- SQL
- Power BI
- Tableau
- Dashboarding
- Data Validation
- Business Analytics
- Statistics
- Excel

Technical Skills

- APIs
- Postman
- Python
- UML
- Sequence Diagrams

- Wireframing

Compliance & Security

- PCI DSS
- SOC 2
- ISO 27001:2022
- VAPT
- Regulatory Compliance
- Risk Mitigation

PROFESSIONAL EXPERIENCE

Business Analyst

PayCorp Solutions Pvt. Ltd.

April 2024 – Present

Project: NPCI Mandates & Payment Platform (NACH, UPI Autopay, APBS)

Responsibilities

- Led end-to-end requirement gathering for NPCI payment platforms supporting NACH, UPI Autopay, e-Mandate, Paper Mandates and Aadhaar-based services.
- Managed complete mandate lifecycle including onboarding, validation, execution, reconciliation and exception handling.
- Prepared BRD, FRD/FSD, solution scope documents and business process flows aligned with NPCI and banking regulations.
- Designed inward and outward payment flows covering authentication, settlement, consent management and reversals.
- Used Python (Pandas) along with SQL to perform payment data validation, reconcile transaction datasets, automate data quality checks, and generate analytical datasets for Power BI reporting and business insight
- Coordinated with banks, NPCI and internal stakeholders during UAT, certification, audit readiness and production deployment.

- Supported onboarding of more than **1 million payment records**, achieving **99%+ mandate success rate** after go-live.

Project: API-Driven Rent Collection & Mandate Platform

- Gathered and analyzed business requirements for API integrations between Core Banking Systems, partner platforms and Sohar International Bank.
- Performed interface analysis and data mapping for secure system integrations.
- Worked closely with Product, Business and Development teams throughout delivery.
- Improved mandate execution turnaround by **30–40%** through optimized API workflows.
- Configured and validated APIs using Postman.
- Supported deployment and production stabilization activities.

Project: Regulatory, Audit & Information Security Compliance

- Supported VAPT, SOC2, ISO 27001:2022 and PCI DSS audit programs.
- Coordinated with auditors and internal stakeholders for evidence collection and audit closure.
- Ensured compliance with NPCI, UIDAI and regulatory standards.
- Achieved **100% audit closure** with zero critical observations.

Business Analyst

Baroda Global Shared Services Ltd.

March 2021 – April 2024

Responsibilities

- Gathered and documented business requirements for Payments and Trade Finance solutions.
- Conducted gap analysis for International Wire Payments using SWIFT MT103.
- Worked on cross-border payment initiatives and data mapping activities.

- Facilitated stakeholder workshops involving Business, Technology and Vendors.
- Enhanced banking applications by integrating Forex, Loans, Insurance and Reinsurance services.
- Prepared functional specifications and supported end-to-end solution delivery.

Business Analyst Intern

Innodatatics Inc.

February 2020 – February 2021

Project: Term Deposit Subscription Analytics

Business Problem

The bank experienced declining revenue due to reduced customer term deposit subscriptions.

Responsibilities

- Performed problem identification and requirement gathering.
- Prepared functional documentation.
- Extracted customer data using SQL.
- Exported database records into CSV for analytical processing.
- Built Power BI dashboards.
- Used Python for data analysis and insight generation.
- Supported testing and solution implementation.

Tools Used

- SQL
- Python
- Power BI
- Google Docs

Business Analyst

Axis Bank Ltd.

June 2018 – January 2020

Responsibilities

- Managed HNI customer portfolio.
- Promoted banking products including Loans, Insurance, Mutual Funds and Credit Cards.
- Handled NEFT, RTGS, CASA and Forex services.
- Used Excel for customer portfolio management and reporting.
