EXPERIENCE

11/2021 - Present

Pune, India

● **Technical Lead Power Platform | Tech Mahindra**

Project: DTB PowerApps – Car Scheduling Application (Canvas App on SharePoint)

- Designed and developed a Canvas App leveraging SharePoint lists as the backend for customer car scheduling. Implemented role-based accs.
- Designed and developed a Canvas App leveraging SharePoint lists as the backend for customer car scheduling.
- Implemented role-based access with tailored screens for users and administrators.
- Automated reminders, approvals, and notifications using Power Automate, integrating with Teams and Outlook for seamless meeting scheduling.
- Power BI Dashboard deployed into Sharepoint Site displaying the Vehicle Booking Insights.
- Received Client Recognition Award for successful delivery and adoption of the solution.

01/2013 - 11/2021

Pune, India

● **Project: Atkins Migrations – SharePoint & Nintex to Power Platform Migration**

- Led migration of SharePoint 2013 sites to SharePoint Online, ensuring minimal downtime and data integrity.
- Redeveloped Nintex forms into modern Canvas Apps with enhanced usability and performance.
- Converted Nintex and SharePoint Designer workflows into Power Automate flows using best practices.
- Power BI Dashboard created for reporting and analytics using Power BI Desktop Tool and deployed to Sharepoint Sites.
- Acted as a Power Platform Consultant, driving adoption and ensuring adherence to governance and compliance standards.

● **Project: Multi-Cultural Banking – Power Pages, Model-Driven App, Dataverse**

- Developed a Power Pages site enabling students to register for banking account creation.
- Implemented security roles and access control for different categories of users to ensure secure and role-based access.
- Utilized Dataverse custom tables along with out-of-the-box tables for designing and managing dynamic forms.
- Built a Model-Driven Application to support internal staff in reviewing and processing applications.
- Automated processes using Power Automate flows for:
 - Sending acknowledgements to applicants.
 - Routing applications to relevant departments for approval and processing.

● **Senior Software Engineer, SharePoint | Emerson Export Engineering Centre**

Project: I Expense PowerApps: Canvas App, SharePoint

- Designed and implemented a Canvas App built on SharePoint Lists to enable finance teams and end-users to easily capture, upload, and submit expense receipts and reports via mobile devices.
- Integrated the app with Power Automate to streamline workflows, automate notifications, and manage user permissions.
- Automated user access and permissions management using Power Automate flows, ensuring secure and efficient governance.
- Developed and scheduled PowerApps usage tracking by logging reports into Excel through automated workflows.
- Performed end-to-end testing, deployment, and post-deployment support, resolving technical challenges and assisting end-users for smooth adoption.

● **Project: GE Migration – Intranet Portal**

- Collaborated with the team to gather and analyze requirements, ensuring alignment with business specifications including Analytics and Risk.
- Migrated and re-created business processes from SharePoint Designer to Power Automate, maintaining process integrity and efficiency.
- Creating Canvas App in place of Infopath forms and Developing the custom third party charts into Power BI for Sharepoint Online.
- Monitored and resolved runtime issues to ensure smooth execution and timely project completion within a restricted time window.

EXPERIENCE

- **Project: CAR Application – Intranet Portal**
 - Developed an intranet portal serving as a centralized platform for document management, web content management, and corrective action tracking.
 - The solution enabled Business and Sales Teams to efficiently respond to user-reported queries and issues, ensuring timely resolution and improved collaboration.
- **12/2011 - 12/2012**
Pune, India
 - **Software Developer – SharePoint | Cube 9 Global Services**
 - **Project: Asset Management Portal (SharePoint 2010)**
 - Developed a SharePoint 2010 portal enabling users to track organizational assets.
 - Developed and customized SharePoint features including Custom Pages, Web Parts, Timer Jobs, and Designer Workflows.
 - Implemented SharePoint Out-of-the-box features to streamline portal functionality.
 - Designed and configured permission-based access control for secure and role-specific views.
 - Enhanced portal usability and reporting through customized UI and workflow automation.
- **10/2010 - 12/2011**
Pune, India
 - **Junior Software Developer | Juventus Technologies Pvt. Ltd**
 - **Project: PARC Management (SharePoint 2010)**
 - Developed custom solutions on SharePoint 2010 (client and server-side), including workflows, list templates, and site templates.
 - Managed permissions, content types, and site creation using SharePoint Designer and Central Administration.
 - Designed and implemented Visual Studio workflows to streamline business processes.
 - Contributed to building reusable components for faster site re-creation and deployment.
- **11/2009 - 10/2010**
Pune, India
 - **.NET Developer | R S Technology & Solutions**
 - **Project: Kiingsz Masala Website (ASP.Net and SQL Server)**
 - Analyzed business requirements and translated them into technical specifications and conceptual designs.
 - Designed and developed web component modules using ASP.NET and C#.
 - Built and optimized database objects, including tables, triggers, stored procedures, and views, to improve performance and functionality.
 - Enhanced website functionality and improved user experience through efficient coding and modular development practices.

EDUCATION

- **2004**
 - **Higher School Certificate**
 - **Maharashtra Board**

2009

- Bachelor of Engineering, Computer
Pune University

KEY ACHIEVEMENTS

Pat on the Back award for Multi Cultural Banking App/Site

Contributed to innovation solutions and completed deployment of App Successfully with quality.

Innovation Award – Database Extraction and Comparison Application Issued by Emerson Export Engineering Centre, Pune · Sep 2016

Recognized for developing a Database Extraction and Comparison Application that automated the process of creating and comparing data across multiple Excel files.

Impact: Eliminated significant manual effort, reduced execution time drastically, and accelerated overall report generation.

Value Delivered: Improved efficiency, accuracy, and cost savings for the organization.

Pat on the Back award for DTB Scheduling App

Very nice looking App with easy to use for customers.
