

CHETAN PATIL

Sr. Network Engineer

Jalgaon, India | cp94448@gmail.com | 9975466783 | [LinkedIn](#)

Senior Network & Cloud Infrastructure Engineer with 6+ years of experience supporting large-scale cloud and data centre networks. Expertise in OCI networking, GPU/RDMA fabrics, SD-WAN, MPLS, and high-availability architectures. Strong hands-on experience in P1/P2 incident management, Python-based automation, and real-time monitoring using Grafana and Prometheus. Proven ability to operate in multi-vendor environments including Cisco, Juniper, Arista, and NVIDIA

PROFESSIONAL EXPERIENCE

Oracle INC | Sr. GNOC Engineer

Mar 2024 – Present

- Supported backend and data centre networks for NVIDIA GB200 project, enabling next-generation AI infrastructure.
- Supported and scaled backend and data centre networks for the NVIDIA GB200 AI infrastructure project, enabling next-generation GPU-based compute platforms.
- Led operations and support for OCI GPU RoCE RDMA fabrics and cluster networking, delivering ultra-low latency, high-throughput connectivity for large-scale AI/ML workloads.
- Served as primary on-call engineer, resolving 92% of P1/P2 incidents within SLA, significantly reducing downtime and customer impact across global regions.
- Led initial incident response for OCI physical networks across 50+ regions (Data Centre Fabric, Transit, Backbone, WDM), coordinating with on-site teams, ISPs, vendors, and internal stakeholders.
- Actively participated in P1/P2 incident bridges, performing deep-dive investigations, executing mitigations, and contributing to RCA when physical networking issues were suspected.
- Designed and maintained real-time monitoring dashboards using Grafana and Prometheus, improving visibility, alerting, and proactive detection across global data centres.
- Developed Python automation tools to analyse 5,000+ network devices, automate firmware upgrades, and streamline day-to-day network operations.
- Operated and troubleshoot Clos leaf-spine architectures across multi-vendor environments (Arista, Juniper, Cisco, NVIDIA), while planning and executing OS upgrades, RMAs, configuration changes.
- Mentoring IC3 engineers, managers, and senior leaders on OCI network architecture and best practices.

NTT Global Networks Limited | Engineer - Network Operations

Oct 2021 – Feb 2024

- Provided 24*7 network support services to 100+ global customers having distributed LAN/WAN setup.
- Troubleshooting various issue like Node/ link down, routing, latencies, packet-loss on various type of links: T1/E1, T3/E3, DSL, Ethernet/MPLS & backbone links.
- Worked with Telecommunication Service Providers to resolve escalated circuit problems to resolution.
- Coordinating & joint troubleshooting on issues with worldwide ISPs like AT&T, XO-Verizon, Lumen: CenturyLink - Level3, Vodafone, SFR, Cogent, TATA, Airtel etc.
- Worked with Hardware/Software Vendors like Cisco, Juniper, Silver Peak, etc. to resolve problems.
- Day-to-day working on SDWAN technologies like Silver Peak & Cisco-Viptela. Planning & performing various break-fix
- Activities like upgrades or RMA of various network devices in stipulated timeframe.
- Managed the firmware upgrade of Silver Peak Orchestrator and 1500 SDWAN devices, minimizing downtime and ensuring network stability.
- Created SOP documents for L1 engineers, improving efficiency in handling Silver Peak deployments and upgrades.

ConnectWise (Formerly Continuum Managed Solutions) | Technical Engineer

June 2020 – Oct 2021

- Provided L1/L2 technical support for managed services customers in a 24x7 NOC environment.
- Monitored and resolved network and security alerts, including Sentinel One endpoint protection incidents.
- Investigated Azure Risk Watch events and malicious email threats, ensuring timely mitigation and reporting.
- Supported escalation handling, shift rostering, and operational continuity for global support teams.

Lobo Staffing Solutions (Client TATA Communications Limited) | Network Engineer

Mar 2019 - Jun 2020

- Experienced in troubleshooting ILL, VPN, L2VPN, L3VPN, and MPLS networks for managed and unmanaged customers, resolving link-down issues, packet loss, latency, duplex mismatches, bandwidth utilization, and site reachability problems.
- Strong expertise in diagnosing and resolving routing issues across OSPF, EIGRP, BGP, and static routing environments.
- Hands-on experience configuring, hardening, and maintaining Cisco, Juniper, Huawei, and ALU routers and switches, including IOS and license upgrades and LAN/VLAN management.
- Proven ability to coordinate with multiple service providers (Bharti, TTSL, Vodafone, Airtel, TTML, RailTel, Verizon, SLT, XO, TE DATA) under strict SLA commitments.
- Skilled in managing customer incidents and escalations, providing timely updates, sharing technical logs, and delivering RCA/RFO reports via email and NGP portals.

TECHNICAL SKILLS

Networking	RDMA, RoCE, OSI Model, TCP/IP, LAN/WAN/MAN, VLANs, Switching, Routing, Subnetting, VPN (L2/L3, VPLS, IPSEC),EVPN, VXLAN, High Availability (HSRP,VRRP, GLBP), L2/L3 Security, Network Security, Layer 2/3 Troubleshooting, Connectivity, Bandwidth & Latency Optimization.
Network Protocols	ARP, ICMP, IPv4/IPv6, TCP/UDP, DNS, DHCP, HTTP/HTTPS, SSL, VTP, ACLs, STP, RSTP, MSTP, 802.1x, SNMP, VRFs, RIP, EIGRP, OSPF, IS-IS, BGP.
Platform Tools	Cisco,Juniper, Huawei, ALU, Wireshark, GNS3, Cisco Packet Tracer, Putty, Grafana, Prometheus, Git, ServiceNow.
Automation & Scripting	Python, Bash, Linux, Ansible

CERTIFICATIONS

- Juniper Certified Network Associate (JNCIA)
- Fortinet NSE-1
- Fortinet NSE-2
- Silver Peak SDWAN certification-SPSX
- Oracle Cloud Foundations Associate.
