PROFESSIONAL SUMMARY

A competent professional with over 8 Years of experience in the IT industry. Expert as a data engineer in creating spark jobs. Seeking to lead a challenging career & to work in an organization where I can contribute my knowledge & skill for the organization's growth, which gives an opportunity for better learning and excellence in the latest technology.

WORK HISTORY

Publicis Sapient - Senior Associate Data Engineering

Bengaluru, Karnataka

12/2023 - Current

- Architected and implemented a metadata-driven governance framework on GCP using **Dataplex, BigQuery, Cloud Data Fusion, Cloud Composer, and Terraform** to standardize dataset onboarding across environments.
- Designed reusable ingestion pipelines and automated the deployment of Dataplex aspect types and metadata templates using Infrastructure-as-Code.
- Built a Python-based microservice integrated with CI/CD pipelines to manage metadata definitions and environment promotions.
- Developed modular Cloud Data Fusion pipelines with custom validations (schema checks, header/trailer validation, error handling) to enforce data quality at ingestion.
- Orchestrated workflows using Cloud Composer (Airflow), and contributed to Terraform-based infrastructure automation.
- Collaborated with business and data stakeholders to translate governance and metadata requirements into scalable, technical implementations.
- Authored **PySpark jobs** for data quality validation, metadata tagging, and API-based enrichment of BigQuery tables.
- Implemented parameterized and modular pipelines to support the onboarding of new data products with minimal effort.
- Worked closely with business teams to translate metadata requirements into technical artifacts across **Dataplex**, BigQuery, and CDF.

Altimetrik India - Senior Data Engineer

Bengaluru

05/2022 - 11/2023

- Architected and implemented an end-to-end data cataloging solution, improving metadata accuracy and accessibility
- Optimized **python** and **scala** based **Spark** jobs to process vast amounts of data efficiently, reducing processing time and enhancing system performance
- Automated ETL workflows using Autosys, ensuring seamless data ingestion, transformation, and catalog updates
- Designed scalable Hive data models, enhancing query performance and ensuring compatibility with business intelligence tools
- Provided governance and compliance solutions by building metadata lineage and auditing capabilities within the data catalog

SKILLS

- Data Fusion
 - Apache Airflow
 - Hive
 - PySpark
 - GCP
 - Big Query
 - Google Big Query
 - Apache Spark
 - Python
 - Scala Spark
 - Autosys
 - SQL
- Java

EDUCATION

04/2016

Sri Ramakrishna Engineering College

Coimbatore, India

Bachelor of Engineering: Computer Science

WEBSITES, PORTFOLIOS, PROFILES

- www.linkedin.com/in/dharshinisureshkumar

Ernest & Young - Senior Consultant

Bengaluru

03/2021 - 05/2022

- Involved in analyzing business requirements and prepared detailed specifications that follow project guidelines required for project development
- Developed **Hive** SQL queries, Mappings, tables, external tables in Hive for analysis across different banners and worked on partitioning, optimization, compilation, and execution
- Wrote complex queries to get the data into HBase and responsible for

executing hive queries using Hive Command Line

- Automated workflows using shell scripts to pull data from various data bases into Hadoop
- Wrote Hive jobs to parse the logs and structure them in tabular format to facilitate effective querying on the log data
- Implemented **Spark** using **Scala/Python** and **Spark SQL** for faster testing and processing of data

Ascendum Solutions LLC - Senior Software Engineer

Bengaluru

09/2019 - 03/2021

- Developed reusable transformations to load data from Flat files and other data sources to the Data Warehouse
- Implemented **Spark** using **Scala/Python** and **Spark SQL** for faster testing and processing of data
- Used Spark Streaming to divide streaming data into batches as an input to Spark engine for batch processing
- Designed batch processing jobs using **Apache Spark** to increase speed compared to that of MapReduce jobs
- Wrote Spark applications for data validation, cleansing, transformation, custom aggregation
- Imported data from disparate sources into Spark RDD for processing
- Developed custom aggregate functions using Spark SQL and performed interactive querying

Ascendum Solutions LLC - Software Engineer

Bangalore

08/2016 - 05/2018

- Worked as **EDI developer** using **WTX 8.4**
- Worked as Quality Assurance Professional for Testing API and Middle Ware

Services

03/2018 - 09/2019

- Worked as a **Test Lead** handling multiple projects simultaneously, implementing new automation frameworks solution, Learning new technologies for the migration of one technology to another.
- Developed various Test frameworks libraries and maintain the old frameworks in optimistic way Has been part of creating dashboards using Kibana and using Grafana (For GCP Services)
- Has Worked on various databases like Cassandra, Mongo DB, Neo4j , **Java** • Designing the Test cases and executing the same in various testing cycles.
- Raising Defects, coordinating with developers for clarifications of defects raised, Performing Regression Testing and closing the defects

Infosys - System Engineer

Bhubaneshwar Area
