Profile Summary

Full-Stack Software Engineer with 2+ years of experience across frontend and backend stacks proficient in **JavaScript**, **React**, **Node.js**, and **REST APIs**, with exposure to **Java**-based enterprise systems. Experienced in building scalable, reusable UI components, micro-frontend systems, web performance optimization, and shipping production-grade features at enterprise scale.

Experience

Oracle

Oct 2024 – Nov 2025

Software Engineer

Hyderabad, Telangana

- Engineered a Manufacturing Task Scheduler SPA using **Oracle UIF** (React-based) framework, eliminating manual saved-search workflows and reducing work-order management time by **60%** through real-time Gantt chart visualization, drag-and-drop scheduling, and operation monitoring.
- Streamlined NetSuite business processes by developing custom workflows, UI interfaces, and form validations using **SuiteScript** API, automating record event handling across production modules and reducing manual data-entry overhead.
- Diagnosed and resolved **12+** critical backend defects in NetSuite's Java-based Item Fulfillment and Inventory Detail modules through systematic debugging and root-cause analysis, improving module-level reliability and performance across production workflows.

Ten20 Infomedia

Aug 2023 – Aug 2024

Software Engineer

Hyderabad, Telangana

- Shipped the full-stack **VoiceBroadcast** feature within one month using Node.js, React.js, and Redux, enabling **10M+** outbound IVR calls with real-time survey analytics across campaigns.
- Improved VoiceBroadcast Metrics Dashboard performance by **40%** through Core Web Vitals optimization (LCP, FCP) using lazy loading, code splitting, and image compression — validated via **Lighthouse** audits.
- Delivered the **NumberMasking** feature from requirements to production using React, Node.js, and REST APIs, implementing **12+ use cases** for privacy-focused call routing that connects callers without exposing real phone numbers.
- Authored **200+** automated test cases using Mocha, Chai, and Supertest for the NumberMasking feature, achieving full functionality coverage and ensuring production reliability.
- Established third-party API audit logging and webhook event delivery using **RabbitMQ** with exponential backoff retry logic, improving event delivery reliability and system resilience across distributed services.

Skills

Programming Languages: JavaScript (ES6+), Java, TypeScript (exposure)

Web Technologies: React.js, Node.js, Next.js, Redux, Express.js, REST API, HTML5, CSS3

Databases: MySQL, MongoDB

Tools and Platforms: Git, GitLab, BitBucket, Postman, VS Code, IntelliJ IDEA, Docker, RabbitMQ, npm, Webpack, CI/CD , TeamCity

Projects

KareerGuru | *React, Next.js, Shadcn UI, Recharts, Gemini API, Clerk, Inngest, Prisma, NeonDB*

- Developed an **AI-driven career platform** with React and Next.js, integrating the **Google Gemini 2.5 Flash API** to generate personalized industry insights, resumes, cover letters, and interview quizzes.
- Integrated an AI-powered resume builder with Markdown preview and client-side PDF export using html2canvas and jsPDF, eliminating server round-trips and reducing manual formatting effort for users.
- Designed responsive, interactive dashboards using **Recharts** to visualize industry trends and quiz analytics including average score, latest results, and performance over time.
- Configured automated weekly industry-insight refreshes using Inngest cron jobs and secured authentication flows with Clerk.

Education

Guru Nanak Institute of Technology

2019 – 2023

B.Tech in Computer Science and Engineering (GPA: 7.8/10)

Hyderabad, Telangana

- Relevant Coursework:** Data Structures and Algorithms (Java), Web Development, Database Systems.

Certifications and Trainings

DSA Bootcamp by GeeksforGeeks – 12-day intensive bootcamp covering Data Structures, Algorithms, and Problem-Solving in Java.
