breaks ahead of period-end close.
- Managed post-settlement exceptions and failed trade investigations, coordinating with counterparties and custodians to resolve breaks within defined SLA windows.

Audit & Compliance

- Directed audit execution including PBC coordination, walkthrough support, variance explanations, and evidence compilation — anticipating auditor questions and driving timely closure of year-end and interim audits.
- Oversaw third-party service provider deliverables from fund administrators, custodians, and valuation agents — resolving exceptions through structured issue management and clear governance frameworks.
- Supported preparation of regulatory filings and compliance reports, ensuring adherence to applicable regulatory requirements and industry standards.

Transaction Processing & Portfolio Accounting

- Executed daily transaction processing covering trade settlements, income and expense accruals, and corporate actions — ensuring accuracy and compliance with fund guidelines across PE, Real Estate, and Mutual Fund portfolios.
- Reviewed and posted investment transactions, corporate actions, income events, and fair value adjustments across the full investment lifecycle, maintaining investment books and records (IBOR) integrity.
- Provided day-to-day team leadership through work planning, coaching, and review feedback — escalating risks and issues early while maintaining strong client and stakeholder communications.

Analyst – Trade Operations | Groww (Next Billion Technologies Pvt. Ltd.)

May 2021 – June 2022

Bengaluru, India

- Managed end-to-end trade lifecycle across equities and derivatives including trade confirmation, validation, clearing, settlement, and reconciliation; minimised operational risk through on-time settlement across multiple instruments.
- Developed MIS reports tracking trade volumes, settlement efficiency, pending exceptions, and KPI trends; monitored and maintained data pipelines and dashboards to ensure accurate trade and operational data.

EDUCATION

MBA – Finance	AIMS IBS Business School / Bengaluru University	2019 – 2021
B.Com	Ambedkar University	2016 – 2019
