SUMMARY

Results-oriented **Payments Business Analyst** with over **7 years** of total work experience. Proven expertise in analysing, designing, and optimizing payment schemes and workflows across several EMEA countries and **SWIFT**. Strong background in **CBPR, SWIFT, regulatory compliance** (PSD2, GDPR), payments standards (**ISO 20022, SWIFT MT**) and **payment related technologies** (Volante). Skilled in **functional specifications, troubleshooting, cross-border payments, RTGS and ACH payments**, and **Agile delivery**. Adept at collaborating across architecture, engineering, and program teams to deliver robust payment transformation solutions.

CORE COMPETENCIES

Payment Schemes (CHAPS, SEPA); ISO 20022, SWIFT, CBPR; Payment Regulations: PSD2, GDPR; Cross-border Payments; Global PAYplus (GPP); IBM MQ; SDLC, Project Management, Agile Methodologies, Jira, Confluence; Functional & Non-Functional Requirement Gathering; Payment Orchestration & Infrastructure; Business Process Modelling: BRD, FRD, Use Cases

SKILLS & TOOLS

JIRA; Confluence; SQL; Visio; Postman; Volante; SOAP/REST APIs

PROFESSIONAL EXPERIENCE

1. Infosys Limited; Pune, Maharashtra

Business Analyst

Sep 2020 – Present

- **Managed end-to-end project coordination** for SWIFT MT to ISO20022 payment transformation projects, overseeing delivery timelines, risk tracking, and cross-functional team alignment across BA, development, QA, and infrastructure teams.
- Led end-to-end business analysis for the migration of a global bank's legacy MT based payment system to ISO20022, improving STP rate by **22%**.
- Created comprehensive functional specifications and integration designs using ISO 20022 for multiple payment channels.
- Acted as liaison between business stakeholders and technical teams, ensuring traceability from business objectives to technical deliverables.
- **Led project governance and stakeholder management activities** including project reviews, status reporting, RAID tracking, dependency management, and executive-level updates for multiple domestic and cross-border payment workstreams.
- Coordinated release management and implementation planning for critical payment system deployments, driving cutover readiness, environment synchronization, defect triaging, rollback planning, and post-production stabilization activities.
- Collaborated with the architecture team to document non-functional requirements including scalability and resiliency for real-time payment processing.
- Worked closely with business team, solution architects, and client stakeholders to manage project deliverables, prioritize payment enhancement initiatives, track resource dependencies, and ensure successful delivery within Agile project timelines.
- Developed **business cases** and **process maps** for transforming manual reconciliation process into an automated flow, reducing processing time by **25%**.
- Conducted business process assessments for mid-sized clients adopting Volante, focusing on UK domestic payment integration.
- **Designed and maintained** Business requirement documents (**BRDs**), Functional Requirement Documents (**FRDs**) and Interface Control Documents (**ICDs**) for SEPA payments.
- Reviewed and implemented data privacy and security recommendations to meet GDPR requirements during onboarding and transaction processing.
- Drafted **user stories** and contributed to sprint planning and backlog grooming in Agile environment for payment system enhancement initiatives of several EMEA based countries.
- Identified and resolved production issues in Volante-based translation services due to malformed SWIFT MT messages.
- Worked closely with Volante product integration teams to map legacy payment interfaces to the modified payment messaging system, ensuring zero data loss and incorporating sanctions screening.
- Defined and documented asynchronous messaging requirements using **IBM MQ** for payment processing, including queue structures, message flows and integration with **Volpay**.

- Gathered and documented API requirements for payment services (initiation, validation, status tracking), including endpoint definitions, request/response schemas (JSON/XML), and mapping with ISO 20022/MT message formats.
- Designed and documented **cross-border payment flows** using SWIFT MT and ISO MX formats involving correspondent banking setups.
- Facilitated Agile ceremonies, wrote user stories, and collaborated with QA to define UAT scenarios for domestic and international payment journeys.

Key Achievements:

- Detected a bottleneck in payment authorization flow of a EMEA country due to outdated compliance rule triggers; recommended and implemented a rule update, reducing transaction drop rate by **15%**.

2. Electrosteel Steels limited; Bokaro, Jharkhand

Associate Business Analyst

Jul 2015 – Mar 2017

- Led the centralized Production dashboard integration project – aligned workflows with compliance standards.
- Involved in requirement gathering, coordinating with the stakeholders, user story writing and UA testing in the above projects.
- Acted as a bridge between product, technology, and customer service teams, leading to a faster feedback loop and agile improvements.
- **Real-time Troubleshooting:** During a system rollout, proactively identified a data sync issue affecting user authentication. Collaborated with developers and DBAs to implement a patch within 24 hours, minimizing user impact.

Key Achievements:

- Improved user experience in accessing all the in-detailed production data in one platform, resulting in quick, informative, data-driven decision-making by the individual production units and the higher management.

EDUCATION

- **Master of Business Administration, Finance**

Institute of Management Studies, Banaras Hindu University
2018-2020; CGPA: 7.66

- **Bachelor of Engineering, Electrical Engineering**

Indian Institute of Engineering Science and Technology, Shibpur
2011-2015; CGPA: 8.08

- **Schooling**

Howrah Vivekananda Institution | 12th | 2010 | WBCHSE | 85.43%
Howrah Vivekananda Institution | 10th | 2008 | WBBSE | 82.22%

CERTIFICATIONS

ISO 20022 for Payments Business Analysts; Basics of MT and MX messages; Agile Scrum in Practice; Application of Generative AI in Product Management; FRM Level 1; Basics of Data Science and AI; NISM series 15 research analyst, series 8 equity derivative and series 5A mutual fund distributor

ACHIEVEMENTS

Received Certificate of appreciation as the employee of the month from the domain head in Infosys.

LANGUAGE PROFICIENCY

English, Hindi, Bengali
